

**Keith E. Perry**  
**2301 Primrose Ct 9B**  
**Columbia, MO 65202**  
**Home Ph. (314) 445-6996**  
**Work Ph. (314) 446-1187**

### **OBJECTIVE**

Obtain a position that utilizes my computer networking knowledge and analytical skills.

### **QUALIFICATIONS**

- \* Highly motivated self-starter, ability to work with little or no supervision very productively.
- \* Can effectively communicate in a relaxed business manner.
- \* Excellent oral/writing skills.
- \* Wide array of computer knowledge as well as a quick learner.
- \* Have a proven ability to analyze and solve computer related problems in a timely fashion.
- \* Perform very well in pressure situations.
- \* Enjoy work that provides a vast amount of variety.

### **EDUCATION**

#### **1993**

Certification as a Certified Network Engineer (CNE)

#### **1988-89**

Solano Community College, Suisun City, CA

Completed the courses in Electronics, Advanced Math, and Microcomputer repair for 47 units.

#### **1984-85**

U.S. Navy class "C" school. Naval Training Center, Mare Island, CA

This course taught the operation and maintenance of the BP Defense Missile System.

#### **1984**

U.S. Navy Firecontrolman, class "A" school. Great Lakes Naval Training Center

This course taught the fundamentals of missile and gun control computers and tracking radars.

#### **1984**

U.S. Navy Basic Electronics and Electricity Program, Great Lakes Naval Training Center.

#### **1982-84**

Francis Tuttle Vocational Institute Electronics Program, Oklahoma City, OK

Completed all requirements of this two year advanced study program.

### **EMPLOYMENT HISTORY**

### **1992-**

Currently employed by LANIT Consulting as Network Systems Integrator  
Salary: \$34,000 Supervisor: Chris Miller (Owner)

My Responsibilities are:

- \*\* Computer hardware/software reseller.
- \*\* Provide Network Support Services in Netware/OS2/UNIX/Windows 3.X to more than thirty companies exceeding 2 million dollars in hardware and software.
- \*\* Design, recommend, install and administrate multi-platform networks.

### **1991-92**

Employed by DataStorm Technologies (Procom Plus) as the Network Administrator  
Salary: \$27,500 Supervisor: Tom Smith

Responsibilities:

- \*\* Maintained 4 Novell Netware File Servers on two networks spanning approximately four Gigabytes of disk space.
- \*\* Support in both network and stand alone software and hardware systems for over 100 users.
- \*\* Primary contact with inhouse clients and Vendors for research, purchase, and installation of all hardware and software.

**1990-91** Employed by West Coast Telecom as their Information Systems Manger/Network  
Salary: \$31,600. Supervisor: Dick Frockt (President)

Responsibilities:

- \*\* Responsible for all aspects of Long Distance Call Processing.
- \*\* Software, hardware purchasing and maintaining an accurate account of all Information Systems purchase orders.
- \*\* Researched, purchased, and installed all Network and Data Communications equipment.

**1989-90** Employed by Sovereign Life Insurance Company of California.  
Salary: \$25,000. Supervisor: Ellsworth Green (MIS)

My duties were:

- \*\* Provided installation and support of all PC-based systems, including stand-alone PCs and Novell Netware based LANs.
- \*\* Researched, Recommended and Purchased computer related equipment for the company.
- \*\* Responsible for phone support and inquiries relating to PC software or hardware.
- \*\* Assembled, tested, installed and maintained PC-based computer hardware, peripherals and software.

**1985-88** US Navy

Stationed on the USS Tarawa, LHA-1 Weapons Division. Assigned the task of maintaining, testing and operating the two missile systems on board, and on the job training in trouble-shooting the 52-B three dimensional radar. I was also supply ordering Petty Officer for my division.

**PERSONAL INFORMATION:** Married, Age 27, Father of Two, Health/Excellent.

**INTERESTS:** Computer technology, Softball and Fishing

**REFERENCES:** Excellent references furnished upon request.

## **Biography**

**Keith Perry** has spent his professional career in the fastest growing areas of the microcomputer industry. His experience spans a wide spectrum, from military missile specialist and systems installer to the network computer systems administrator for a large software development company.

Since 1982 Keith has performed in many computer system environments. As a radar and missile technician for the US Navy, he developed discipline and organizational skills. Keith returned to college in 1987 to pursue an education in microcomputer technologies. He then went to work for Sovereign Life Insurance of California where he designed and installed LANS/WANS nationwide. Keith set up company computer standards for Sovereign that are still in use today. Upon leaving Sovereign, Keith accepted a position as Manager Information Systems for WestCoast Telecom, a long-distance carrier. Here Keith's expertise with networked microcomputers and system software enabled him to set performance standards on a custom PC-based billing system that was modeled by the designers as the recommended standard to all future clientele. This new configuration yielded an 80% increase in time-critical performance.

In 1991 Keith joined Datastorm Technologies, developer of the world's best-selling communication software, Procom Plus. As their Network Administrator, Keith was able to implement his networking knowledge on a large scale network with more than 120 users. Before Keith's arrival, Datastorm's network averaged approximately 16-20 hours per week of down time. As a direct result of Keith's work on the system, average down time was reduced to approximately 2 hours per month, scheduled during off-business hours.

In June of 1993 Keith acquired certification as a "Certified Netware Engineer" (CNE).
