IBM Product Sampler CD for PC Manufacturers

Welcome to some of the most entertaining, educational and productive software from IBM (including Lotus and Edmark).   Preview over 40 different titles (excluding media, language and operating system variations) which PC manufacturers and hardware vendors can include with systems supplied to consumers and small- to medium-sized businesses.

System requirements of this Sampler CD

Over 40 titles can be previewed from this CD.   Previewing may take the form of a digital video clip, a multimedia demonstration or not-for-sale evaluation code.   We recommend that you read the notes for each title prior to execution.

For your convenience the products have been grouped together into 5 main categories.   Each product appears in only one category and includes: a description, key features, system requirements (which may differ from those of this Sampler CD) plus language and operating system availability.

Partnering for Success

Everything today's OEMs demand
Leading products are not enough - we know from listening to our partners that OEMs want choice, flexibility, competitive prices and reliable, dedicated support. We provide all that and more.

Choice
The range is exceptional: Education, Creativity, Productivity, the Internet and Intranets - and of course Operating Systems too. Just imagine the convenience of a one-stop-shop for all the titles being supplied with your systems!

There are over 40 products to choose from and this does not include media, language and operating system variations for each of the titles. What's more the list is increasing almost weekly.

Flexibility
OEM requirements are a major consideration at IBM and so flexibility of approach to solve individual problems is assured. Software products can be preloaded, bundled with hardware or integrated into applications.

When packaging bundled products there are options for: ordinary, reduced or even specially designed packs.

In addition, IBM can provide the full retail version, or a full version that is encrypted or a time-locked trial version for evaluation purposes.

Demand Generation
IBM have invested heavily in world-wide brand advertising. A combination of business-to-business and consumer press, supported by on-going direct marketing campaigns and effective PR work have been employed to generate unprecedented demand for IBM products across the world.

Since IBM Simply Speaking topped the retail PC CD-ROM charts in 1997, IBM has introduced new products to the speech family and, driven by an integrated promotional campaign, it is no surprise that it continues to be the UK's No.1 best selling retail personal productivity software.

Support
At IBM there exists a comprehensive support organisation offering customers a broad range of programs and services. These include technical, customisation and marketing support as well as education.

Easy to do business with
IBM provides attractive business terms and conditions with:

- Contracts that are both simple to understand and administer
- Easy, clear, terms for licensing to client's hardware
- Attractive OEM price grids ranging from small quantities to large volume purchases.

System Requirements

System requirements of this Sampler CD:

- IBM or 100% PC compatible
- Windows 95 with multimedia
- Pentium Processor recommended
- 16MB RAM
- SVGA display (800 X 600 X 256 colours recommended)
- 16 bit sound card with headphones or speakers
- Double-speed CD-ROM drive
- Hard disk space varies depending on demo being installed

Worldbook Discoveries

A history of the world from the Big Bang to the present on CD-ROM, DVD and on-line.

Conceived and created with the very best   authors, historians, researches and illustrators. DISCOVERIES is the first history of the world on CD-ROM, DVD and on-line. DISCOVERIES rich graphics and soundtrack will stimulate the imagination of the entire family, taking them on a voyage - by period or by theme - through the great events which have shaped our civilisation from the Big Bang to the present. Developed with the latest, most innovative games technology, DISCOVERIES invites you to explore an extraordinary wealth of pictures, music, sound and words. The content is presented in a rich and enthralling kaleidoscope of images (authentic documents, paintings, historical reconstructions...), accompanied by text and unrivalled audio resources (music, sound effects, voice-overs...). Every screen arouses the user's curiosity and makes him or her want to know more about a particular subject, period or civilisation.

Exceptional Content
-3 GB of material on 5 CD-ROMs, based on the best-selling Gallimard-Larousse historical encyclopedia.
-text compiled by renowned writers: museum curators, historians, scientific researchers...
-more than 5,500 high-resolution illustrations from museums and art galleries: drawings, works of art, photographs.
-more than five and a half hours of high-quality sound, including original music and sound effects.
-more than 1,000 animations.
-an online updating facility; educational adventure games; historic sites to explore in virtual reality; downloading from the Internet.

Innovative Approach
-Travel through time and space in the Time Galleries
-browse through the Theme Gallery and experience a journey through time via a favourite subject area: art,religion, science and technology, transport, warfare, commerce...
-Navigate at leisure through the Time Screens, using the interactive drag - and - drop facility.
-Customise the interface and   navigation tools.
-Search for a feature or a picture by keyword.
-Place bookmarks and notes for quick reference.
-Copy, paste and print text and pictures.

System requirements
CD-ROM version

Minimum system requirements:
IBM compatible PC's: Pentium 120, Windows 95 or higher, 16MB of RAM, 60MB OF HARD DISK SPACE, 4 - speed CD-ROM drive, 1 MB video card compatible with Direct X, minimum resolution 800 x 600, sound card compatible with DirectX, 65,000 - colour screen, mouse, joystick (optional), speakers or headphones.

For optimum performance:
IBM compatible PC's: Pentium 166, Windows 95 or higher, 32MB of RAM, 60MB of hard disk space, 8-speed CD - ROM drive, 1 MB video card compatible with DirectX, minimum resolution 800 x 600, sound card compatible with DirectX, 65,000-colour screen, mouse, joystick (optional) speakers or headphones.

Return to CD Overview

IBM AntiVirus Desktop Edition

You're sitting at your home computer, opening the file that your business associate just sent you over the Internet. Suddenly, your computer starts behaving strangely. You wonder: Is your system infected by a virus? Did you just lose all your work?

Then, you relax. You remember that you have IBM AntiVirus installed.

We all know that computer viruses are a leading cause of data loss and downtime in today's PCs. Thousands are known to exist, and three new ones are discovered each day. They hide in program and data files, e-mail messages, macros...even diskette sectors that users can't see.

IBM AntiVirus offers a comprehensive and effective barrier between your PC and any virus that attempts to infect it, no matter what the source. It is today's premier anti-virus solution: designed and supported by IBM scientists whose expertise in anti-virus research is acknowledged worldwide.

Reliable, comprehensive, and technologically advanced, IBM AntiVirus is also exceptionally easy to use. Its clear graphical interface and simple, install-and-forget operation make state-of-the-art virus protection a true "no-brainer."

IBM AntiVirus is literally packed with features that make it easy to keep your PC virus-free. Its automatic scanning capabilities examine files, macros, e-mail and attachments, memory-resident programs, and files you download from the Internet and other online services. Other features include automatic installation, thorough system examination, heuristic analysis, neural network technology, file change detection, and regular virus updates. For an extra margin of safety, IBM AntiVirus also provides advanced false alarm elimination and full verification of a virus before disinfection.

Comprehensive
- Complete Internet protection: scans files, e-mail and attachments on access - works with any Web browser
- Detects more than 8,000 viruses of all kinds - polymorphic, stealth and macro viruses, including the Concept macro virus
- Bootable Emergency Diskette ensures clean system start-ups
- Flexible scheduler for automatic system scanning
- Automatically checks diskette boot sectors for viruses
- Free virus protection updates available online from IBM to detect and eliminate new viruses
- Built-in Activity Log records all actions performed by IBM AntiVirus
- Runs on Windows** 95, OS/2* Warp, Windows and DOS

Advanced
- Heuristic analysis aids detection of previously unknown viruses
- System Shield allows critical applications to run safely - even if infected - without risk of spreading the infection
- Patent-pending neural network technology to detect unknown boot sector viruses
- Optionally alerts user of suspicious virus-like activity
- Fast, accurate scanning performance

Reliable
- Advanced false alarm elimination technology reduces non-virus "scares"
- Definitively verifies suspected viruses before initiating disinfection procedures
- Removes most viruses automatically without damaging the underlying application program or data

Easy
- Comprehensive on-line documentation and help - with extensive virus descriptions - along with printed documentation
- Requires no virus expertise

- Consistent "look and feel" under Windows 95, OS/2, Windows and
- DOS - once you know one version, you know them all
- Lets you specify how often to scan for viruses .

System Requirements
Hardware:
- IBM PC, PS/2* or 100% compatible; 80386 or higher processor (80286 for DOS);
- 640 KB RAM (DOS & Windows);
- 4 MB disk space
Software:
- DOS: DOS version 3.3 or above
- Windows: DOS version 3.3 or above and Windows 3.1 or above
- OS/2: OS/2 version 2.0 or above (including Warp)
- Windows 95: Windows 95 version 1.0 or above

IBM AntiVirus Desktop Edition is available in the following languages:
English, French, Italian, German, and   Spanish.

IBM VoiceType Simply Speaking Gold

IBM, the leader in speech recognition software, proudly presents VoiceType Simply Speaking Gold, the newest, most advanced addition to our award-winning Simply Speaking family.

You Talk. It Types

Simply Speaking Gold is the high-function business version of the family and enables easy, fast and accurate creation of documents. It is ideal for letters, reports, proposals, e-mail and faxes. Simply Speaking Gold also supports voice commands for desktop navigation and application control, and allows direct dictation into any application.

Enjoy More Freedom With Simply Speaking Gold

IBM Simply Speaking Gold is the perfect solution for the business professional who would rather talk than type. It is easy to use, leaving your hands and eyes free to refer to source material while you create your text. It can increase your productivity by improving document turnaround and because it can run on a portable PC as well as a desktop PC, it is ideal for the mobile worker.

Key features

- Typical accuracy of 90% straight out of the box.
- The system learns as you use it, steadily increasing in accuracy to 97% or better.
- Recognises "discrete" speech (speaking with a slight pause between words) at speeds of 70-100 words per minute.
- Includes a vocabulary of 30,000 UK English words, with room for 27,000 additional words.
- Full audio playback of your dictation to aid correction.
- Control your desktop and applications by voice.
- Dictate directly into your favourite applications.
- Use single words to call in frequently-used phrases and standard paragraphs
- Make your corrections immediately, or later if more convenient
- Delegate your corrections, including the audio playback, to a colleague or secretary.
- Vocabulary expander to analyse your existing documents and help personalise the system for you.
- Dictation trainer to help you learn to use "discrete" speech.
- Specialised language models for the Legal, Healthcare, Pathology and Radiology professions.
- Compatible with Windows NT 4.0 as well as Windows 95.
- Includes 30 days free technical support
- Available in 6 languages - French, German, Italian, Spanish, UK and US English
- Supplied with high quality, noise-cancelling headset microphone

Minimum system requirements

System Requirements
 Blaster 16 100% compatible) or IBM Mwave*
36-46 MB hard disk space
Microsoft Windows 95 - OR Microsoft Windows NT 4.0

Return to CD Overview

IBM ViaVoice

For the user who wants the latest in speech recognition, ViaVoice offers the advantages of continuous speech - and more.

Discover continuous speech

The ultimate in time and energy-saving software, ViaVoice allows you to speak naturally to your computer. With its affordable price, it's a breakthrough for people who'd rather talk than type.

ViaVoice provides the following features to help you work better, smarter and faster:

Continuous speech for increased productivity.
Speak to your computer naturally, without pausing between words, at speeds of 140 words per minute. You will now be able to create documents more quickly than ever before.

Leading accuracy.
IBM's multi-patented technology provides industry- leading accuracy of approximately 90% straight out of the box, increasing with usage to around 95% - so you can spend more time creating and less time correcting text.

Context recognition.
ViaVoice uses context recognition to distinguish between similar sounding words and phrases - like there, their and they're.

Adaptable to the way you work.
As you use the system, ViaVoice learns your vocabulary and usage patterns. The more you use it, the more accurate it becomes.

Ease of use.
ViaVoice lets you speak with your hands and eyes free so that you can refer to notes or source material.

Audio playback.
Simply click on a word or block of text to play it back so that you can hear what you said, and to aid correction.

Large vocabulary.
Provides a base vocabulary of 30,000 UK English words to which you can add up to 34,000 to accommodate your own specialised words and names.

UK English spelling.
All words in the ViaVoice vocabulary are in UK English and include UK English names and places such as motorway, trousers, Leicester and Worcester - one less thing for you to worry about!

Dictation direct into Microsoft Word** (version 7 or 97).
Save precious time by speaking directly into this popular word processing program.

Work with any other applications.
Transfer your words automatically via the clipboard into other applications such as word processors, e-mail or fax.

Macros.
Use single words to generate standard phrases and paragraphs.

Vocabulary expander.
ViaVoice analyses existing documents and selects words for you to include in your vocabulary, thereby helping you to personalise the system.

Deferred correction.
Make corrections at a time convenient to you, or delegate them to a colleague.

Multiple users.
You can have several users registered on a single system.

