1.4 DVC tells me strange version strings...

Libraries check

If the "Libraries check" find a library on your system that's more actually than in LibGuide, so send me please the relevant information with the actual size...

Did you get version informations from DVC like this?

```

68040.library      65535.2
hisoftbasic.library 1988.4
kd_freq.library    1991.1991

```

If you get version informations higher than V100.0, please control the version of the library with c:version.

```
1.Shell:> version xxxx.library full
```

If the result is e.g.: 2.-1 or 3.-1 then read the words from Roger Hågensen:

```
>DVC has some problems with version checking by several libraries.
>I've attached some examples. I hope you can change this little. I know,
>that it is a big problem with the different version strings. :-)
```

```
"Some authors do not follow the standard way of making a idstring,
thus those files do not show reliable version info.
Those files that have a correct however, should always be correct.
But sadly it is impossible for anyone to know if a file has
a good or bad version info, and we don't want to use more time
on such messy things, complain to the authors of the files,
it is their loss if they don't have a correct version/idstring..."
```

```
BTW: Did you find in LibGuide libraries with a size of "0"?
      I would be greatful if you can tell
            me
            the size of this
actual libraries.
```

1.5 Some words to the authors of the Libraries

```
      In the last time I found some libraries, with the same ↔
      name
but different authors and different functions.
But here is a problem for all users of these libraries.
```

```
Kai Hofmann (Author of
      »date.library«
      ) has an inspiration
to register the names of the libraries.
```

```
In his opinion we need a Library Naming Guideline or
a central Register Place, to solve this problem.
```

```
!!!
      Register the name of your library.
      !!!
```

There have been numerous Workbench versions from V1.1 to V3.1 and each one has had some updated libraries with the upgrade.

Workbench 1.2 and 1.3 were upgraded many times by Commodore.

Workbench upgrades from V2.0 thru V3.1 have many Libraries added, deleted or moved into Kickstart ROM.

Generally it is GURU time or very unstable operation to use OS Libs for any other version of the OS than they were intended for !!!

There seems little reason in listing Libs that are in Kickstart ROM since the user cannot update those Libs without upgrading the Kickstart ROM and Workbench OS...

Vxx.x were normally associated with the OS identified as follows:

V31.x = OS 1.1 = A1000
 V33.x = OS 1.2 = A500, A2000, avail for A1000
 V34.x = OS 1.3 = A500, A2000, A2500, A3000 (KickROM's), avail for A1000
 V36.x = OS 2.0 = A3000, avail for A500, A2000, A2500
 V37.x = OS 2.0 = A3000, avail for A500, A2000, A2500
 V38.x = OS 2.1 = A500+, avail for A500, A2000, A2500, A3000
 V39.x = OS 3.0 = A1200, A4000
 V40.x = OS 3.1 = A1200, A4000, avail for A500, A500+, A2000, A2500, A3000

I don't have specific knowledge of Amiga models not listed eg. A1500
