# *Getting Started*

## Setting Up the Digital Camera

Connect your digital camera to your computer according to the instructions laid out in the digital camera documentation.

## Selecting Sources

Select a digital camera software. Mr. Photo needs the software accompanying with your digital camera in order to read data from the digital camera.

Once you've selected software you can download the photographs from your digital camera.

## Downloading Photos from Digital Camera

Plug your Digital Camera into your computer. By now, you should have installed the digital camera's software.

One click downloads the photos into Mr. Photo. The photos will be displayed in the Thumbnail View.

## Bring Out the Best In Your Photo

After you've downloaded your photos, use the Instant Enhancement or Touch up tools to bring a touch of magic to your photo. You can eradicate undesirable blemishes such as red eye, improve the color on someone's cheeks by adjusting the hue, alter the contrast and brightness or put a golden tint on a twilight scene.

## Printing

You can print out your own stickers, flyers and labels with Mr. Photo's print tool. So, whether you're running for president or creating invitations for the kids, click the Print icon on the Application bar and select ...

- Print Photo to print annotated flyers etc.
- Print Sticker to print sticker sized labels
- Print Catalog (Labels) to print various sized labels which could be included in a catalogue.

# *Installation*

### System Requirements

#### For Windows:

- Digital Camera plus digital camera software.
- Scanner, if you intend to scan photos.
- A PC with at least a 486 microprocessor (A Pentium processor is recommended) and 16MB RAM.
- Recommend at least 30MB of hard disk space available after installation. Mr. Photo will need this space to work in.
- A CDROM drive to load Mr. Photo.
- Super VGA display card.

#### For Macintosh:

- A Power Macintosh computer.
- System 7.5 or later.
- CD-ROM drive.
- Hard drive with 30MB free disk space.
- 16MB RAM (32MB is recommended).
- At least 36MB virtual memory

## Installing Mr. Photo

### For Windows:

Follow the steps below to install Mr. Photo.

- Insert the Mr. Photo CD into your CD-ROM drive.
- Follow the instructions on your screen as they appear.

### For Macintosh:

To install Mr. Photo:

1. Insert the program CD into your CD-ROM drive.
2. Double click on the *Presto! Mr.Photo v1.2 Installer* icon to launch the setup program.

Then follow the on-screen instructions to complete the installation.

## Installing The Digital Camera Software

The digital camera contains software which must be installed before you can download photos from it. So, install the Digital Camera software immediately before or after Mr. Photo.

# *Introduction*

With Mr. Photo, you can:

- Create multimedia slide shows, screensavers and wallpaper  
(For Macintosh: This function is not available.)
- Enhance your photos instantly with red-eye removal
- Lighten underexposed photos or darken overexposed photos
- Print photos, catalogs, calendars, stickers and more
- Download photos from a digital camera
- Search for photos
- View photos (in a slide show)  
(For Macintosh: This function is not available.)
- Put photos on the Internet (upload to a web site)  
(For Macintosh: This function is not available.)

