Sorry, for my poor english. If you want, you can translate my german guide and send to me. You can find the german guide in the Aminet.

biz/swood/fw_font.lha

Thanks.

1.2 Installation

If you use always an other version of »FontLook.fw«:

1. Copy »FontLook.fw« in your FWMacros-Drawer.

If you dont use »FontLook.fw«:

1. Copy »FontLook.fw« in your FWMacros-Drawer.

2. Start programm »RexxMast«.

3. Start »Finalwriter«.

4. Open menu "User - Other - Preferences...".

- * "Action" - New
- * "Name of menu" - FontLook
- * "Command" - "Type" - ARexx-Script
- * "Command" - "Select" (FontLook.fw)
- * "HotKey" - Alt+F10
- * "Accept"
- * "Save"

1.3 How to use

Start the macro with the Shortcut Alt+F10.

You have to do:

Select if you want to have a codelist or a layout of a font.

Select the screen output. (speed is 100% faster than normal. idea from Frank Waechter)

Select the relevant font..

You can also select the perforation sign, to collect the prints of the fonts.

Last, but not least, you have to select: Save or the print output.

Thats all.

1.4 Author

Send improvements, tips or other problems with Finalwriter to me.
