1.2 The JST patcher

The JST patcher

Last version: 2.0

Author: Jean-François Fabre jffabre@club-internet.fr

Website: <http://perso.club-internet.fr/jffabre/amiga/patches.html>

Style: Shareware via keyfile, only the save functions are disabled

Cost: 10\$, 7.6 Euros, very cheap.

JST (or JOTD?) is a great command that is used by a big numbers of installers, the JST installed games are running very well from any WB.

Jst can be used as a simple degrader

Jst2.0 uses now full MMU

Jst emulate

WHDload
!

1.3 The Abaddon patches

The Abaddon patches

Author: Keith Krellwitz/Abaddon
Website: <http://www.wwa.com/~abaddon/loaders.html>
Style: JST patches and sometimes WHDload
Cost: Same as the patchers used

Abaddon made a lot of great installers with JST/WhdLoad

1.4 The Kaervek's patches

The Kaervek's patches

Author: Ralf Huvendiek/Kaervek kaervek@gmx.de
Website: http://kaervek.freeservers.com/amiga/main_patches.html
Style: JST patches
Cost: Same cost than JST...

Kaervek made a lot of great installers with JST

1.5 The WHDload patcher

The WHDload patcher

Last version: 9.1
Author: Bert Jahn Bert.Jahn@fh-zwickau.de
Website: <http://www.fh-zwickau.de/~jah/>
Style: Shareware via keyfile, save functions are disabled and some installers require the registered whdload!
Cost: 20\$, 30 DM.

WHDload is a great command that is used by a big numbers of installers, the WHDload installed games are running very well from a standar WB. WHDload uses MMU for a perfect support of the 68060, JST do not..

1.6 The Warez world

The Warez world

Authors: Crimewatch UK; EMP; GalagaHD; Faction;
Style: Shareware via keyfile, save functions are disabled and some installers require the registered whdload!

You know what Warez is? right? it is the world of illegal amiga, guys swapping game for free...

There's some genius cracker swapping HD release of DiskGames...

Here's why They are listed here.

Of course, unlike Jst and Whd, warez are most of time full game patched.

1.12 About GlowIcons & NewIcons

About GlowIcons & NewIcons

The icons of this guide are designed in GlowIcon and have a poor MagicWB translation for the primates.

Wanna have a look at my Workbench Screen ??? You need the incredible VISAGE viewer

NewIcons is a incredible patch to render your Workbench icons really great. BUT some idiots didn't like the NewIcons "Icons", HOW CAN YOU SAY THAT?? Don't be stupid: NewIcons is first a wonderful PATCH and not an Icon collection

Anyway, for those that don't like the NewIcons collection, here is GlowIcon, just a NewIcon collection in 64 colours really beautiful.

And forget about MagicWorkbench, it's really too horrible.

PRICES:

NewIcons: FREE

GlowIcons: FREE

MagicWorkbench: NOT FREE

1.13 Get some FREE games to patch!!!

Get some FREE games to patch!!!

Incredible! now you can download free games with their HD patches!!!

Ghosts'N'Goblins -Complete game on the
JST homepage
itself!

Factor5

are free giving their game on the web, directly in UAE ADF format ↔

this is a file disk format similar to an non-compressed DMS, there's a lot of tools to use these as Dimage, Transadf, adf2fms, ITD(from the Whd dev pack)

...

BUT I don't understand how to use 4/6 ADFs gived in a incredible disk size...

BC Kid -What's this f*** ADF format???

RType -It RUNS with whd! be careful to remove the NTSC tooltype for PAL

Katakis -It runs with WHD

TURRICAN -What's this f*** ADF format???

TURRICAN2 -What's this f*** ADF format???
TURRICAN3 -What's this f*** ADF format???

1.14 Get a FREE Action Replay MKIII !!

Get a FREE Action Replay MKIII !!

AAhhhh WhdLoad & JST allow me to re-play my old games... when I played with my old Action Replay MKIII to get some infinite lifes, grab some pics and sounds of the games... and I cracked for the 1st time a game with it: Hired Guns and his fuc** protection...

You know what? WhdLoad AND JST are allowing to use a FREE action replay proggy !!! you don't need anything else that the progs!...

This proggy is HRTmon, the last versions are FREE, you can only find the last 2.25 version on the web homepage at:
<http://dumbo.cryogen.ch/hrtmon/index.html>

HRTmon runs exactly as the old MKIII, but with more stuff! (access to your HD!). But as it is pure software, some games don't allow to use it... BUT WhdLoad and JST are supporting HRTmon so any games installed with JST or WhdLoad will allow you to use the ActionReplay !

You need to tell them that you want to...

-In JST, put the tooltype FREEZEKEY=\$xx in every games icons or NEW in JST1.5, set the AmigaDos environnement variable. By using TEST in tooltype, you'll be able to see if HRTmon is detected in memory by JST.

-In WhdLoad, this is stranger, you need to get the Developer WhdLoad archive, to take the WhdLoad.prefs file and save it into your S:. Then, you need to edit it and turn on the FREEZEKEY=\$xx command to use it in every Whd games.

NOTE: \$xx must, of course, be changed by your wanted freezekey...

1.15 Powerguide

Powerguide

Multiview/Amigaguide are really slow, mmmhh?

This page is damned slow, mmmh??

Then, get an aminetCD, look at the little command AminetCD:tools/powerguide this is a really cool Multiview/Amigaguide replacement program that is really faster!!! and with a search feature!