## Mr. Photo

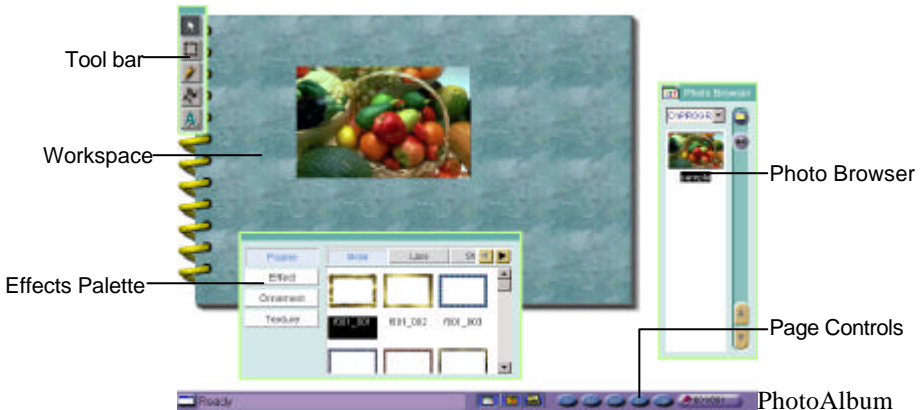

Mr. Photo stores and catalogs all of your valuable photos. You can sort photos and film "rolls" by date and title (For Macintosh: This function is not supported.), or search by keyword, date, and other image properties. Then drag-and-drop photos to the Application Bar to create photo masterpieces using ready-made templates or design electronic photo albums. Click the Slide Show icon to view selected all the photos in a "roll" of film (For Macintosh: This function is not supported.), or drag-and-drop a photo to the E-mail icon to send it to family and friends.

- Acquire photos from TWAIN digital cameras, scanners, floppy disks, PhotoCDs, and the Internet  
(For Macintosh: Macintosh also supports acquiring photos from Plug-In compliant devices.)
- Catalog photos in "rolls" of film that you can customize and rearrange
- Enhance photos instantly (remove red-eye, adjust brightness/contract, blur/sharpen)
- Drag-and-drop photos to print, e-mail, create HTML slide shows, or post on the Internet  
(For Macintosh: This function is not supported.)
- Drag-and-drop photos to other applications for further editing or creative projects

- Save photos as a screen saver or as wallpaper  
(For Macintosh: This function is not supported.)
- Print stickers, labels, and photo catalogs

## PhotoAlbum

PhotoAlbum helps you create electronic photo albums that keep your memories alive forever. Just drag-and-drop photos, frames, clip art, textures, and special effects, and add voice-overs and sound effects. You can also personalize your albums with voice-overs and sound effects, then produce album slide shows to post on the Internet or send completed albums by e-mail.

- Acquire photos from TWAIN digital cameras and scanners  
(For Macintosh: Macintosh also supports acquiring photos from Plug-In compliant devices.)
- Create album pages from ready-made templates or create your own
- Rotate, resize, and enhance photos
- Drag-and-drop to add photos, frames, clip art, textures, and special effects
- Decorate album pages with text captions, background music, narration, and sound effects
- Share completed albums via e-mail or post to the Internet

# How To...

## Setup the Digital Camera

Connect your digital camera to your computer according to the instructions laid out in your digital camera's documentation.

## Load or Acquire photos

### Loading Photos from a Digital Camera

This feature gets photos from a digital camera and puts them into Mr. Photo.

To load photos from your Digital Camera:

1. Choose the **Select Digital Camera Source...** command from [Input] menu.
2. In the [Select Source] dialog box, choose the digital camera's driver, and then click *OK*.
3. Select the camera icon  in the Mr. Photo window or the **Load Photos from Digital Camera** command from the [Input] menu.
4. Select all the photos or click on the individual photos you wish transfer to your hard disk.
5. Select the **Transfer Photos** command from the Camera menu. The Photos will be transferred to the Thumbnail View and placed under a film named *Untitled*.

*Note: Please consult the documentation of your digital camera for detailed operating instructions.*

**For Macintosh:** Macintosh also supports acquiring photos from Plug-In compliant devices.

## Acquiring Photos from a Scanner

To acquire photos from your scanner:

1. Choose the **Select Scanner Source...** command from the [Input] menu.
2. In the [Select Source] dialog box, choose scanner's driver, and then click *OK*.
3. Select the scanner icon  in the Mr. Photo window or the **Acquire Photos from a Scanner** command from the [Input] menu.
4. The Photo will be scanned into the *Thumbnail View* and placed under a film named *Untitled*.

