· Problems

· History & Author

1.2   Project

HD Utilities is unique mag/utility disk in superb graphic

environment (256 colors in main screen). HD Utilities is

produced every month in the year and includes top utility

programs from all sort of CDs (CU Amiga...) and from Aminet;

latest news; info about all games, that are in development

and all sort of cheats, patches and help for you game freaks.

You can also print every bit of information, see pictures,

hear superb music and extract (all utilities are in .lha form)

all programs into the directory where HD Utilities is located.

1.3   HD UTILITIES

INSTALATION AND USAGE

Before you start the program, you must copy all libraries

and fonts into LIBS : and FONTS : directories on your

Workbench partition. Then reboot computer and start

the program (click on the icon called HDU).

Problem info : miro.hacek@uni-lj.si

Usage

In second menu are some music options in menu called music.

You can also quit HDU program clicking on Quit (in the main menu).

In utility and game/patch/help parts of the program, you can print

documents, see pictures (if any) and install program.

Program(s) will be automatically installed into directory, where

you have put HDU program. Also see instructions in the

readme file on Aminet.

1.4 HD UTILITIES

POSSIBLE PROBLEMS

Program runs on all AGA Amigas with 6Mb RAM (I

think 4Mb will also be enough). You will also need

about 3Mb free space on your hard drive. Tested

on 020/28 and 030/50 with 4Mb RAM. If program fails

to run, please try xtra-libs (math libs), but before you

do that, please backup your original libs.

1.5 HD UTILITIES

HISTORY & AUTHOR

Until number 42 (or sep97) this program was available only

in Slovenia in Slovene language. It was collection of utility

programs on one disk without any graphical interface.

Number 1 was produced on 15.03 1996. Till 01.07 1997

there was 41 disks. Number 42 or sep97 is first graphical

HD Utilities program -- rather enhanced mode. We hope

we will be able to produce one number of HD Utilities every

month and upload it to Aminet. Please, send us your

comments and wishes.