Dictation trainer.
ViaVoice includes a training module to help you learn how to make best use of the system quickly and easily.

Microphone.
Includes a high-quality noise-cancelling headset microphone.

<u>Minimum requirements</u>
- Pentium** 166 MHz or 150 MHz with MMX
- 32 MB RAM for Windows** 95 -OR- 48 MB RAM for Windows NT 4.0
- CD ROM drive
- Sound Blaster** 16-bit audio board (Sound Blaster 16 100% compatible) or IBM Mwave*
- 120 MB hard disk space
- Microsoft Windows 95 -OR- Microsoft Windows NT 4.0.

<u>IBM ViaVoice is available in the following languages:</u>
UK English, US English, French, German, Italian and Spanish.

Internet page: http://www.software.ibm.com/is/voicetype/us_vv.html

<u>How to contact IBM</u>
<u>Return to CD Overview</u>

IBM ViaVoice Gold

New ViaVoice Gold is simply the best productivity tool you can add to your PC. It's ideal for business and professional users, home, school or college. ViaVoice will be available in U.S. English at software and computer stores in America before the end of November. ViaVoice Gold will be available in Europe in French, German, Spanish, Italian and UK English very early in 1998.

ViaVoice Gold for Business

Whether you're drafting a report, a presentation, a letter, or e-mail...ViaVoice Gold lets you work faster and more efficiently. Dictate directly into your favorite Windows application. Work "hands free" to refer to notes as you dictate. ViaVoice Gold spells correctly every time -- so there's no need to worry about spelling mistakes. Eliminate repetitive typing -- calling in standard paragraphs, phrases, form letters, addresses, etc., using simple commands. And, you can even have your mail read back to you while you sit back and relax!

ViaVoice Gold for Home

Draft letters, holiday gift lists, organisation newsletters -- all your personal and social correspondence -- with convenience and ease. Finish those chores you've been putting off....like online diaries, home inventories, and family histories. It's quick, simple and fun when you do it ViaVoice.

ViaVoice Gold for School

Without the restraints instead of typing on a keyboard, you can use your time thinking concentrate on your thought...checking research documents...collecting ideas -- while you simply dictate your text. Great for students and educators alike...takes the "work" out of homework...adds speed, accuracy, and professionalism. And the text-to-speech feature makes checking your work easy!

ViaVoice Gold uses continuous speech technology so you can speak naturally without pausing between words. With IBM ViaVoice Gold, you can do more work in less time!

Key Features

Continuous speech   -- increased productivity.

Speak to your computer without pausing between words. At speeds faster than that of most skilled typists, you can create documents more quickly than ever before. ViaVoice Gold automatically spells each word correctly, so there's no need to spend time looking for spelling mistakes.

Dictate directly into your applications.

Save precious time by speaking directly into most popular word processing programs. No need to cut and paste...dictate right into your application.

No initial training required.

No initial enrollment is necessary (use ViaVoice Gold right out of the box). Just spend a few minutes with the User Wizard to learn how to dictate, and you're off and running.

Adapts to the way you work.

As you use the systems, it learns your vocabulary and usage patterns. The more you use the system, the more accurate it becomes. You can have any number of users and guests on a single system.

Shortcuts.

Use a key word to automatically trigger commonly used phrases, paragraphs, or pages. By simply dictating "thank you" the entiretext of a thank you letter can appear on your screen.

Accuracy

IBM'S multi-patented industry - leading technology means you can spend less time correcting and more time creating.

Command and Control.

Use your voice instead of your mouse and task bar to navigate your way around the desktop. Command your favourite applications to print documents by saying "print".

Context recognition.

ViaVoice Gold uses context to distinguish between similar sounding words and phrases (for example; there, their and they're)

Text Speech.

Listen to your own documents or imported documents. In a rush? Let ViaVoice Gold read aloud your e-mail as you prepare   for that important meeting. Or, just give your tired eyes a rest.

Large Vocabulary.

The base vocabulary of 22,000 words can be expanded to 64,000 words to accommodate your own personal preferences. ViaVoice Gold also provides a 260,000 word back-up dictionary.

Expand your Vocabulary.

ViaVoice Gold analyses text documents for new unique words with the option of adding and adds them to your vocabulary. This is a quick and easy way to customise ViaVoice Gold with the words used most often.

Ease of Correction.

ViaVoice Gold allows you to complete your thought and make corrections at a convenient time or defer the corrections to a colleague. Simply click on a word to play back that word. Includes noise-canceling headset microphone.

What You'll Need To Run ViaVoice Gold:

Windows 95 or Windows NT 4.0
Recommended processor equivalent to Intel Pentium 150mhz with MMX or faster.
32 MB RAM for Windows 95, 48MB RAM for Windows NT 4.0
125MB available hard disk space.
Creative Labs Sound Blaster 16 or 100%compatible, or Mwave audio system.
CD-ROM drive.
Some laptops and sound cards may require a microphone battery adapter. Information on how to determine the requirement and where to purchase this part is contained in the ViaVoice Gold package.

IBM ViaVoice Gold is available in the following languages:

UK English, US English, French, German, Italian and Spanish

Lotus SmartSuite 97

Lotus SmartSuite 97 is the best suite for today's connected world.   Containing six full-featured, and easy to use applications - Lotus 1-2-3, Lotus Word Pro, Lotus Approach, Lotus Freelance Graphics, Lotus Organiser and Lotus ScreenCam - SmartSuite 97 gives you the most direct way to work with words, numbers, objects and images.

Key features include:

- Customisable SmartCenter - help you to store, organise and launch your projects, applications, reference materials and Internet connections.
- Lotus Infobox - find the tools you need to format text, numbers or objects in any document - in one place.
- Customisable SmartMasters - customisable templates that suggest looks, styles and content-rich outlines for everyday business documents.
- Intelligent Help - get step-by-step guidance on mail merge, creating macros, launching a TeamReview and more with Lotus Assistants.
- Share Over the Internet/Intranet - browse directories and open and save files on an Internet server from within familiar 1-2-3, Word Pro, Approach and Freelance Graphics.
- Publish to the Web - publish documents to the Web and create professional home pages fast - without leaving your familiar word processor and without knowing HTML
- Internet Searching and Linking - highlight a word or phase in your document and click on the Internet SmartIcons to automatically search the Web.   Include URLs as live links in documents.
- SmartCenter Internet Drawers - get live access to news, weather, stock prices and more on the Web.
- Team Review - electronically distribute draft documents, spreadsheets, presentations or database forms for feedback.
- TeamConsolidate - in 1-2-3 and Word Pro, consolidate multiple edited versions into a single document.
- TeamMail - send messages and documents directly from SmartSuite 97 using any VIM- or MAPI-compliant e-mail package, such as Lotus Notes ccMail or Lotus Notes Route or broadcast information.
- Take Your Schedule To Go - Lotus Organiser integrates Calendar, TO DO List, Planner, Address Book, Call Manager, Notepad and Anniversary Reminder, and allows mobile users to merge laptop file updates with files on the office LAN, or print in over 25 layouts that fit popular databases.
- ScreenCam for TeamWork - Use ScreenCam "movies" to demonstrate software products software products or convey news, policies, procedures and more to a wide audience.

System Requirements:
- 80486 50MHz PC or higher
- VGA adapter and monitor
- CD-ROM drive or 3.5" high-density disk drive
- Microsoft Windows 95 or Microsoft Windows NT 4.0
- Windows 95: 8MB RAM minimum, 12MB or more recommended for running more than one application
- 16MB RAM minimum for Windows NT 4.0
- 75MB available hard disk space
 - Can run applications from the CD-ROM drive

Lotus SmartSuite 97 is available in the following languages:

International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Lotus Freelance Graphics 97

Overview

Lotus Freelance Graphics 97 Edition for Windows 95 transforms presentation graphics into an everyday visual communications tool for individuals and teams. Freelance Graphics gives users a faster, easier way to develop plans, reports and proposals by helping them organise and summarise their ideas, while at the same time providing a visually compelling document. Freelance gives users the best start-to-finish process with valuable content suggestions, tools for outlining and diagramming, and a wide variety of animations for adding pizzazz to presentations.

Key Features and Benefits

Productivity

Freelance 97 provides automation and control over documents by allowing users the freedom to change templates, edit speaker notes on-the-fly, and manipulate views to suit their needs and audiences.

SmartMasters add both style and content to presentations. Freelance Graphics 97 includes 14 new SmartMasters in addition to the 120 found in Freelance Graphics 96, allowing users to add a fresh look to new or old presentations with ease.

ScreenShow enhancements include the ability to edit speaker notes from within the screen show. ScreenShow also supports links to user-defined URL's on the World Wide Web.

Outliner View is used to add, edit, move and format text in a presentation. As the user adds text to a page, the page thumbnail is also updated to show how the presentation looks as it is worked on.

Internet Capabilities

The Internet capabilities in Freelance 97 are expanded from those in Freelance 96 to enable users to publish presentations to the Web quickly and easily.

Publish to the Internet allows users to Open and Save files directly to an Internet site. Web users can easily view Freelance Graphics presentations live on the Internet by using any Web browser or downloading to their PC for full screenshow viewing.

HTML Publishing capabilities are greatly enhanced and provide expanded support that allows for a table of contents with links to each page of a presentation, and the ability to append speaker notes below each page for presentations viewed on the World Wide Web.

ScreenShow "Jump to URL" provides powerful and integrated direct access to a URL from within a presentation.

Connectivity

Freelance 97 takes advantage of Lotus' latest team computing technology, allowing for easy collaboration on documents and the ability for users to view presentations from remote locations via LANs, WANs, and the Internet/intranet.

TeamReview now allows multiple authors to collaborate on a presentation and supports Notes R4 databases. Users can use an automated, on-line process that streamlines the manual task of reviewing and editing presentations, and encourages collaboration among team members. Simple and accessible mark-up tools allow presentation reviewers to make edits or suggestions electronically, and presentation authors to quickly and easily incorporate them.

TeamShow includes added support for multiple points of display. Using the presentation delivery and collaboration tool, users can lead a number of remote audiences through a Freelance Graphics screenshow, cutting down on travel

time and expense.

Customization
With Freelance 97, users and developers can program a variety of options in order to customize the software to their specific organisational needs and build powerful custom business solutions.

Freelance script interface offers improved integrated script development through LotusScript, with more objects as well as enhanced OLE automation. LotusScript is an object-oriented BASIC scripting language that enables users to easily customise Freelance Graphics for specific business processes, and is common across the Lotus desktop applications.

Shared user interface components and cross-application tools help users easily share data and functionality with other Lotus products including Lotus Notes.

Windows 95 integration allows this 32-bit application to fully exploit Windows 95 by incorporating long file names, drag and drop, tabbed dialog boxes, OLE 2.0 and more.

Estimated System Requirements
Freelance Graphics 97 Edition for Windows 95 or Windows NT requires a 486 or higher IBM, Compaq or compatible PC, with Windows 95 or Windows NT Version 3.51 or later operating system. A VGA or higher resolution video adapter (SVGA 256-Color) is also recommended. A minimum of 8MB of RAM is required, along with approximately 18MB of hard disk space for minimum installation and 40MB for default installation. Additional space is required for the installation of optional features.

Lotus Freelance Graphics 97 is available in the following languages:
International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Lotus 123 97

Overview
Lotus 1-2-3 97 Edition for Windows 95 and NT is a completely rearchitected 32-bit spreadsheet. 1-2-3 97 delivers new easy-to-use tools to help users complete everyday tasks quickly and easily. It gives users everything they need to find, publish and share information across the Internet and intranets right from within 1-2-3. Users can collaborate with colleagues on work in progress, and quickly access and use information from a wide range of sources. 1-2-3 97 delivers powerful, built-in tools for automating tasks and building custom business solutions.

Key Features and Benefits

Productivity
1-2-3 meets users' number one requirement for tools that allow them to get the job done quickly and more efficiently. New and enhanced productivity features in 1-2-3 97 include:

1-2-3 AutoTotal makes adding a series of numbers as easy as typing the word "Total," automating the most widely used spreadsheet function.

Lotus InfoBox is a task-sensitive tool that gives users information about any object selection and lets them quickly and easily change the selection's properties. All editing is dynamic to give users instant feedback on their choices.

Dynamic Print Preview lets users simultaneously edit and preview their worksheet. With this "live" preview, users instantly see the effect of changes they make in the print range of their worksheet before they print.

Outlining gives users the option to quickly summarise worksheet data into outline format. Now users can hide much of the detail of a worksheet to provide a concise, visual top-line summary of their work, which they can print just like any 1-2-3 worksheet.