**For Macintosh:** Macintosh also supports acquiring photos from Plug-In compliant devices.

## Adding All Photos from Disk

Adding existing photos from your hard disk to Mr. Photo:

1. Select **Add All Photos** from the [Input] menu.
2. Make the necessary selections from the [Add All Photos in Folder(s)] dialog box.
  - Folders with Photos:* Displays only the folders that contain photos.
  - Include Sub-folder:* Adds photos from the selected folder and the photos in its sub-folders.
  - New Roll:* Creates a new film for the storage of the photos you add.
3. Click *OK* to display the photos in Mr. Photo.
4. Name the folder by double clicking on the *Untitled* name in the list box or by selecting **Film's Properties...** command from the [Edit] menu.
5. Enter the necessary details into the [Film Properties] dialog box and click *OK*.

**For Macintosh:** This facility is not available.

## Adding Photos from Internet

When you browse photos on the internet, you may want to preserve some of them. With PhotoBag you can easily keep the photos in your hard disk.

1. Click the PhotoBag icon, , to switch to the PhotoBag window.
2. Invoke your internet browser and search for the picture you are interested in.
3. Drag the picture directly to PhotoBag. The picture will be added to PhotoBag.

*Note:* You can add an internet browser to the Application Bar to make this task easier.

**For Macintosh:** PhotoBag is not supported.

## Bring Out the Best in Your Photos

### Using Instant Enhancement

This function will automatically adjust the contrast, brightness, highlight, shadow and tone of the selected photo and will display several samples that you can choose to apply on your photo.

1. Select the enhancement option you want from the lower part of the dialog box. The *After* thumbnail will display the effect of the chosen enhancement option.
2. Use the  and  buttons to adjust the magnification.
3. Click *OK* to finalize the enhancement.

### Removing Red-eye

If you receive a photo that was taken with a flash, the use of the flash may cause a red reflection from a subject's eye. To restore the eye to its original color:

1. Select the **Touch Up...** command from the [Enhance] menu, or double click a photo you want to touch up.
2. Select the *Advanced* button.

3. Move and resize the square onto the red eye. The size of the square must not be larger than the red eye.
4. Select the *Removed red-eye* button.

## Touching Up your Photos

1. Select the **Touch Up...** command from the [Enhance] menu, or double click a thumbnail you want to touch up.
2. Make appropriate adjustments by dragging the *Saturation*, *Brightness*, *Contrast*, *Blur/Sharpen* and *Color Tint* sliders. The effect will be displayed in the window immediately.

## Show Photos via Multimedia Slide Show

### Creating a Portable Slide Show

Mr. Photo can create an executable file that can be sent over Internet or e-mail. The receiver simply runs the file to see a slide show.

1. Select the Photos you want to be included in the slide show.
2. Select **Slide Show via E-mail** from the [Internet] menu. Or, click the Internet icon  on the Application bar. From the Task menu, select *Portable Slideshow*.

**For Macintosh:** This facility is not supported.

### Viewing a Slide Show

A slide show can be run directly from a photo session.

1. Select the Photos you want to be included in the slide show.
2. Click the Slide Show icon, , on the Application bar and see the slide show play on the screen.
3. Make changes if needed by clicking the *setting* button of the control bar.

**For Macintosh:** This facility is not supported.

## Controlling Slide Shows

The default position of the Slide Show Control bar is at the bottom of the screen. You may click the arrow at the left-hand side to hide or show the Control bar.

- Exit** Stops playing and quits the Slide Show. (You may press the [Esc] key on your keyboard to quit playing slide show.)
- Hide** Conceals Slide Show behind other active windows.
- Setting** Opens the [Slide Show Setting] dialog box where you can adjust the presentation features of the show.
- Save** Saves all the photos or selected photos from the slide show to disk.

**For Macintosh:** This facility is not supported.

## Access to PhotoNet

### Uploading Photos to PhotoNet

As an alternative to e-mailing or sending your photos by standard postal mail, Mr. Photo allows you to store and share photos through PhotoNet. Any number of your friends and family can access PhotoNet to view and download photos.

