1.3 doczego

                        Cashana

        I'm sure You're wondering what does this small program, with very
silly name :) The name is silly, but for Poles it's much silier then for
You, he he ;) (urgh!) This little tool lets You save Your favourite's WWW
Browser's (eg. IBrowse 1.12+, Voyager 2.83-) cache as HTML document with
(sub)directories and normal filenames. I made it, 'cause I had problem
with my IBrowse, which liked to kill my cache every time, I used it :(
Maybe You have no problems with it, but You may want to change your cache
to normal HTML doc - so it's for You.

        Cashana only reads, and processes filename's comment and uses it
to save proper files with proper names. It's very easy to use so let's
check it out! :)

1.4 Details

                        Details

        Cashana can be used only with CLI - like interfaces. It's
made especially for Opus 5+ and cooperates with it in 100%. It's of course
OK to use it with FileMaster or other filetool :^ If you like to write
looooooooong command lines - use CLI "by hand" ;))

        Program "eats" 2 arguments:

        CACHEFILE/A/M

        Name of cache file(s) from WWW Browser (cache usually is saved to
PROGDIR:Cache in most browsers). These files will be saved to

DESTDIR/A

in correct directories. Cashana will make all automaticly.

If you want to add this program to Opus' "User Menu" add this line in

configuration window:

AmigaDOS: Cashana {O} {d}

and switch these options on:

Change to source dir
Output to window (eventualy reader)

        I think you know now how does it work? Just choose "Open local
file" from menu of your Browser and pick your HTML's index file. That's
all!

        If You don't like this program You may at any time change it,
using source (in E). But - please - all new versions of Cashana made by
You - should be sent to me (e-mail later). Also remember that Cashana is
Freeware!

1.5 Requirements

You need:

- KS 2.0+,
- some RAM,
- HD.
- IBrowse, Voyager 2.88-

Program is tested with:

A1200/030/10MB/HDD/3.0

also with Enforcer (no hits detected)

1.6 History

History

Version 0.3 (30.03.1998)
- first public release.

Version 0.35 (04.05.1998)
- now really works with old Voyager's cache :)
- tells You how many errors occured while working
- now reacts at CtrlC break signal.

1.7 future

Future of this program is not really bright. I got my secondary-school
exam (urgh!!!!) in a month and I should study some other things than
Amiga... :* Program WORKS and if it will work well, I wont change it (o
that lazines... ;) You may change this program by yourself - source in E
is included in this package... If You found some bugs - please report me!

1.8   What is BlaBla?

BlaBla is a Polish biggest system programmers group. We make the system
friendly programms. We guarantee that our programs will run on almost every
machine (Amiga of course), including future ones. All our programs are
running in multitasking, and all of them are PD, Freeware, or Shareware.

Our organisation has a few members (we "absorb" only good programmers),
and WWW page (http://www.gliwice.pl/~thufor). You can find our newest
productions in our PD library called "Polware". Our texts, articles you can
also find in our disk-mag "Izviestia" (sorry, in Polish!).

Blabla memberlist (X'97):

         Kordi/DuckRed & BlaBla   (Kordian Adamczyk)
         Kysy/AM & 2xBla   (Krzysztof Habowski)
         LeMUr/bla^2 (Lukasz Prokulski)
         Karol/SubBlaBla   (Karol Bryd)
         Scott/Inferno & BlaBla   (Marcin Ochocki)
         Thufor/BlahBlah   (Dariusz J.Garbowski)
         Tomash/Art-B & BBla   (Tomasz Korolczuk)
         Warhawk/SubBlaBla   (Przemyslaw Jez)
         Krashan/BlaBla   (Grzegorz Kraszewski)
         Kaczus/subBlaBla   (Tomasz Kaczanowski)
         Futrzak/subBlaBla   (Krzysztof Wolski)
         X-Pert/subBlaBla   (Piotr Wyderski)
         Bruner/subBlaBla   (Piotr Hoppe)
         Mr.DoDo/subBlaBla   (Krzysztof Dolinski)
         Melon/subBlaBla   (Grzegorz Chmiel)
         Siumot/subBlaBla   (Tomasz Bielinski)
         Szczepan/subBlaBla   (Marcin Juszkiewicz)
         Valar/subBlaBla   (Daniel Owsianski)

BlaBla group is well-known in Poland, and programs signed with "Blabla" are
for sure very good. We made many productions, we help many   young
programmers, we write articles to Polish edition of Amiga Magazine, we try
to do all, for our beloved computer - Amiga!

1.9   Other information

Cashana was made in a few hours, so it can have some big problems with
working well :(If you see some bugs - please tell me. My address:

                         Tomasz Korolczuk

```
                          ul. Wyspianskiego 4/13
                          08-300 Sokolow Podlaski
                                 POLAND
```

If You like, and use this program, please let me know! I will be very
happy, if You send me (even very short) email! THX!

e-mail: bosy@plearn.edu.pl - prefered
        tomashq@kki.net.pl - if plearn doesn't work (from september 1998)

Newest versions of this, and my other programs You can find at:

www.kki.net.pl/tomashq

I'd like to thank Krashan/Blabla for a >super< name for this program. You
did well, dude ;)

Sorry for mistakes in this file, and in main program. I'm really short of
time now (exams!!!! :(But - this programs wasn't prepared for mass
copying ;)