SmartMasters are pre-designed business forms that give users a head start on completing common business tasks such as budgeting or tracking their time. Completely redesigned from 1-2-3 Release 5, SmartMasters now incorporate many 1-2-3 97 features, such as LotusScript, the improved Version Manager and Team Mail. These customizable SmartMasters also provide a starting point for users who want to build their own easy-to-use applications.

Lotus Chart simplifies creating even the most complex charts. As it is a shared component in SmartSuite, users enjoy consistent charting and more seamless integration between 1-2-3 and other SmartSuite applications. Lotus Chart delivers one-step intelligent charting, making it easy for users to create custom charts; a range of new chart types including 3-D Bar, 3-D Line, 3-D Area, multiple pie types, Tabular and Donut; and improved editing, formatting and manipulation of all chart elements.

Maps are now easier to use, more customisable and better integrated with 1-2-3. Users can now select, format or rearrange any part of a map, including titles and legends directly from within the worksheet. And map creation is now three times faster than in 1-2-3 Release 5.

Worksheet Titles can now be set in just one quick step. Users can modify the size or content of worksheet titles by simply clicking and dragging from inside the worksheet frame to the row or column where the title should end.

Full exploitation of Windows 95 and NT means users enjoy all the benefits of advanced operating systems, including 32-bit performance and enhanced memory management, the Windows 95 look and feel, support for long file names and UNC paths, and advanced OLE 2 automation.

1-2-3 and SmartSuite Applications are designed to work together seamlessly to make it easy for users to complete

common cross-application tasks. All 32-bit SmartSuite applications share the same user interface elements, as well as common tools such as Lotus Chart, the Approach database engine and SmartCenter.

1-2-3 and Lotus Approach now work better together to give users all the database power of Approach in 1-2-3. Users can quickly and seamlessly access all of the powerful, traditional database functionality of Approach to conduct data queries, create forms, mailing labels, dynamic crosstabs, and reports directly within 1-2-3.

Internet Capabilities

First introduced in SmartSuite 96, Lotus' Internet/intranet innovations help users find, publish and share relevant on-line information quickly and easily. 1-2-3 offers new and expanded collaborative computing features and enhancements built right into the product, that make the Internet a practical, useful   even essential   part of completing everyday work.

Internet SmartIcon Palette provides direct access from within 1-2-3 to the Lotus Home Page, Lotus Customer Support Home Page and Lotus FTP Server to helps users find the online information they need with a single click. From within 1-2-3, and without needing to know a URL, users can access the latest support information, scan product offerings or download software updates, using any popular Web browser.

Open & Save to the Internet lets users open and save files directly to and from any Web or FTP server directly from the 1-2-3 File menu to provide seamless access to spreadsheet data from anywhere in the world. And with LotusScript, users can even build their own customized solutions for updating their work in 1-2-3 with on-line information.

Search the Internet performs a complete Web search and returns search results in the user's browser. To activate a search, the user simply highlights the cell containing the text to search for, and clicks the "Search the Internet" SmartIcon.

1-2-3 Publishing on the Internet lets users easily publish spreadsheet ranges or create HTML tables directly from a 1-2-3 worksheet for sharing across the Internet. It spares users the need to know HTML and eliminates errors associated with coding HTML tables.

Connectivity

1-2-3 97 takes advantage of Lotus' team computing technologies, now extended to the Internet, to let users share and collaborate with each other across a broad range of platforms, locations and work situations. With its unmatched collaboration tools, 1-2-3 helps users efficiently complete joint projects and deliver timely information to colleagues anywhere in the world.

Version Manager now offers a completely redesigned user interface to make it easier than ever for users to create, navigate through and manage multiple spreadsheet versions. A Lotus Assistant will walk users through the process of creating versions step by step. Users can mix and match different range versions to create version groups, automatically track who created the version and when, and version authors can add comments on their work.

TeamReview streamlines and automates the manual task of distributing, reviewing and editing spreadsheet files or ranges. It offers an easy-to-use process and simple, accessible markup tools to let reviewers make their edits or suggestions electronically. TeamReview supports a range of communications infrastructures, including LANs, WANs, e-mail, and Lotus Notes.

TeamConsolidate is a full-featured tool that uses a combination of 1-2-3 and Lotus Notes database and workflow technologies to simplify working with multiple edited versions of a spreadsheet or range. TeamConsolidate leverages a Notes database to let users easily distribute data to co-workers, collect the resulting updates, and automatically consolidate them into a single manageable document.

TeamMail lets users send data and messages to a group of people simultaneously, or route them to individuals in a sequence, over e-mail. With 1-2-3 97 users can send an entire workbook or a simple message to coworkers directly from within 1-2-3 using any VIM-, CMC- or MAPI-compliant e-mailpackage or Lotus Notes.

Open & Save to Notes extends the vast store of Lotus Notes data to 1-2-3 users by letting them easily open and save documents directly to or from a Lotus Notes database from the 1-2-3 File menu.

NotesFlow is a collection of powerful workflow tools and technologies in Notes Release 4 with which application developers can build customised workflow applications that tightly integrate 1-2-3 into Notes applications.

Notes/FX, or Field Exchange, is a NotesFlow tool that uses OLE 2 technology to enable the bi-directional transfer of data between Notes and 1-2-3 97. Notes/FX 2.0 lets users automate essential business applications by integrating data seamlessly to and from Notes.

Access to Information from Anywhere
Spreadsheet users increasingly need fast, easy access to information from a variety of sources in arrange of formats. To meet this requirement, 1-2-3 offers users the easiest access to information from corporate databases, the Internet/intranet, line-of-business applications such as SAP, Reuters and Peoplesoft, as well as many PC software applications.

High Performance Data Access, with Approach acting as a database engine for 1-2-3, lets users seamlessly access, manipulate and report on business information stored in many file formats, including dBASE, Paradox, FoxPro and SQL, with native speed and functionality.

Internet Access, through easy-to-use features such as Open & Save to the Internet, lets 1-2-3 users easily access information from the Internet and intranets and incorporate it seamlessly into their work.

Standard File Format Support makes sharing electronic data across a very broad range of file formats easy and seamless. 1-2-3 now has the ability to read in HTML, as well as file formats from earlier 1-2-3, Excel and Quattro Pro versions.

Customisability
1-2-3 now gives users and application developers a complete set of built-in tools for customising the Suite to meet their unique requirements and building powerful, integrated business solutions.
1-2-3 Macros make it easy for users to capture keystrokes and actions and automate frequent tasks. And 1-2-3 97 preserves users' time and work investment by providing support for macros created in earlier 1-2-3 versions.

LotusScript is a powerful, flexible, Visual BASIC programming language common across 1-2-3 97, SmartSuite 97 and all Lotus applications for Windows 95. LotusScript lets power users and developers rapidly build powerful custom applications, automate data management tasks, control work flow and modify the appearance of applications.

Integrated Development Environment (IDE) brings together LotusScript, Object Browser, Dialog Editor, Script Editor and Debugger for writing new or custom applications quickly.

Object Browser provides a place to scan and select all OLE objects and associated properties available to a scripting project. Users can copy and paste selections into Dialog or Script Editors.

Dialog Editor automatically completes related expressions from programming elements for quick and easy design of dialogs.

Script Editor helps users write code by automatically entering an expression. It helps ensure programs are written correctly by verifying proper nesting of code and balance expressions.

Debugger provides a step-by-step view of program execution, with onscreen feedback of programming variable to ensure execution of scripts.

Estimated System Requirements

1-2-3 97 Edition for Windows 95 and Windows NT requires an IBM PC or compatible (486 50Mhz orhigher) running Windows 95 or Microsoft Windows NT 4.0, and a Microsoft Windows compatible video adapter (VGA or higher resolution) and monitor. A minimum of 8MB of RAM is required (12MB recommended when running more than one application) for Windows 95. A minimum of 16MB of RAM is required for Windows NT 4.0.

Lotus 1-2-3 97 is available in the following languages:
International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Return to CD Overview

Lotus Organiser 97

Overview

Lotus Organiser is the award-winning personal and group scheduler with more than 6 million users worldwide. Since its first release in 1992, Organizer has become the best-selling personal information manager (PIM) and leading personal and group scheduler.

Organiser utilizes the familiar daybook-style user interface to help users manage their time as well as their everyday tasks, such as keeping track of appointments, to do lists, pending phone calls and other contact information. With Organiser, users can access, manipulate and utilise key information quickly and efficiently.

Key Features and Benefits

Productivity

By utilising the familiar organiser metaphor, Organiser 97 provides users with the capabilities to manage their time and important information easily and efficiently. Customer-requested enhancements added to improve productivity include:

Flexible time management enhancements to Organiser's Calendar provide a daily view with appointments displayed as blocks of time in a graphical format. Duration is immediately visible and can be changed via drag and drop.

Calls section allows for the categorisation of calls as tasks, which will automatically roll over to the next day until the calls are completed.

Full OLE and text formatting capabilities in Organiser's Notepad allows users to link or embed OLE objects such as spreadsheets, word-processing documents, presentations, metafiles, etc., on Notepad pages for in-place editing, simplifying the process of staying organised. The Notepad section also supports rich text formatting, so users can format text with bold, italic, underline, font size and type, as well as colour.

Organizer Tour provides an interactive on-line tour of the features and enhancements in Organiser 97.

Internet Capabilities

Organiser 97 provides access to the Internet several ways. Users can utilise relevant on-line information to help stay organised.

World Wide Web SmartIcons in Organiser 97 allow users to access the Lotus Organiser support Web site.

World Wide Web sites can be launched from Organiser's Notepad section.

Connectivity

Advanced technologies incorporated into Organiser 97 increase the way users can stay connected.

Telephony API (TAPI) support means easier and more streamlined autodialing capabilities for the Calls and Address sections.

International address support for label and envelope printing accommodates 25 international address formats.

ALMANAC file   This file contains useful reference information, such as holidays, 800 numbers and time management tips.

Estimated System Requirements
System requirements for Organiser 97 Edition for Windows 95 and NT are an IBM PC or compatible (486 or higher, 486 50Mhz) running Windows 95 or Microsoft Windows NT 4.0, and a Microsoft Windows compatible video adapter (VGA or higher resolution) and monitor. For Windows 95, 15MB minimum hard disk storage and a minimum of 8MB of RAM is required (16MB recommended). Lotus Organiser 97 is network-ready and runs on the most popular network operating systems including Novell NetWare 3.X and 4.X, IBM LAN Server and other 100-percent MS-Network compatible operating systems. A mouse or pointing device and Web browser are optional.

Lotus Organizer 97 is available in the following languages:
International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

How to contact IBM
Return to CD Overview

Lotus Word Pro 97

Overview

Lotus Word Pro 97 Edition for Windows 95 and NT increases productivity for end users through increased speed and lower file space requirements, and provides them with direct connections to the Internet/intranet. Word Pro 97 enables users to create, publish and manage Internet documents, and fully supports HTML. In addition, Word Pro 97 goes beyond the realm of word processors to offer users robust Team Computing and desktop publishing features, and provide developers with more customisation options to create specific business solutions.

Key Features and Benefits

Productivity

Word Pro 97 provides advancements in word processing productivity with increased speed, less systems resources and a range of formatting and help tools that make it extremely easy for personal or business users to accomplish tasks efficiently and quickly.

Performance enhancements in Word Pro 97 include increased program speed, giving the software more usability.

SmartFormatting provides desktop publishing capabilities through new ways to print booklets, link frames, insert symbols and create watermarks.

SmartControls such as Divider Tabs, Page Sorter and special document views enable users to easily organize and navigate large documents.

Lotus SmartSense technology provides a task-sensitive user interface, enabling the user to perform live edits using the Lotus InfoBox.

Word Pro SwitchKits teach users how to complete tasks in Word Pro 97 based on their knowledge of existing word processors. Word Pro 97 also includes enhancements to all of its word processing filters.

Internet Capabilities

Word Pro connects users directly to the Internet. Features include tools and templates to publish documents to the Internet/intranet, plus HTML and Java support.

Lotus Word Pro Web Page Publisher provides users all the tools needed to create and publish Internet documents. Users can create and edit documents in a fully WYSIWYG view without knowing HTML tags and code.

Open & Save to Internet connects users directly to the Internet, allowing them to open and save HTML documents from Internet sites without leaving Word Pro.

Home Page SmartMasters are templates for designing personal and business Web pages that provide users a choice of page design, fonts, graphics, wallpaper and background colour.

HTML Filter Enhancements support the creation and editing of HTML documents including HTML2.0 and 3.0 extensions, tables, graphics and wallpaper. Users can easily convert existing Word Pro and competitive word processing documents to HTML file format.

