

NOTES FOR AMAZEING 4.02

Hi! This is AMAZEING version 4.02 --- a 3D maze game for Windows 3.1

AMAZEING has 5 levels of difficulty for single level and multi level mazes --- from 10x10 to 50x50 for single level, and from 5x5x5 to 25x25x25 for multi level. There are various cheat options available. Your view is down the maze corridor and if you've got 256 colours, it looks great!

AMAZEING does not have any special requirements, but the faster your computer, the better the response time will be for coloured walls (filled in rather than lines). Shrinking the window will decrease the response time as there is less to draw.

As said in the help file, I would love to hear your comments, suggestions, bug reports, or just general chat.

New in version 4.02 is MIDI sound :) You can play a .mid file for any of the game events, and also loop the game startup sound.

Enjoy!