1. Select photos you want to upload to the PhotoNet.
2. Click the **Upload photos to PhotoNet...** command from the [Internet] menu.
3. Fill in the dialog box with every piece of information it requests:

If you didn't enter a specific *Film ID*, a few moments after clicking the *OK* button, PhotoNet will display a dialog box telling you the *New Film ID* and the charge for this service.

*Note: Remember to tell your friends the Film ID and the User's Name of the photos that you put on the PhotoNet Server. So they can easily get the photos.*

For more detailed information about PhotoNet, please go to the the PhotoNet web site on [www . photonet . com](http://www.photonet.com).

**For Macintosh:** This facility is not supported.

## Downloading Photos from PhotoNet

After you receive the Film ID, follow the steps below to get the shared uploaded photos from PhotoNet.

1. Select **Download Photos from PhotoNet** command from the [Internet] menu.
2. Fill in the dialog box with the information given by your friend informs you.
3. Download the Photos as instructed on the PhotoNet web-page.

For more detailed information about PhotoNet, please go to the the PhotoNet web site on [www . photonet . com](http://www.photonet.com).

**For Macintosh:** This facility is not supported.

## Fun With Your Photos

### Saving Photos as ScreenSavers

In Mr. Photo, simply click the **Save as Screen Saver** command from the [Output] menu, you can create your own screen savers with the photos you select.

**For Macintosh:** This option is not available.

### Saving Photos as Wallpaper

You want to decorate your desktop background? Just click the [Output] menu and select the **Save as Wallpaper (Center/Tile)** command, Mr. Photo will apply the currently selected photo to your desktop background.

**For Macintosh:** This option is not available.

## Outputting HTML

Creates a personal web-page through Mr. Photo's photo-to-HTML converter.

To create html files:

1. Select the **HTML** command from the [Internet] menu.
2. From the [Output HTML] dialog box, click the *Browse* button to locate a path for the HTML files.
3. Click *OK* to output the photos in HTML format to the location you select.

**For Macintosh:** This option is not available.

## Creating an Album

If you have installed the **Presto! PhotoAlbum**, the [Design] menu will appear on the Menu bar. Then you can use the **Album** command to invoke the program and create your album.

1. Select photos that you want to put in an Album.
2. Choose the **Album...** command from the [Design] menu. Or, click on the PhotoAlbum program icon on the Application Bar.
3. Follow the on-screen instructions of PhotoAlbum.

## Compose Your Photos

Visiting a famous spot and find losing your camera? Don't be depressed. The Compose feature in Mr. Photo helps you to make it up easily. Presto! Photo Composer is a quick-and-easy tool for composing a photo with a famous landmark.

## Getting Photos

After entering the "Presto! Photo Composer" window, you can begin to load the photos you want to put together.

1. To get "My Photos," you can

- Get your photos from the photos chosen at the Mr. Photo window, or
  - Download photos from Hard disk by clicking on "More photos" icon
2. Simply drag and drop the desired photo to the upper frame on the left side of the window.
  3. Click on "Landmarks" icon, thumbnails of various famous spots will show.
  4. Drag and drop the desired photo to the lower frame on the left side.
  5. Make sure that your photo is on the upper frame and the photo of Landmarks is on the lower frame. Click on the {bmc swap.bmp} icon to swap foreground and background if necessary.
  6. Click on Compose icon, or  
Click on the OK button and the two photos will be brought together!

## Blending Two Images Together

Presto! Photo Composer provides several tools for composing your photo in a quick-and-easy way.

The following tools are effective only on the foreground photo.

### Move/Resize Tool

This tool changes the position, image size and orientation of the foreground photo.

### Montage Tool

This tool erases all the pixels it passes on and dissolves the foreground photo into the background photo. It is most suitable for blending the edges of the foreground photo to the background photo.

Different brush widths are provided for various usages.

### Quick Restorer

This tool restores parts of the foreground image.

Different brush widths are provided for various usages.

### Smart Scrapper

This tool functions similarly as the Scrapper, but it can reserve boundaries by dragging to make portions of a similar hue invisible.