Embed Java Applications Word Pro 97 supports embedded Java applications, enabling users to add automation to their home pages.

Connectivity

Word Pro 97 adds tighter integration with Lotus Notes to its Team Computing technologies, and allows for communication, collaboration and co-ordination of ideas among groups of people connected via LANs, WANs, e-mail, groupware and the Internet/intranet.

Open & Save to Lotus Notes through Word Pro's unique capabilities that enable users to easily transfer documents between Word Pro and Notes and to use Notes as a document manager for Word Pro documents.

TeamReview allows users to collaborate on documents by providing an automated process for review, editing and distribution through Lotus Notes, the Internet LANs, WANs or floppy disk.

TeamConsolidate incorporates edits from multiple users electronically into one document, shortening the editing process of collaborative documents.

Document Versioning technology enables users to easily manage and share documents by storing all edits made to a document in a single file while protecting the original contents.

Team Editing Tools such as the Highlighter and Comment Notes save reviewers time in the editing process.

Customization
New features provide for increased customisability in Word Pro 97.

LotusScript is an object-oriented scripting language that enables developers to efficiently customise Word Pro 97 for specific business solutions. In addition, the Lotus Common Dialog Editor is included across Lotus SmartSuite.

Integration of Lotus Components allows users to drag and drop components from the icon palette, provided the users have the components installed on their PC's.

Notes Flow Support allows developers to customise workflow applications by adding an action menu to both Lotus Notes and Word Pro.

Estimated System Requirements
Word Pro 97 Edition for Windows 95 or Windows NT requires a 486 or higher IBM, Compaq or compatible PC, with Windows 95 or Windows NT Version 3.51 or later operating system. An estimated minimum 8MB of RAM is required, while 16MB of RAM is recommended for use in conjunction with other desktop applications. Approximately 30MB of hard-disk space for minimum installation and 35MB for default installation is required. Additional space is required for the installation of optional features.

Lotus Word Pro 97 is available in the following languages:
International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Return to CD Overview

Lotus Approach 97

Overview

Lotus Approach is the award-winning relational database that provides an easy way to query, report on and analyse data. Renowned for its unique combination of power and ease of use, Approach lets everyone on the business team track, manage and analyse business information, regardless of where the information is stored. Approach provides seamless connectivity to all popular database formats, including dBASE, Paradox, DB2, Lotus Notes, Oracle, and other SQL sources. Sophisticated team computing features maximise the sharing of information within the organisation.

Approach 97 Edition for Windows 95 and Windows NT builds on the tradition of superior usability, yet reflects the new ways that people work today. It provides greater functionality for users of shared corporate data, and unparalleled support for IBM DB2. It also features built-in Internet/intranet capabilities that let users easily leverage their Approach applications on the Web, without needing to learn HTML. It even contains tools to help users take advantage of LotusScript and macro programming, without writing a single line of code.

By applying its trademark ease of use to the challenges that people face today, Approach 97 is truly the best database for today's connected world.

Key Features and Benefits

Database Connectivity and Support
Approach 97 provides enhanced connectivity to all of the information within the organisation, regardless of its file format or where it is stored.

High performance heterogeneous data connectivity. Leverage all your information resources by directly querying, updating and manipulating virtually any type of data, including dBASE, DB2, Lotus Notes, Oracle, SQL Server, Paradox, 1-2-3 and more.

DB2 Query Management Facility (QMF) support. Preserve your investment in QMF (Query Management Facility) by automatically converting QMF queries and procedures to Approach forms and reports.

DB2 Binary Large Object (BLOB) support. Build sophisticated, multimedia applications that can manipulate binary large objects such as pictures, sounds, and OLE objects stored in DB2 databases.

Full transactional database support. Create DB2 transactions that can be controlled from within an Approach application.

SQL Assistant. Maximise performance when working with large SQL tables by selecting only the rows and columns needed. The Assistant guides you step-by-step, and lets you modify the automatically-generated SQL results if desired.

Pass-through SQL. Unlock the full power of SQL by passing any SQL statement directly to the back end database. Leverage existing routines by calling stored procedures from within Approach.

Dramatic SQL speed enhancements. Approach 97 takes greater advantage of the processing power of your server to conduct queries, find duplicates, open SQL tables, optimise joins and more.

SQL back-end error message support. Save time troubleshooting SQL data problems by viewing actual SQL

back-end error messages.

Notes R4 PowerKey. Experience fast, direct access to Notes data, without any assistance from computer support staff. Create reports, forms, worksheets, mailings and analyses that help you get much more value out of your Notes data. Combine information stored in Notes with data stored in virtually any database format. View and update data based on access privileges.

Productivity

Approach's highly-acclaimed user interface and rich feature set maximise productivity and enable users of all levels to be proficient quickly.

Default application creation. Be productive with your data immediately, and without assistance from IS/IT. When you open a data file, Approach automatically creates a default, customisable form and worksheet to get you off to a quick start.

SmartMaster Applications. Reduce time needed to generate complete, custom solutions by using or customising SmartMaster Applications that include multiple database files, relational joins, and professional layouts. Apply relational power to real business problems such as contact management, order entry, employee tracking and more.

Action Bar. Find the commands most frequently used right at your fingertips. Reduce time spent learning menu options and icons as Action Bar text prompts clearly present the most commonly used database controls.

InfoBox. Easily modify objects with this compact palette that floats above your work, and lets you view changes as they are made. Quickly apply fonts, lines, colours, macros, label names, field order, input formatting, radio button controls, and much more. InfoBox is context-sensitive and changes
according to the object selected.

Find Assistant. Create and store complex queries easily with step-by-step assistance. Search using wildcards, ranges, functions, case sensitivity, and global "sounds like" criteria. Conduct specialised, pre-programmed queries such as find top/lowest value, find duplicates, and find unique values. Even locate data based on filtered lists. Name queries and save for future use.

PowerClick Reportwriter. Generate professional reports with unprecedented ease and accuracy. Only Approach offers true WYSIWYG report design, that lets you see exactly how the data will appear in print as you work. Group records by partial field values, such as the first 3 characters of a text field, or the month from a date field. Generate totals, averages, counts, minimums, maximums, variance and more with simple mouse clicks. Even create cumulative summaries with ease.

Dynamic Crosstabs. Enhance decision making by performing sophisticated data analyses quickly and easily. Simply drag and drop fields to define the desired crosstab. Choose to display the sum, count, average, standard deviation, minimum, maximum or variance of any cell, row or column.

Charting facilities. Present data in compelling formats with a single mouse click. Choose from more than 120 different styles to produce dramatic looking charts with multiple data sets and multiple series on an axis.

Drill-Down to data. Drill-down on a section of a chart, such as a pie slice, to instantly see the detailed data behind the summary. Specify how you want to display the data   whether in a form, report or worksheet.

Internet Capabilities

Approach 97 lets users take full advantage of both the Web and their Approach applications by providing new integration features that leverage the strengths of both environments.

Build an interactive Web site. In conjunction with IBM's DB2WWW or Net.Data, Approach helps DB2 users literally put their business on the Web. Approach automatically generates the interactive HTML pages that let users query and report on live DB2 data using their favorite Web browser.

Save As . . . to the Internet/intranet. Open and save entire Approach applications as a compact file on the Internet or intranet, providing a fast, efficient way to distribute applications to remote users.

Publish to the Internet/intranet. Put your Approach forms and reports to work for you on the Web   all with a single click, and without having to learn HTML.

Web site database. Quickly and easily catalogue your favourite Web sites using descriptive keywords that are meaningful to you; then locate sites quickly, and visit them with a single click.

Internet SmartIcon palette. Take advantage of a variety of single-click access paths to the Internet from within Approach. Instantly visit a Web site based on words or phrases highlighted in an Approach application, go straight to the Lotus Customer Support Web site, or quickly search the SmartSuite Knowledge database for answers.

Customization

Approach 97 is as powerful as it is friendly, offering a variety of options for customising and building sophisticated business solutions.

Automated LotusScript and Approach macro generation. Save time generating scripts and macros with the new script and macro recorder. Build scripts and macros visually by simply turning on the recorder and then performing the actions to be automated. Approach will automatically generate the LotusScript or macro code by recording your keystrokes and mouse clicks.

LotusScript programmability. Create sophisticated, custom applications using an object-oriented BASIC-compatible scripting language. Scripts are created from within an Interactive Development Environment (IDE) that features an Object Browser, Debugger, and Program Editor for fast, accurate application development.

Object Linking and Embedding (OLE). Seamlessly share data with other OLE 2.0 applications. Approach serves as either an OLE 2.0 server or container and includes full support for OLE 2.0 visual editing, as well as bubble help for OLE custom controls (OCX).

Collaboration

Approach 97 provides sophisticated, team computing features that let everyone on the team share and communicate results quickly and effectively. Users benefit not only from their own efforts, but from the efforts of others as well.

TeamMail. Share the results of your work by sending or routing Approach information using any VIM-or MAPI-compliant e-mail system.

NotesFlow. Develop robust workflow applications that leverage Notes development efforts from within Approach.

Team Security. Protect your data by assigning passwords and controlling data access rights. Ensures integrity and confidentiality of shared data.

Estimated System Requirements

Lotus Approach 97 Edition for Windows 95 or Windows NT requires a properly configured Windows 95machine with at least 8MB of RAM and a hard disk with at least 20MB for a minimal installation.

Lotus Approach 97 is available in the following languages:

International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Lotus ScreenCam 97

Overview
Lotus ScreenCam 97 for Windows 95 is a fast, easy and inexpensive way to show audiences what you mean when you can't be there in person. ScreenCam virtually turns a PC into a VCR that records every click, scroll and action on its screen. Plus users can add captions and the sound of their voice. Combine up to 20 movie segments to create movies describing the latest proposal, product demonstration or on-line tutorial. Create instant PC movies, and share them with others without the high cost of authoring products. Viewers can play movies back, even if they don't have ScreenCam installed.

Key Features and Benefits
Windows 95 integration   ScreenCam 97 support files names of up to 256 characters, full Windows 95 shell integration, Quick View, 32-bit application support, tabbed dialogues and more.

Internet   A few simple keystrokes configures a user's Web browser to automatically play ScreenCam movies when the ScreenCam icon is clicked from a Web page.

Pause   Movie designers can plan movies in logical, smaller length segments, record them, and then append them together seamlessly, eliminating the need to re-record the entire movie to improve only a small portion of it. The Jump to Segment button allows you to navigate quickly to a particular location in a movie.

Captions   Content, format and attributes for captions are easily created and incorporated to a ScreenCam screen track, for movies that do not use sound. Assign hot keys to recall captions to the proper place in a screen track.

Preferences   Improve the final "cut" of your ScreenCam movies in advance, by choosing preferences for a movie that control cropping, font fidelity between the system a movie is recorded on, and the one it is played back on.

Thumbnails   Generate thumbnails automatically for movies created using any version of ScreenCam; generate thumbnails for colour depths greater than 256 colours.

Manage Movies   Visual graphics display screen track and soundtrack size, and the potential compression results, to better manage the disk space needed for ScreenCam movies.

 Movie descriptors include the name of the person and company who originally created the movie, as well as the current user information and statistics about movie segment size.
 Movie size and file size offer additional information for better disk-space utilisation.
 A temporary directory for ScreenCam movies is user selectable.

Estimated System Requirements
Systems requirements for ScreenCam 97 are IBM or compatible PC certified for use with MS Windows 95. VGA 16-color or higher graphics adapter and monitor. Parallel port or sound card-enabled device supported by Windows 95, speaker(s) or headphones, microphone and mouse. 10MB free space is recommended for recording. Please Note: You can distribute the ScreenCam player and ScreenCam movies free of charge. However, you are not permitted to copy the ScreenCam recorder.

Lotus ScreenCam 97 is available in the following languages:
Internation English, French, German, Italian, Spanish, Chinese, Portugese, Brazilian and Korean.

Lotus Mail

Get your mail easily and reliably over a local call - whether you're in the office or on the road, at home or abroad.   Send file attachments without worrying whether they'll go through.   Use Lotus Mail to connect to your corporate Intranet for messages (such as your Domino Intranet), or any Internet Service Provider.

While light on proce, Lotus Mail is heavy on business features.   Spell checking delivers professional results. Nested mail folders organise your messages in all the right places.   Automatic addressing saves you time.   On-line directory lookups via LDAP mean you can locate e-mail addresses fast.   And mailbox encryption keeps your messages private.

