## The Most Heart Pounding 60 sec Puzzle Game!

Puchi Puchi Virus does not resemble an ordinary puzzle game. The usual “object drop” style has been replaced with a more intuitive system of “object linkage”. Its simple design and surprisingly in-depth game play can addict even the most demanding puzzle game enthusiasts.

### What’s going on!?

On a distant planet, a sudden outbreak of a laughable(?) virus has changed people’s lives forever. Now, Dr. Kevin, a specialist in anti-virus research and humanity’s last hope, must seek out and destroy the Puchi virus before it transforms everyone into lovable monsters!

Evil (?)Puchi Virus

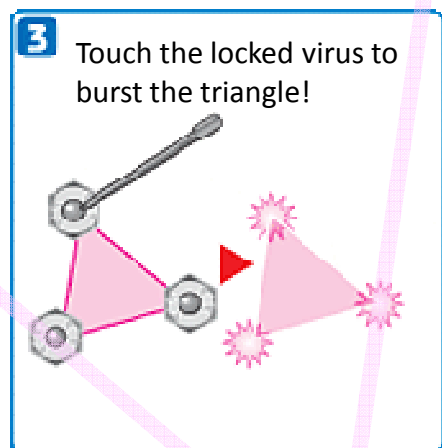

# HOW TO PLAY

The object is to form at least a single triangle formation by linking viruses together and erasing them from the screen. Victory conditions vary from mission to mission, but erasing all of the viruses will be the fundamental rule of this game. Erase all the viruses and you win, but if the screen gets filled with the emerging viruses, you lose.

Destroy viruses by surrounding them with a triangle formation.

## Just 3 Easy Steps!

# HOW TO PLAY

## Combo Moves with Chain Reactions!

By overlapping multiple triangles over each other and bursting them, you trigger a chain reaction of destruction that can multiply your score. The more chain reactions, the more points you gain, which can be used to gain useful "items".

The more chain reactions you make, the more points you earn. Save up your points to get items that can help you destroy more viruses.

Make a triangle.

Make another triangle over the other.

Touch the triangle again to burst it.

The first burst will cause the 2<sup>nd</sup> triangle to burst.

## So how many patients are there to treat?

There are over **100** different patients to treat with different criteria to beat the stage!

# VERSUS

Play against your friends with the wi-fi network capability of the Nintendo DS. You can customize battle rules and situations to your tastes.

# SHARE & DOWNLOAD

You can share a demo copy of Puchi Puchi Virus with your friends who have a Nintendo DS. They can either simply play on the versus mode or actually download a copy from your Puchi Puchi Virus card.