Brushes are available in several sizes for a convenient usage.

### Scrapper

This tool scrapes away portions of the foreground to reveal the background.

Brushes are available in several sizes for a convenient usage.

*Note: To undo the Montage, Restorer, Smart Scrapper, and Scrapper functions, simply click on the right mouse button and drag it through the area you want to recover.*

## Editing Your Photos

Besides the modifying tools mentioned before, several quick-and-easy tools are provided on the left palette for adjusting the foreground and background photos separately. Select a photo by clicking the foreground or the background frame.

### Flip Horizontal Tool

Flip the image from left to right.

### Flip Vertical Tool

Flip the image upside down.

### Color & Brightness Tool

Change the color and brightness of photo(s) by placing the cursor at any point on the Color Wheel or dragging the slider below.

### Transparency Tool

It changes the transparent level of the foreground photo. Drag the slider directly to make the setting. Dragging to the left side increases the level and dragging to the right end to keep the original level.

### Blur Tool

It changes the blur level of the background photo by dragging the slider. Drag the slider directly to make the setting. By blurring the background photo, you can make the foreground photo distinguishable.

## Save Photos

### Making Thumbnails

Saves selected photos in a suitable format to be shown as thumbnails on a web page.

1. Select **Make Thumbnail for Internet...** command from the [Internet] menu. Or, click the Internet icon on the Application bar. From the Task menu, select *Make Thumbnail*.
2. Enter the appropriate details into the fields in the [Making Thumbnails] dialog box. Click **OK**.

Mr. Photo will make thumbnail(s) from the selected photo(s).

### Converting Photos to Other Formats

Mr. Photo can change the path and the format of the Photos you selected.

1. Select the **Copy Files** command from the [Output] menu.
2. In the [Copy Files] dialog box, specify a new path or click the *Browse* button to locate one.  
**For Macintosh:** Select the path from the dialog box.
3. From the *Type* combo box, select a file format. If you choose *Original*, Mr. Photo will save the photo as its original file format.
4. Click *OK*.

## Send photos, Slideshows via E-mail

Have you thought of sharing beautiful and memorable photos with your friends? Mr. Photo helps you share photos and slideshows through your e-mail system.

1. Select the photos or slideshows you want to send by E-mail.
2. Opens the e-mail facility and attaches the photos you selected to the mail.

**For Macintosh:** This facility is not supported.

## Print Photos

### Printing Photo

Mr. Photo allows you to print photos by choosing the **Print Photo(s)** command from the [Output] menu. Before printing photos, click the *Options* button at the bottom left corner of the [Print Fun] dialog box from where you can make the selections you desired for your printing.

### Printing sticker

Mr. Photo allows you to print selected photos onto the sticker paper sheet. It can help you to create impressive stickers.

To print stickers:

1. Select the Photos you wish to print.
2. Click the *Printer* icon on the Application Bar, and then select the *Print Sticker* from the Task bar.  
In the [Print Fun] dialog box, choose your sticker paper style and, if needed, click the *Option* button to make appropriate changes to your printing selections.

### Printing Catalog

Mr. Photo allows you to print photos as Catalogs. Before printing photos, click the *Options* button at the bottom left corner of the [Print Fun] dialog and make selections you are interested in.

To print catalogs:

1. Select the Photos you wish to print.
2. Click the Printer icon on the Application Bar.
3. Choose *Print Catalog* from the Print Task menu to invoke the [PrintFun] dialog box.
4. Make the appropriate settings and then click the **Print** button.

*Note: You can set a paper style for your catalogs by clicking the Paper Style button at the middle right edge of the [Print Fun] dialog box.*

## Search Photos or Films

### Search for Photo(s) or Film

The search facility can help you find specified photos or films.

1. Click the search icon, , or select the **Search Photo(s)/Film** command from the [Edit] menu.
2. Make the appropriate selections from the [Search] dialog box.

*Mode pane:* sets the data type you want to search and sets the searching order and amount.