Lotus mail comes with just about everything you need to start sending and receiving Internet e-mail.   It contains a full Web browser and support for open Internet standards: POP3, SMTP, LDAP and MIME.   It works with Lotus Domino and other POP3 servers.   So you're plugged in, the world over.

Lotus mail also allows you to automate e-mail tasks that consume valuable time - like filing new messages and deleting old messages.   Plus Lotus mail clients connect to any standards-based messaging servers today and tomorrow.   You can easily change servers in the future - without changing client software.

Features

Foolproof Addressing. Just start typing your recipient's name and Lotus Mail completes the address for you. Or, type Internet addresses as you create a message.
The Directory Builds Itself. Tired of typing long Internet addresses? Lotus Mail adds the authors of new messages to your Personal Address Book automatically.
View and Print File Attachments. With 190+ File Viewers, you're no longer in the dark. See and print attached files in popular formats, including Lotus SmartSuite, Microsoft Office and Corel WordPerfect, even without the original applications installed.
Manage Hundreds of Messages. Drafts, Sent Mail, and Trash folders help you organize your messages and your thoughts. Store messages your way in nested folders.
Rocket Through Tasks. Automate time-consuming mail tasks, like moving messages to folders or sending automatic replies, with powerful Rules. Schedule Rules to run when you want them to.
Message Previews. See what's hot and what's not in messages --
before you open them -- in the Preview Pane.
One-Touch Sorting. Sort inbox and folder messages by date, author, size and more.
Drag-and-Drop. Move messages to folders. Move users to your Personal Address Book. Fast.
Find It. Search by many different criteria to find any message in seconds.
Read It Again. Choose to leave messages on the mail server, so you can retrieve them from different computers.
Send Your Own Stationery. Create stylised message templates for items you send regularly, such as status reports.

System requirements:
- PC 80486 or higher CPU
- 12 MB of RAM if running on Windows 95, 16 MB RAM if running Windows NT
- 32MB hard disk space

Lotus Mail is available in the following languages:
International English, German, French, Dutch, Swedish, Norwegian, Italian, Spanish and Danish.

Millie's Maths House

Age 2 - 6

Millie's Math House is for children aged two to six.   It addresses specific mathematics curriculum objectives for that age group by a playful use of concepts which are fascinating to young children.   Millie is a cow with an enchanting voice, and by exploring the seven fun-filled rooms of her house, children thoroughly enjoy themselves yet build essential mathematical concepts at the same time.   Designed by early childhood experts, Millie's Math House gives young children the building blocks they need to develop a solid foundation in Maths.   They'll love every minute in Millie's Math house - where it's so much fun to learn!   In the 'Explore and Discover' mode, children can investigate colourful characters and objects that pose problems.   In the 'Question and Answer' mode, children can then demonstrate their understanding of specific concepts, and all the time they are having fun!

Features

Add and Subtract
Place the same number of objects on your stage as Dorothy has on hers! How many is that? You'll have to count, add and subtract to find out!

Compare and Match Sizes
Little, Middle and Big need shoes! Help them try on boots, high tops, sandals and slippers as you explore the concept of size.

See and Hear Patterns
Create, recognize and complete patterns with Bing and Boing, the bouncing pals. As they hop on a picture, it makes a wacky sound. Record your own sounds for even more fun!

Explore Shapes
Use blueprintsor your own creativityand learn about geometric shapes as you build a Mouse House. Print and color your house too!

Learn to Count
Little critters pop up and count off when you select a number from 0 to 30 in the Number Machine.

Encourage Creativity
Learn about numbers and quantity as you place from 1 to 10 rolling eyes, wagging tails, wiggling antennae and other moving parts on a bug!

Develop Problem Solving Skills
Decorate cookies with 0 to 20 jellybeans in the Cookie Factoryand discover the sequence of events required to make a tasty treat for Harley, the horse.

System requirements:

Windows:

Windows 3.1 (enhanced mode), Windows 95 or later
4 MB RAM (8 MB highly recommended)
CD-ROM drive (double-speed or faster recommended)

386DX/33 MHz (486/33 MHz or better recommended)
Super VGA, 640x480 (256 colours, or more, required)
Hard disk with 2 MB free
Mouse
Windows-compatible sound-output device

Optional

Windows-compatible printer
Edmark TouchWindow®

Macintosh:

Colour Macintosh (256 colours required)
4 MB RAM (8 MB recommended)
CD-ROM drive (double-speed or faster recommended)
System 7.0.1 or higher
13" monitor or larger

Optional

Printer
Edmark TouchWindow®

Colour A Story In 3D

Timeless adventure stories inspire children's creativity!

Color a Story in 3D inspires kids to interact with the timeless great adventure stories of 20,000 Leagues Under the Sea, The Trojan Horse, and Tales of Gulliver's Travels. Kids can color life-like 3D story scenes and listen to dramatic retellings of the stories by Master Talesman Odds Bodkin.

Features

Dazzling 3D Colouring
 3D technology allows children to create realistic, dimensional scenes
 Colour and save 20 3D scenes plus a title page from each great adventure story
 63 Crayola® crayon colours and 18 fun textures
 Storytelling with Original Music
 Features Master Talesman, Odds Bodkin
 Storytelling reinforces key listening and vocabulary skills
 CD-ROM also plays storytelling soundtracks on stereo CD players
 63 Crayola® crayon colors and 18 fun textures
 Children Create Customized Slide Shows and Storybooks
 Edit coloured scenes together for an exciting slide show with voice-over and music
 Print storybooks in colour, black & white or as line drawings
 Create storybooks with or without text Features electronic Parent/Teacher Guide with fun educational activities to promote creativity and literacy learning

Systems Requirements

Windows® 3.1, 3.11 or Windows® 95
486DX 66MHz PC (Pentium 75 MHz PC or higher recommended)
8MB RAM (16MB RAM or higher recommended)
SVGA monitor 640x480, 256 colours (thousands of colours recommended)

Bailey's Book House

Explore Letters, Words, Sentences, Rhyming and Stories!

Ages 2 to 5

The award-winning Bailey's Book House now features 2 new activities! Bailey and his friends encourage young children to build important literacy skills while developing a love for reading. In seven activities, kids explore the sounds and meanings of letters, words, sentences, rhymes and stories. No reading skills are required: all directions and written words are spoken.

Features

Master Simple Prepositions
Where's Edmo? It's up to you! Direct the action and send Edmo & Houdini over, under, in, out, off and on the doghouse.

Learn Three-Letter Carnival
Sound out words at the Three-Letter Carnival! Group animals and objects by names that rhyme, or group them by names that begin with the same letter.
Learn the Alphabet
Learn your ABCs with the animated, talking Letter Machine. At the touch of a letter, dinosaurs dance and rhinos rollerskate!

Make Your Own Rhymes
Rub a dub dub, three kids in a shrub? Mother Goose rhymes take a new twist when you become a poet in Read-A-Rhyme.
Explore Self-Expression
Make a card for any occasion with Kid Cards. You can decorate and print your own colourful creations.

Create Your Own Story
Become an author as you send Bailey's friends on wonderful adventures. Your storiesfilled with spaceships, flying carpets, jungles and monsterscan be printed and folded into storybooks.

Explore Adjectives
Select words to describe your friend's hair, eyes, nose, mouth, arms and feet. You'll learn common adjectives and build descriptive phrases as you watch your friend change.

Learning Opportunities
-Learn Names of Letters
-Recognise Uppercase and Lowercase Letters
-Recognise Rhyming Words
-Sound Out Word Beginnings and Endings
-Learn and Use Common Adjectives and Prepositions
-Build Sentences
-Increase Reading Vocabulary
-Print Your Own Work

Sammy's Science House

Ages 3 - 8

Kids Explore the Wonders of Science in Sammy's House!

Sammy's Science House offers young children an exciting introduction to the wonders of science.   Five fascinating activities challenge kids to explore science, concepts, expand their science vocabularies and above all, learn to see and enjoy science in the world around them. Encouraged by Sammy and his friends, your kids will observe, classify, compare, construct and solve problems.   They'll learn about plants, animals, seasons and weather too!   Sammy's Science House builds important early science skills and gives kids the start they need to develop a positive attitude toward science and a curiosity about the world around them.

Features

Discover the Wonders of Nature
What do shrews eat? Why does a squirrel flick its tail? Visit Acorn Pond during winter, spring, summer and fall to explore its fascinating wildlife.

Make Your Own Weather!
Kids learn weather terms, experiment with temperature, wind and precipitation and see how different variables affect weather.

Explore the Field Notebook
Kids find great sketches and fun facts about the animals of Acorn Pond. Printing pages allows kids to share their favourite animals with family and friends.

Play with the Order of Things
Lights! Camera! Action! Kids learn about beginnings, middles and ends and explore how things in nature change over time as they arrange frames of film in logical sequences to Make-A-Movie.

Construct in the Workshop
Clocks tick, wheels spin and robots spring to life as kids follow blueprints or create original machines and toys.

Drop in at the Sorting Station
Three horns . . . it's a triceratops! Kids sort pictures of objects and learn the names of plants, animals, rocks and fungi.

System requirements:

Windows requires:
- Windows 3.1 (enhanced mode), Windows 95 or later
- 4 MB RAM (8 MB RAM highly recommended)
- CD-ROM Drive (double speed or faster recommended)

Strategy Games Of The World

Ages 8 - Adult

Learn to Build and Apply Strategies with 3 Classic Games

The three games in Strategy Games of the World - Mancala, Nine Men's Morris and Go-Moku - have challenged players since Egyptian times.   Why ?   Because they teach strategies that can be used throughout life - in games, in school and in jobs.   Game levels advance along with your skills to keep you challenged.   Strategy Coaches provide tips and offer alternate strategies.

Features

Mancala
Use a variety of strategies to move stones around the board and try to collect more than your opponent.   Careful! The look of the entire game can change in seconds as stones are distributed by your opponent.

Go-Moku
Quick-scan the board and find ways to put five pieces in a row before your opponent can.   With as many as 324 pieces in play at once, it's essential to learn which information to use - and which to ignore.

Nine Men's Morris
You'll need one set of strategies when placing pieces at the beginning of the game - and a very different set as you move pieces to bloc or capture your opponent.

Master Essential Strategies:
- Discover patterns and sequences
- Break problems into smaller parts that can be solved individually
- Plan ahead
- Predict outcomes
- Eliminate options known to be invalid
- Test hypotheses
- Synthesise information
- And more!

System   requirements:

Windows requires:
Windows 3.1, Windows 95 or later
486, Pentium or better, 33 MHz or faster recommended
Hard drive with 5MB free
8MB memory (RAM)
Super VGA graphics, 640x480, 256 colors
Double-speed (2X) or faster CD-ROM drive
Windows-compatible sound card

Optional

Edmark TouchWindow®

Macintosh requires:

System 7.0.1 or higher
68040, 68030 (25 MHz or faster recommended), or PowerPC
8 MB memory (RAM), 4200k unused
13" monitor or larger
Double-speed (2X) or faster CD-ROM drive

Optional

Trudy's Time & Place House

Ages 3 - 8

Explore the Excitement of Geography and Time!

In Trudy's Time & Place House, children enjoy exploring geography and time with Trudy's whimsical friends!   Ann and Dan. Joe Crow and Nellie the Elephant invite kids to build time-telling skills, develop mapping and direction skills, and "travel" the world learning about continents, oceans and landmarks.   kids will love exploring in Trudy's House!

Features

Control the Calendar Clock
Learn about units of time as you move forward or backward in an animated movie by seconds, minutes, hours, days and even months.

Master Map Symbols
Place symbols on a sandbox map and watch hills, roads, lakes and cities grow before your eyes.   Combine symbols to make railroad tunnels, bridges over rivers and towns on mountains.

Which Way to the Jellybean?
Learn relative and cardinal directions by directing a hungry ant left, right and forward - or north, south, east and west.

Tell Time with the Twins
Meet Analogue Ann and Digital Dan.   You'll learn to tell time on both kinds of clocks.

Visit Stonehenge, Bangkok and the Congo!
Blast off with Astro-mouse!   Discover the relationship between the earth, a globe and a world map.   Take pictures of your favourite places to print and colour.

Learning Opportunities:
- Locate and name 7 continents and 4 oceans
- Locate and learn about major landmarks
- Understand common map symbols
- Use left, right, N, S, E and W directions
- Explore the relationship between a globe and a world map
- Understand the units of time measurement
- Tell time on analogue and digital clocks

System requirements:

Windows requires:
- Windows 3.1 (enhanced mode), Windows 95 or later
- 4 MB RAM (8 MB highly recommended
- CD-ROM Drive (double speed or faster recommended)
- 386DX/33MHz (486/33 MHz or better recommended)
- Super VGA, 640x480 (256 colours, or more, required)
- 2 MB Hard Disk Space
- Mouse
- Windows-compatible sound-output device

Optional:
- Windows-compatible printer
- Edmark TouchWindow

Macintosh requires:
- Colour Macintosh (256 colours required)

KidDesk Family Edition

Hard Drive Security for Parents and Computing Fun for Kids!

