

VB ICON BROWSER
Version 2.15
Windows 3.x Icon Utility

Use VB Icon Browser to view, maintain, and print your collection of Windows icons. A unique feature of VB Icon Browser is its ability to produce very high quality completely customizable printouts of your icons. When making a printout, you can easily change the fonts, icon size, icon spacing, titles and margins for an endless variety of printouts containing from one to thousands of icons per page. For your viewing pleasure, you can view up to 36 icons at once and scroll through all icons in a directory. To manage your icon files, you can visually copy, rename, and delete icons using the drag and drop method.

VB Icon Browser is a copyrighted product and is not public domain. If you use this product, you are obligated to register with the author.

Individuals and mail order shareware vendors are granted permission to distribute copies of this program. VB Icon Browser is licensed exclusively to Micro Star for retail sale. VB Icon Browser may not be distributed by any other vendor other than Micro Star for the purpose of retail sale.

To order your registered copy of VB Icon Browser and other Valley Programming products, you can use your credit card, CompuServe account, or mail a check with the included order form. On CompuServe, type GO SWREG and use author ID of 72630,1022 and follow the simple instructions. To use your credit card, call 1-800-2424-PSL or 1-713-524-6394 and specify one of the product numbers below:

VB Icon Browser.....\$19.95...product number 10597
VB Icon Browser and VB Icon Extractor...\$24.95...product number 10600
VB Icon Browser, Extractor, and LBGolf..\$29.95...product number 10601

Add \$2.00 for normal shipping and handling. Overseas is \$4.00.

Please call PSL for orders only. PSL is a credit card order taking service only.

NOTE: This is from the archived version of VB Icon Browser that was set up for distribution on BBS's. VB Icon Browser and other programs that were made with Visual Basic 2.0 require the VBRUN200.DLL file which should be in your Windows system directory. The VBRUN200.DLL file was NOT included in the archive due to the large size of the file. The VBRUN200.DLL file comes with registered versions of VB Icon Browser as well as free Visual Basic source code and icons.