*Text pane:* limits your search to the key-in title, keyword or memo info of the photos you want to search.

*Date pane:* limits the search to within the given "from" to "to" dates.

*Image File Property pane:* lets you select the image format you want to search.

3. Click *OK* to begin searching.

## Use Application Bar

### Adding an Application

1. Click the ADD/Remove icon, . The [Add/Remove Applications] dialog box will appear.
2. To add an application, type a name for the application in the Name field.
3. Enter the path of the application in the Path field. Or, click the **Browse** button to open the [Open dialog box] from where you can select the desired application.
4. Click the **Add** button to add the application to the Application list.
5. Click **OK** to close the dialog box and place the application on the Application bar.

**For Macintosh:** This facility is not supported.

### Removing an Application

1. Click the ADD/Remove icon, . The [Add/Remove Applications] dialog box will then appear.
2. Select the application you wish to remove from the Application list box.
3. Click the **Remove** button. The selected application will be removed from the list.
4. Click **OK** to close the dialog box and remove the application from the Application bar.

**For Macintosh:** This facility is not supported.

## Communicating with Other Applications

Communicating with other applications in your computer through Mr. Photo is very easy. Select one of the following methods.

### Application Bar

1. Select a photo from the Thumbnail View.
2. Click on a program icon you want to use on the Application Bar to invoke the application.

### PhotoBag

The PhotoBag window can stay on top of all opened windows. In other words, whatever window is active, you still can see the PhotoBag window. That makes it easy when you want to work with other applications.

1. Click the PhotoBag icon, , to switch to the PhotoBag window.
2. Invoke an application and search for a picture you are interested in.
3. Drag the picture directly to PhotoBag or from PhotoBag to the invoked application. The picture will then be added to the PhotoBag or the selected application.

*Note: You can add the applications you frequently use to the Application Bar to make this task much easier.*

**For Macintosh:** PhotoBag is not supported.

# General Usage

## Window Control Buttons

-  Minimize the Mr. Photo window.
-  Toggle between Mr. Photo window and PhotoBag.
-  Quit Mr. Photo program.

**For Macintosh:** This facility is not supported.

## PhotoBag

The PhotoBag window can stay on top of all opened windows. In other words, whatever window is active, you still can see the PhotoBag window. That makes it easy when you want to work with other applications.

1. Click the PhotoBag icon, , to switch to the PhotoBag window.
2. Invoke an application and search for a picture you are interested in.
3. Drag the picture directly to PhotoBag or from PhotoBag to the invoked application. The picture will then be added to the PhotoBag or the selected application.

*Note:* You can add the applications you frequently use to the Application Bar to make this task much easier.

**For Macintosh:** PhotoBag is not supported.

## Selecting Photos

There are several ways to select photos from the *Thumbnail View*.

- Select one photo by clicking on it with the mouse cursor.
- Select several photos by holding down the [Ctrl] key and clicking the desired photos with the mouse cursor.
- Select all the photos in the thumbnail view by pressing the [Ctrl] and [A] keys simultaneously.

**For Macintosh:** Please use the [Command] key instead of the [Ctrl] key.

## Copying and Moving Photos

To copy photos:

1. Select the photos you want to copy in Thumbnail View.
2. Hold down the [CTRL] key on your keyboard and then drag the selected photos.
3. Release the mouse button to drop the photos at the desired position.

To move photos:

1. Select the photos you want to move in Thumbnail View.
2. Drag the selected photos.
3. Release the mouse button to drop the photos at the desired position.

**For Macintosh:** Please use the [Command] key instead of the [Ctrl] key.

## Discarding Photos & Films

1. Select the Photos you wish to discard.
2. Drag and drop the selected Photos onto the *Trash-can* icon .

Or, select the **Discard Selected Photo(s)** command from the [Edit] menu.

The Photos will then be placed in the Trash-Can waiting for disposal or retrieval.