Ages 3-10

Now kids can launch their programs, but can't access yours! With KidDesk Family Edition, you can give your children the "keys" to the computer without putting your programs and files at risk!

The auto-start option provides constant hard drive security: any time your computer is turned on, KidDesk will appear. Make a desk for every child in your family. Then select the programs you want each child to launch from KidDesk.

With the click of a mouse, they'll explore their own programs independently! When they exit a program, they'll return to their own desktops. . . not yours!

And KidDesk offers more than hard drive security: it gives kids 11 fully functional accessoriesjust like those on a "real" desk!

School Versions are also available.

Features

Design Specific Desktops
With KidDesk, every family member can have a desktop with the programs specifically chosen for him or her.

KidDesk Features 12 Different Desktops
Features 12 different desktop designs including Sports, Dinosaur, High Tech, and Executive!

Electronic Mail
Send e-mail to other family members. It's a great introduction to online communications!

Note Pad
Write and print letters and lists with you handy KidDesk note pad. Choose from 36 borders and headings for variety!

Picture Frame
Select one of 50 icons for the frame on your desktop. Use the picture editor to add your own touch to an icon, or even create a new one!

Voice Mail
Leave messages, reminders or riddles on family members KidDesk answering machine. When your answering machine light blinks, it's time to pick up your messages!

Monthly Calendar
Readers and non readers alike will enjoy this colourful, printable calendar! Type notes or choose from 80 colourful stickers to mark special occasions!

Address Card File
Keep track of friends and relatives addresses, phone numbers and birthdays. Address cards and lists can be printed

too.

System Requirements

Thinkin' Things Collection 1

Ages 4 - 8

Award Winner!   1996: Kids at the Keyboard Awards - Fun Learning Classic Gold Award

Thinkin' Things Prepares Kids for a lifetime of Learning

Good thinkers learn quickly, adapt to change easily and can accomplish amazing things.   The early learning experts at Edmark created Thinkin' Things for 4 - 8 year olds, offering six thought-provoking activities designed to help build problem solving, creativity, critical thinking and memory skills that will give your child a solid foundation for a lifetime of successful learning!

Features

Learning Opportunities:
- Compare and Contrast Attributes
- Improve Visual and Auditory Memory
- Hypothesise and Test Rules
- Strengthen Creativity
- Create and Discuss Patterns
- Complete Visual Analogues
- Create Kinetic Art
- Strengthen Ability to Conceptualise and Evaluate
- Recognise Visual or Auditory Strengths

Grow with Your Child
AS your child succeeds, Grow Slides automatically increase the level of difficulty.   You can track your child's progress and adjust the slides from within the activities (not included in Flying BLOX activities).

System requirements:

Windows requires:
Windows 3.x, Windows 95 or later
486, Pentium® or better, 33 MHz or faster recommended
Hard disk with up to 2 MB free
8 MB memory (RAM) required
Super VGA graphics, 640x480, 256 or more colours
Double-speed (2X) or faster CD-ROM drive
Windows-compatible sound card

Optional

Microphone
Edmark TouchWindow®

Macintosh requires:
System 7.0.1 or higher
68030, 68040, or PowerPC™

Thinkin' Things Collection 2

Ages 6 - 12

Thinkin' Things Collection 2 offers challenging new tools and toys to strengthen high-level thinking skills for kids.

In today's environment of rapid change, kids with strong thinking skills will thrive and excel. Thinkin' Things 2 is a powerful set of tools and toys that help kids become creative problem solvers, flexible thinkers and enthusiastic learners.   Thinkin' Things Collection 2 builds thinking skills that help kids advance in all school subjects and creative endeavours they pursue.   Skills like musical and artistic creativity. Listening skills.   Memory, Problem solving and Visual thinking.   With a strong grasp of these skills it's amazing what kids will do!

Both Thinkin' Things and Thinkin' Things 2 have been designed with a unique set of activities to help your child develop essential thinking skills.   Collection 1 is for kids aged 4 to 8. Collection 2 is for kids 6 to 12.   Many kids will have a great time learning from both!

Features

Did You See It? Hear It? Concentrate.
Were those two Fripples wearing the same hat? Were they speaking the same language? Strengthen listening skills with Frippletration. For one or two players.

Listen. Which Line Did Crocker Play?
Kids explore rhythmic notation on their own high-tech jammin' machine and match the band members to the rhythm lines they played.

Learn Tunes with Toony
Build listening skills and auditory memory as you learn all-time favorite songs on one of four wacky xylophones! New

Dimensions for Thinking
Explore 3-dimensional visualisation and optical illusion! Draw or erase on the 2D workspace and watch as your picture is instantly mapped onto a spinning 3D image.

Strengthen Visual Thinking with Moving Art
Use a "masking" tool to separate pictures into foreground and background layers, then direct a "snake" of shapes under, over and through your amazing designs.

Grow with Your Child
As your child succeeds, Grow Slides automatically increase the level of difficulty. You can track your child's progress and adjust the slides from within the activities.

System requirements:

Windows requires:
Windows 3.x, Windows 95 or later
486, Pentium® or better, 33 MHz or faster recommended
Hard disk with 2 MB free

Thinkin' Things Collection 3

Ages 8 - 16

Winner of 1996 MacUser Magazine Editors' Choice Award for Best New Children's Software
Winner of 1996 S.P.A Cody Award for Best Educational Software

Thinkin' Things Collection 3, will challenge kids to strengthen reasoning, synthesise and analyse information, build early computer programming skills and experiment with physics properties.

Features

Stocktopus: With Stocktopus as the broker, kids exchange items with traders around the world.   Kids make the trade sequences required to achieve their "portfolio" goals.

Photo Twister: Tiny green aliens, equipped with 22 special effects tools, have changed a photograph.   Kids must analyse the picture and line up the alien team that faded, dented and twisted it.   Kids can also use the special effects tools to create their own outrageous images.

Half-Time: It's football season and it's up to the kids to create the half-time show.   They develop beginning computer programming skills as they link command files and control moving formations of marching bands, football players and cheerleaders.

Carving BLOX: In Carving BLOX kids enter a world where balls roll and collide on virtual metal that they shape and drill.   They can send balls up inclines, through grooves and down holes as they experiment with physics properties including gravity, friction, motion and inertia.

Fripple House: Kids put on their detective caps and solve the Case of the Empty Fripple House.   The Fripples can't move in until kids read the clues in each room, synthesise the information. and deduce where each Fripple belongs.

System requirements:

Windows requires:

Windows 3.x, Windows 95 or later
486, Pentium® or better, 33 MHz or faster recommended
Hard disk with 2 MB free
8 MB memory (RAM) required
Super VGA graphics, 640x480, 256 or more colors
Double-speed (2X) or faster CD-ROM drive
Windows-compatible sound card

Optional

Microphone
Edmark TouchWindow®

Macintosh requires:

System 7.0.1 or higher
68030, 68040, or PowerPC™
4 MB memory (RAM), 1900K unused, 5 MB for System 7.5 or later, 8 MB highly recommended

13" monitor or larger, 256 or more colours
Double-speed (2X) or faster CD-ROM drive

Optional

Microphone
Edmark TouchWindow®

Thinkin Things Collection 3 is available in the following languages:
UK English,   Japanese, German, French, Dutch, Swedish, Norwegian, Italian, Spanish, Danish, Finnish, Portuguese, Turkish, Brazilian and Hebrew
In May '98 Korean and Taiwan will be available.

Mighty Math Number Heroes

Builds Basic Concepts and Problem-Solving Skills!

Number Heroes teaches kids the basics and problem-solving skills they need to succeed in math. With the help of Fraction Man, Star Brilliant and other math superheroes, kids understand dozens of math concepts and solve thousands of problems while learning multiplication and division, fractions, 2D geometry and probability. Help your children master 3rd through 6th grade math with Number Heroes!

Features

Watch Fractions Become a Blast
Identify, add, subtract and multiply fractions to make brilliant and explosive fireworks with Fraction Man. This math superhero also does a bang-up job of teaching you to compare fractions, find equivalent fractions and convert decimals to fractions.

Explore Probabilities with Handsome Chance
Read graphs and charts, predict outcomes and determine probability as you make action figures of Handsome Chance. Run the probability machine to test your hypotheses.

Hands-on Geometry with GeoBot
Use the Geometry Computer to solve the GeoBot's challenging geometric brainteasers. You'll build geometric shapes and designs while mastering concepts such as perimeter, area, congruence, similarity, symmetry, rotation and tessellations.

Turn Math and Logic into Fun and Games
Star Brilliant, host of Quizzo, challenges you to test your wits in math and logic against wacky contestants or your own friends. Win by solving addition, subtraction, multiplication, division, analogy, shape identification, sorting and sequencing problems.

Special Features
Includes two unique calculators that display the steps required to solve a problem. They also convert between fractions and decimals, and simplify fractions.

A pop-up Fact Book offers you help with geometry terms and concepts. The Fact Book is part of the GeoComputer activity and can be used to help solve the GeoBot's geometric brainteasers.

Mighty Math's unique Grow Slide feature automatically records your child's progress and adjusts to guide your child's learning. The activities in Number Heroesoffer dozens of math topics and thousands of problems. Grow Slides help your child get the full benefit of the four years of math learning in every activity. As your child learns and progresses, the Grow Slides advance, offering more challenging problems. You or your child can also set the difficulty of each activity or choose a specific topic related to schoolwork.

System Requirements

Windows® Requires:

Windows 3.x, Windows 95 or later
486, Pentium or better, 33 MHz or faster recommended
Hard drive with 5 MB free
8 MB memory (RAM)

Super VGA graphics, 640x480, 256 colours
Double-speed (2X) or faster CD-ROM drive
Windows-compatible sound card

Optional

Windows-compatible printer
Edmark TouchWindow®

Macintosh® Requires:

System 7.0.1 or higher
68040, 68030 (25 MHz or faster recommended), or PowerPC
8 MB memory (RAM), 4200K unused
13" monitor or larger
Double-speed (2X) or faster CD-ROM drive

Optional

Printer
Edmark TouchWindow®

Mighty Maths Number Heroes is available in   the following languages:
UK English, German, French, Dutch, Swedish, Norway, Italian Spanish, Portugese and Brazilian

Mighty Math Carnival Countdown

Kids love to visit Carnival Countdown, where addition, subtraction, early multiplication, division and logic are always centre ring! This breakthrough math program offers your child three years of math learning and ensures math success by teaching kindergarten through 2nd grade math concepts and problem-solving. With Carnival Countdown, learning math is as fun as a trip to the circus!

Check Out These Fun Activities and Secial Features In Carnival Countdown!

Early Geometry with a Western Flair
Learn the concepts of size, area, perimeter, symmetry and fractions as you help Armadillo Annie with Pattern Block brainteasers. Create colourful designs and discover relationships among shapes.

Strike up the Band with Place Value
Count, add and subtract bubbles with the Bubble Band! Trade ten tens bubbles for one large hundreds bubbleor trade a tens bubble for ten ones. As you drag bubbles around the stage, you'll really see the relationship en ones, tens and hundreds.

All Laughs Are Not Created Equal
Weigh laughs in the Giggle Factory and use $<$, $>$ and $=$ to describe the relationships between numbers and quantities of giggles. The Otter Twins will tickle your funny bone as you learn about equality, inequality and place value.

Logical Thinking on Wheels
Venn diagrams become child's play as you help Allison sort bumper cars by driver, colour, body style, number and horn sound. Categorise by attributes to drive home logical thinking skills!

Problem Solving with the Snap Clowns
Solve addition and subtraction problems as you attach clowns to circus poles. Stack clowns in rows and columns to build a foundation for multiplication and division.

Unique Grow Slide Feature!
Mighty Math's unique Grow Slide feature automatically records your child's progress and adjusts to guide your child's learning. The activities in Carnival Countdown offer dozens of math topics and thousands of problems. Grow Slides help your child get the full benefit of the three years of math learning in every activity. As your child learns and progresses, the Grow Slides advance, offering more challenging problems. You or your child can also set the difficulty of each activity or choose a specific topic related to schoolwork.

Stanley's Sticker Stories

Create Animated Storybooks as You Play with Stanley, Millie, Bailey and Their Friends!

Ages 3 to 7 Kids love Millie, Bailey, Sammy and Trudythe characters from Edmark's award-winning Early Learning Series. And now they can feature these and other Edmark characters in their very own animated storybooksbuilding spelling and writing skills and expanding creativity along the way. This fun-filled program from the educational software experts at Edmark gives kids the power to build stories that come to life right on screen. They can also make alphabet and counting books, write letters and much more. Kid-tested tools, large buttons, spoken help and friendly characters make creating animated stories easy and fun for readers and nonreaders alike!

Features

Stanley's Main Screen

Choose from more than 300 stickers! Record your own sound to make characters talk, sing and laugh! Click on the Sticker Spelling Book to see and hear the spelling of a favourite sticker. Animate characters with the click of a button. Click on Stanley to get fun ideas for stories.

Print your stories in colour or black and white.
Play back your story and watch it come alive-on screen. Add a musical introduction to any page or narrate your story. Type words and sentences to add to your story. Stickers get bigger as they're dragged to the front of the scene, and shrink as they're moved into the background.

Millie is a Fun Friend
With the help of Stanley and the Sticker Spelling Book, creating animated stories is easy for even the earliest writers. Create Your Own Books. Create alphabet and number books and build early reading and writing skills.

Print Your New Book and Share it with Friends
Print your creations to share with friends. Or click the Play button and watch as your story comes to life on-screen.

<u>Return to CD Overview</u>

OS/2 Warp Server 4

Whether you run a large enterprise or a small business, OS/2 Warp Server offers you a strategic network platform, for today and the future. With OS/2 Warp Server, you gain a complete, fully-functional application server, a highly reliable network operating system, a systems management server, backup and recovery services, and more...all in a single, cost-effective solution that's easy to install and manage. The bottom line? OS/2 Warp Server is an extraordinary feature-rich network operating system.

The Complete Package in Network Operating Systems

OS/2 Warp Server stands above the competition when it comes to offering services in a network operating system. In fact, you'll find seven networking services in this one integrated package which can help reduce network costs, shield against viruses, protect business assets, audit network software and hardware, improve response times, and provide higher application availability. Designed for business-critical availability, OS/2 Warp Server is the industry-leading application support for databases and applications.

OS/2 Warp Server also allows you to implement networked applications such as e-mail, Lotus Notes, and relational database systems. Or you can start with traditional file and print services and add more function when the time is right. As well as providing TCP/IP function, Warp Server can also be used as a web server. If you have an existing NetWare LAN, you can run OS/2 Warp Server concurrently and add such essential capabilities as Internet access, application services, and remote access. All this and the IBM worldwide support.

OS/2 Warp Server supports clients running a variety of desktop operating systems, including OS/2 Warp, WorkSpace On-Demand, DOS, Windows 3.x, Windows 95, Windows NT, AIX and Macintosh. Plus, OS/2 Warp Server delivers the protocol independence you've asked for, concurrently supporting NetBIOS, IPX, TCP/IP and 802.2.

Building on the winning combination of OS/2 Warp Version 3 and IBM's LAN Server 4.0, OS/2 Warp Server incorporates new capabilities, including:

Sophisticated systems management tools
Worry-free backup and recovery
A full set of remote connectivity facilities
Advanced printer functionality
Support for up to 1000 users on a single server (advanced version)
Higher performance for file and print sharing and Lotus Notes (advanced version)
Seamless, secure Internet access, providing high-speed connections to the Web

Features & Benefits

Advantages provided by OS/2 Warp Server result in a network operating system solution that can exceed your expectations. The challenges you once faced with network costs, security, system management, and communication services quickly become solutions with OS/2 Warp Server's network capabilities. OS/2 Warp Server has what it takes to take you into the future of network computing.

System Requirements

* Intel 486 compatible or higher based personal computer
* 16MB minimum of random access memory (RAM)*
* 250MB free hard disk space*
* 1.44MB 3.5" diskette drive "A"
* VGA video support
* Supported LAN adapter

* IBM-compatible mouse
* Multimedia-ready systems for sound
* An OS/2-compatible CD-ROM drive
* Additional memory and more or less hard disk space may be required based on user installation selections, applications and data.

OS/2 Warp Server is available in the following languages:
US English, UK English, CER English, French, German, Italian, Spanish, Norwegian, Swedish, Dutch, Danish, Finnish, Russian, Arabic, Hebrew, Greek, Hungarian, Polish, Czech and Turkish.

OS/2 Warp 4

OS/2 Warp 4 -- the operating system solution that puts it all together, here and now. Connectivity for today's networked world...the stability and compatibility needed to run your business...manageability that can significantly reduce cost of ownership...real multitasking for greater productivity...plus an easy, fun way for people to work. Whether you're looking for a strategic platform that will carry your business into the future, or an easy way to launch yourself onto the Internet, OS/2 Warp 4 can take you there.

Dreams Become Reality with OS/2 Warp 4

Ever dreamed of a one-stop operating system solution? One that is both easy to use and so powerful it could administer an enterprise network? That dream is now a reality thanks to OS/2 Warp 4. Offering exceptional connectivity, outstanding systems management, easier-than-ever Internet access, and an enhanced user interface, OS/2 Warp 4 is designed to be the universal client.

OS/2 Warp 4 sets the stage for network computing enhancements with two "firsts" for PC operating system solutions. One, OS/2 Warp 4 offers integrated runtime support for Java applications. This means these applications will run on your desktop without a Web browser. And two, OS/2 Warp 4 includes integrated IBM VoiceType technology which takes the user interface to the next level and makes it easier to surf the Web through the use of voice commands. So take your hand off the snooze button and stop dreaming. OS/2 Warp 4 is here.

Features & Benefits

The advantages of OS/2 Warp 4 put it in a class of its own. From its enhanced graphical user interface (GUI), to IBM VoiceType speech navigation and dictation, to Java integration, OS/2 Warp 4 has what it takes to connect you with the future of the networked world. And these are just a few of its many features. See for yourself how you can benefit from OS/2 Warp 4. Get ready to be amazed.

System Requirements

Computer System: 486 or above.
RAM: 8 MB
CD-ROM Drive: 2x minimum speed
Operating System: OS/2* with Windows support (Win-OS/2*), Windows 3.1 or Windows 95
Display: VGA (640 x 480, 256 colours minimum)

OS/2 Warp is available in the following languages:
US English, UK English, French, German, Italian, Spanish, Norwegian, Swedish, Dutch, Danish, Finnish, Portugese, Russia, Arabic, Hebrew, Greek, Hungarian, Polish, Czech, Turkish, Bulgarian, Catalan, Slovenian and GK English.

Return to CD Overview

PC-DOS 7

PC DOS 7 - The best DOS and your best value

IBM's PC DOS 7 is the latest release of the industry standard for DOS and Windows users. PC DOS is "classic" 16-bit DOS, considered by many to be the best DOS in the industry for Intel and compatible personal computers. PC DOS 7 has many new features, and significant enhancements in usability and performance. This article gives details about all of the major new features and enhancements in PC DOS 7. PC DOS 7 establishes IBM as the leader in providing new DOS technology to the computer industry. PC DOS 7 is the most full-featured DOS in the marketplace, and its APIs are 100% MS-DOS and Windows compatible, making PC DOS 7 the best choice for all DOS and DOS/Windows users.

With this new release, users can get up to 40 KB of additional free memory, Stacker 4.0 compression, file synchronisation, REXX programming, docking support, on-line help, enhanced PCMCIA support, and much more. PC DOS 7 also includes significant enhancements to PC DOS's already superior line of utilities. In addition, PC DOS 7 is available in 18 languages.

Features & Benefits

1. Enhanced Memory Management
- gives you up to 40 KB additional memory over DOS 6.X
- features RAMBoost, which tracks and monitors how your system uses memory and automatically optimises it for you.
- frees up more memory by loading DOS system tables into the Upper Memory Blocks (UMB) area

2. Stacker 4.0 Data Compression
- breaks the 2:1 barrier, giving you more space for your data than other compression software
- Makes compressing your data safe and easy with proven compression technology
- gives you memory savings and added protection by loading the driver into a protected area in memory

3. Industrial-Strength Virus Protection
- detects over 2,100 known viruses; uses fuzzy scanning technique to find mutations of existing viruses
- is easy to use and comes with both a Windows and DOS full-screen interface
- allows you to run infected applications safely

4. Central Point Backup
- provides an easy-to-use Windows and DOS full-screen interface
- supports a wide array of tape drives, including SCSI and QIC 40/80
- allows you to schedule backups - makes your PC productive even when you're not there

....and many more.

More For Your Money.......From IBM

At IBM, we're no strangers to DOS   - this is our 14th release of the classic operating system. And even if you're upgrading from MS-DOS, you'll feel right at home. With each new release, we ask for your feedback, then we refine, test and enhance the operating system to make it work better for you. We're constantly striving to make all our products the best available and it gives our customers what they need to be the most productive.

Bt selecting PC DOS 7 from IBM, with its improved, full-function utilities such as Stacker 4.0, there's no question

that you'll get more than your money's worth.

System Requirements

Memory requirements: 512KB minimum.
System requirements: Intel 8088 or 80X86 or higher microprocessor (or compatible)
Disk-space requirements: 6MB TO 18MB of free hard-disk space, depending on the installation options selected.

PC DOS is available in the following languages;
US English, UK English, Danish, Dutch, Finnish, French German, Italian, Norwegian, Portugese, Russian, Spanish and Swedish.

The World Book 1998 Multimedia Encyclopedia Deluxe Edition

Based on the world's best-selling print encyclopaedia.

A multimedia encyclopaedia is only as good as its content...
...and it doesn't get any better than World Book.

 Welcome to the new World Book Multimedia Encyclopedia
World Book 1998 Multimedia Encyclopedia

Has all the articles from the world's best-selling print encyclopaedia
Is researched and tested in hundreds of classrooms nation-wide
Uses a writing style that's grade-level appropriate
Gives you 80 years of experience
Is produced by the world's leading technology company -- the IBM Corporation

80 Years Of Unparalleled Content

Access all the articles from the 22-volume print version
Search on thousands of articles, including newly-added articles and additional biographies
View the world with cartographically accurate maps -- not illustrations
Double click on any word in the encyclopaedia to see its definition instantly appear on screen
Zoom in on the world atlas
Click on any country to learn more about it
Use the Distance Calculator to navigate around an interactive globe

The Homework Wizard makes quick work of routine research.

Learn how to research reports, develop note cards, and write outlines with Report Wizard
Sharpen term papers by generating 3-D charts and line graphs with Chart Wizard
Enhance homework assignments by creating historical timelines with Timeline Wizard
Streamline research with Highlighter and Sticky Notes

Requirements

* Microsoft Windows 95, Windows 3.1 or higher, or Windows NT 4.0 or higher
* 486 DX/66 MHz (or higher) IBM or 100% compatible PC
* 16 MB RAM
* 35 MB free hard disk space
* SVGA 256 colours or higher
* 16 bit sound card
* CD-ROM drive (double speed or faster)
* Mouse

For On-line access:

* 8 MB additional free hard disk space
* Modem
* Internet connection.

World BookTM 1998 Multimedia Encyclopedia Deluxe Edition is available in the following languages:
UK English and US English

Workspace On-Demand

WorkSpace On-Demand is IBM's managed client operating system for enterprise customers who want the potential to reduce operational costs using optimised network computing technology. WorkSpace On-Demand is capable of managing many clients from a single server, helping simplify software administration and maintenance, helping reduce associated costs, and allowing more efficient use of critical IS skills. When you're looking for success in mission-critical environments, WorkSpace On-Demand has what it takes to get you there.

The Next Step to Optimum Network Computing

When it comes to choosing technology for mission-critical environments such as banking teller systems, point of sale terminals, and financial trading systems, IBM's WorkSpace On-Demand is the first choice. Based on proven, highly reliable, IBM technology, WorkSpace On-Demand helps lower the cost of administration by supporting managed client PCs as well as providing greater IS control.

WorkSpace On-Demand is the next logical step to network computing and Java while helping protect your existing investment. As a client operating system, WorkSpace On-Demand allows you to send out customised desktops. Because WorkSpace On-Demand supports your existing PC inventory, as well as your DOS, Windows, and OS/2 applications, it allows you to move to network computing, and Java, without having to make a costly conversion. You can then roll out your network computing applications at your own pace. You can also access both Intranet/Internet applications & information as well as client/server and in-house software. With WorkSpace On-Demand, you can be assured of a dependable communications solution for sustained performance in your demanding environment.