## Throwing out the Trash

1. Drag the films or photos you wish to discard to the trash can.
2. Select the **Clean Trash Can** command from the [Edit] menu. The contents of the trash can will be deleted.

Or, place the mouse cursor over the rolled out Film list box. Click once with the right mouse button. Choose the **Clean Trash Can** command from the pop-up menu.

The contents of the trash can will be deleted.

***Note:** In the [Clean Trash Can] dialog box, if you choose the **Yes** button, the photos in the trash can will be deleted from your hard disk forever. That is, you can select the **No** button to discard the photos from Mr. Photo, if you wish to keep the photos in your disk.*

# Menu Commands

## Input Menu

### Select Digital Camera Source

Selects the Driver of your Digital Camera.

**From:** lets you select a digital camera's driver.

**To:** sets the path of the folder that stores the pictures you load form the selected digital camera.

**Create a New roll of film:** creates a new roll for the storage of loaded pictures.

#### For Macintosh:

From the **Selece Digital Camera Source** submenu, select...

the **Select TWAIN... or Select Plug-In...** command to select the driver of your digital camera.

the **Digital Camera Input Setting** command to pick out a specific directory for the storage of the photos loaded from your digital camera.

### Get Photos from a Digital Camera

Downloads photos from a digital camera. The [TWAIN Interface] dialog box is called when this command is selected.

**For Macintosh:** Macintosh also supports acquiring photos from Plug-In compliant devices.

### Select Scanner Source

Selects the scanning source which will handle image acquisition.

**From:** lets you select a scanner's driver.

**To:** sets the path of the folder that stores the pictures you acquire.

**Create a New roll of film:** creates a new roll for the storage of acquired pictures.

### **For Macintosh:**

From the **Select Scanner Source** submenu, select...

the **Select TWAIN...** or **Select Plug-In...** command to select the scanner driver.

the **Scanner Input Setting** command to pick out a specific directory for the storage of the photos acquired from your scanner.

## **Acquire Photo from Scanner**

Begins scanning an image from a scanner. The Scan dialog box is called when this command is selected.

**For Macintosh:** Macintosh also supports acquiring photos from Plug-In compliant devices.

## **Add All Photos**

Adds photos from the folder you select in your computer.

At the bottom of the [Add All Photos in Folder(s)] dialog box, there are three check boxes.

**Folders with Photos:** Displays only the folders that contain photos. (**For Macintosh:** This option is not supported.)

**Include Sub-folder:** Adds photos from the selected folder and the photos in its sub-folders. (**For Macintosh:** This option is not supported.)

**New Roll:** Creates a new film for the storage of the photos you add.

## **Add Photo(s)**

Selects photo(s) from your computer and adds the photos into Mr. Photo.

## Screen Capture

Choose to capture from area, window, or desktop.

**For Macintosh:** These options are not supported.

### Area

Opens an application or a window whose display you wish to capture. Next, select the **Area** option. Finally, drag the cursor across the portion of the display you want capture, and release the mouse key to capture it.

### Window

This tool captures an application's window if the capture cursor is placed on a window's title bar. Otherwise, window objects bordered by a highlighted perimeter will be captured.

### Desktop

This tool captures the entire display as seen on your screen.

## Exit

Select this command to leave Mr. Photo.

**For Macintosh:** Quit.

## Edit Menu

**For Macintosh:** Please use the [Command] key instead of the [Ctrl] key.

### Undo (Ctrl + Z) / Redo (Ctrl + Y)

Undoes / Redoes the last action.

### Cut (Ctrl + X)

Removes a selected photo from the Thumbnail View and holds it on the Clipboard ready to be pasted to other films.

### Copy (Ctrl + C)

Copies selected photos and holds it on the Clipboard ready to be pasted to other films.

## Paste (Ctrl + V)

Pastes the photos you cut or copy onto a selected film.

## Duplicate Pictures

Makes a copy of the selected photo.

## Select All Photos (Ctrl + A)

Selects all the photos in a film.

## Select None