Features

Intel-compatible managed client operating system
Integrated systems management
Applications are loaded and managed from the server
Highly reliable and available
Based on proven OS/2 technology
Supports Windows 3.x, DOS, 3270, 5250, OS/2 applications
Supports 32-bit Windows 95/NT applications via separately purchased 3rd-party software
Java Virtual Machine is built directly into the operating system
100% Pure Java capability
Supports new "managed PCs" and PCs acting as thin clients
Runs on traditional PC server hardware
Supports traditional PC workstations acting as "thin clients"

Benefits

Lower total cost of ownership
Simplifies software administration and reduces associated costs
A dependable communications solution for sustained performance in demanding environments
Allows the enterprise to take advantage of the benefits of network computing today
Migrate to network computing over time and at the enterprise's own pace
Continue to use existing applications

Workspace-on-Demand is available in the following languages:
Arabic, Czech, Danish, Dutch, Finnish, French, Greek English,   Hebrew, Hungarian, Italian, Norwegian, Polish, Portugese, Russian, Spanish, Swedish, Turkish, UK English and US English.

Return to CD Overview

Lotus Domino Go Webserver Pro

In one package, Domino Go Webserver Pro combines the power of Java, advanced site design and management with a pedal-to-the-metal web server, all at an attractive price. So, in one box, you get everything you need to create hot sites fast. It includes the workstation Domino Go Webserver, Net.Data, NetObjects Fusion, and Lotus BeanMachine.

Lotus Domino Go Webserver adds NetObjects Fusion and Lotus BeanMachine for Java to the speed and functionality of the Lotus Domino Go Webserver.

The award-winning NetObjects Fusion helps you create, publish, and control your site. Lotus BeanMachine makes it easy for you to give your pages a jolt of Java. In one box, Domino Go Webserver Pro gives you the authoring tools and the Web server you need to get a site up and running quickly and easily. Shift your imagination into high gear with Domino Go Webserver Pro!

Lotus BeanMachine for Java.
Create your first Java applet in minutes! The first interactive visual Java authoring tool specifically designed for non-programmers and Web professionals like authors, graphic designers and Webmasters, BeanMachine is an ideal complement to the latest generation of Web site creation tools. It lets you add multimedia, special effects, intelligent forms and live data to your Web or intranet applications with unprecedented ease. Preview the applet's appearance and functions as you create it, then publish it to your site with a single mouse click.

NetObjects Fusion.
The award-winning application that gives you unprecedented control over the design and production of your entire Web site. Its site-oriented approach lets you create and update every aspect of your site from overall structure to individual page components, without HTML coding. By combining automatic site building with advanced features like automatic link management and remote database access and professional quality design and publishing features, NetObjects Fusion reduces the time and cost of creating high-quality Web sites.

Lotus Domino Go Webserver.
Secure and complete Web publishing for business, with all the performance and scalability you'll ever need -- no matter how big your site gets! Domino Go Webserver is behind some of the most heavily-accessed Web sites ever created, like the Atlanta Summer Olympics Web site and the Deep Blue vs. Kasparov chess match. Easy to install and easy to administer, Domino Go Webserver combines support for the latest standards with value-added extensions like built-in proxy caching to serve pages quickly, a full-featured Search and Index service for users and site visitor reporting to help Webmasters hone site content.

Lotus Domino Go Webserver Pro is available in the following languages:
International English, French, Italian, German, Spanish, Dutch, Danish, Norwegian, Swedish, Finnish and Portugese

Internet page: http://www.lotus.com/home.nsf/welcome/lotusgopro

Lotus Domino Go Webserver 4.6.1

What are you waiting for? Get started with Domino Go Webserver.

Use Domino Go Webserver, an industry standards based Web server, to begin your Web site. Distribute sales manuals, employee handbooks, or other documents that require wide and immediate distribution with frequent updating. Use Domino Go Webserver to communicate company messages to your employees, customers, and suppliers. Build Web applications with connectivity to the databases you use daily in your business.

Transform your business into an electronic business.

It's time to make the transition from traditional business to electronic business. Domino Go Webserver is a complete Web server product with advanced security and development features. With Domino Go Webserver you have everything you need to quickly and easily establish a Web presence, and get started on your road to working the Web for business.

'No compromises' security.

Domino Go Webserver supports the Secure Sockets Layer (SSL) Version 3 protocol, so you can confidently and easily send secure communications and transactions over the Internet.

Easy to install, easy to use and manage.

It's simple and quick to install. Better yet, it's easy to manage and delivers the latest in security technology ensuring peace of mind. Installing Domino Go Webserver is quick and easy. The server can be downloaded from the Domino Go Webserver Web site or installed from CD-ROM. It can be administered locally or remotely using most Web browsers. HTML and PDF documentation is included.

Get hold of Domino Go Webserver and build great Web applications.

The server provides consistent application programming interfaces (APIs), administration, and configuration across the spectrum of server platforms, desktop systems, departmental servers, all the way up to massively scaleable IBM System/390 mainframe systems. Use Java on the server side to build powerful and portable Web applications. Domino Go Webserver provides a Java development environment based upon Sun Microsystems, Inc. standards for Java Servlets (server-side applications), Java Beans, and JDBC for database access.

Use Net.Data to build Web applications with connectivity to relational databases. Net.Data provides a development environment for quickly building high-performance Web-to-database applications.

Domino Go Webserver's key features

Client authentication and other security features
Domino Go Webserver supports SSL V3 including client authentication. The SSL V3 implementation also includes server authentication, data encryption, and additional Message Digest Hashing algorithms.

Simple Network Management Protocol (SNMP) support
Domino Go Webserver includes an SNMP subagent, which maintains server information and performance data in an SNMP Management Information Base (MIB). From any SNMP-capable network manager (such as IBM NetView for AIX, TME10 Distributed Monitoring, or HP Open View) you can display, monitor, and adjust thresholds for your

server performance.

SOCKS support and SSL tunneling
If your environment has a SOCKS-based firewall for access to the Internet, Domino Go Webserver can be used in a proxy server role to access destinations outside the firewall. Client connections which use SSL are "tunneled" through the proxy server, eliminating the need to decrypt and re-encrypt the data at the proxy.

HTTP Version 1.1 compliance
Support for HTTP now includes full HTTP 1.1 compliance, which provides support for persistent connections and virtual hosts. Persistent connections allow the server to accept multiple requests and to send responses over the same TCP/IP connection. This eliminates a great deal of connection processing, resulting in faster responses to the clients and reduced network bandwidth requirements. Virtual hosts allow the use of one IP address to serve multiple files instead of requiring different IP addresses for different files.

Expanded Common Gateway Interface (CGI) support
CGI support also includes the Java programming language in addition to the other languages supported, such as C, REXX, and Perl.

Fast Common Gateway Interface (CGI) support on AIX, HP-UX, Solaris, and OS/390
Fast CGI is a fast, open, and secure Web server interface that solves the performance problems inherent in CGI, without introducing the overhead and complexity of proprietary Application Programming Interfaces (APIs).

Java Servlet and Java Beans support
Use Java on the server side to build powerful and portable Web applications. Domino Go Webserver provides a Java development environment based upon Sun Microsystems, Inc. standards for Java Servlets (server-side applications), Java Beans, and JDBC for database access. Use Java Beans to access your back-end systems and JDBC to access and extend your databases. Java servlets also typically offer very significant performance enhancements over CGI (Common Gateway Interface) applications and are truly portable.

Features Overview

Acts as a repository for home pages created with HTML
Answers requests from a Web browser (client) using HTTP to transfer documents
Provides proxy support, allowing a Web browser to access remote servers not directly accessible to it.
Supports proxy caching by temporarily storing files and then quickly responding to the next request for the files.
Provides language neutral server application support which is consistent across the full spectrum of supported platforms, for both Common Gateway Interface (CGI) applications and server extension applications.
Allows users to write Web server extensions that customise the processing of client requests, to include Java servlet support.
Allows server applications to dynamically insert information into an HTML document that the server sends to a client.
Efficiently maintains multiple Web sites on a single server with multiple IP address support.
Delivers enhanced logging and reporting
Allows error message customisation.
Includes a utility to generate X.509 Security Certificates for use within an enterprise or between business partners.

Platform Availability

Domino Go Webserver is available for:

OS/390
Windows NT 3.51 or 4.0
Windows 95

OS/2 Warp 3.0 or later, OS/2 Warp Server, or OS/2 Warp-J
AIX 4.1.5 or laterSun Solaris 2.5
HP-UX 10.20 or later
OS/400 available soon.

Lotus Domino Go Webserver is available in the following languages:
For AIX, Windows NT, Windows 95, and OS/2, the server is available in the following languages:
English, French, German, Italian, Spanish, Brazilian Portugese, Japanese, Korean, Simplified Chinese and Traditional Chinese

Windows NT, Windows 95, and OS/2 are also available in Danish, Dutch, Finnish, Norwegian, and Swedish.

For OS/390, the server is available in English and Japanese only.

For HP-UX and Solaris, the server is available in English only.

Lotus Notes 4.6

With Lotus Notes Release 4.6, Lotus continues to surpass its competitors by providing users with a network client that integrates tightly with desktop productivity applications, extends the functionality of popular Web browsers, and provides a new model for navigation of mail, Web pages, applications and personal calendars - all within one consistent user experience.

Release 4.6 addresses five key areas: integration with desktop productivity tools including Lotus SmartSuite and Microsoft Office; Microsoft Internet Explorer integration; a new task-oriented navigation scheme that vastly accelerates user productivity; enhanced contact management and POP3 support for Internet mail. Visit the Notes and Domino User Assistance site for the latest documentation.

Notes Client 4.6 Features

The focus of the Notes Release 4.6 client is personal integration and management of content from Notes databases, Internet mail, and the Web. This release contains a number of significant enhancements, including a new user interface metaphor (the portfolio database) for task-oriented navigation, improved web browsing, enhanced Microsoft Office and Lotus SmartSuite integration, Internet (POP3/SMTP) mail, and seamless Web access from the Notes client. The Personal Address Book has also been enhanced to support better contact management functions and integration with core Notes features. Below is a listing of the most significant enhancements in this release:

Portfolios: A new navigation paradigm
Portfolios represent a new way to navigate and manage information either individually or between members of a group. A portfolio is a group of applications that have a common theme. The following usage scenarios illustrate how they might be used:

Usage Scenario 1: Each Notes Release 4.6 user has a portfolio called "Favorites" which is automatically created during the setup process. By default, this portfolio includes navigational icons representing the following applications: e-mail, calendar, to-do lists, personal name and address book, a personal journal and the web. These applications comprise the most basic set of what an individual needs to access and manage information within Notes. The portfolio allows an individual to easily and efficiently navigate among these applications in such a way that the actual activity of navigation is more natural for the user and, instead, the focus is on the task and the job at hand, not the actual applications. Portfolios can be totally personalized so that users can add the applications they use to their Favourites portfolio for easy access.

Usage Scenario 2: A new employee starts in your company and you want that employee to have access to all of the common corporate resources such as corporate policies, company benefits information, your corporate directory and electronic forms for performing various activities. A portfolio which includes all of these applications could be created and centrally managed by the Human Resources department and provided to each new employee when they start.

Integration with Lotus SmartSuite and Microsoft Office - Notes 4.6 offers superb integration with Lotus SmartSuite and Microsoft Office on a number of points using the Windows ActiveDoc technology. Here are a few of the highlights:

Use Lotus Word Pro 97, Microsoft Word 95, or Microsoft Word 97, as an alternate e-mail editor - it's your choice. Free Document Library application included to share and route documents with others securely using built-in workflow. Create proposals, budgets and presentations within Notes using the business productivity applications you're used to and route them around to colleagues using the built-in workflow capabilities in Notes and Domino.

System Requirements

Windows NT
RAM : 32 Mb minimum; 48 Mb or more recommended
Disk Space: 300 Mb minimum; 500 Mb or more recommended
Disk swap space: 64 MB

Windows 95
RAM: 16 Mb minimum; 24 Mb or more recommended
Disk Space: 150 Mb minimum; 300 Mb or more recommended
Disk swap space: 16 Mb

Installation Notes

Installing Domino and Notes with Software Distribution Utilities
You can install Lotus Domino and Lotus Notes with software distribution utilities such as the following:

Microsoft SMS
SystemView for OS/2 or NetView DM/2
Tivoli/CourierTM
and others

WBI (Web Browser Intelligence)

WBI is an electronic Internet "buddy" that keeps track of users' Internet activity and generally helps make Web browsing simpler and easier. WBI uses intelligent agent technology to reduce the Internet's complexity, helping both experienced and inexperienced users.

WBI (pronounced "webby") agent software simplifies and personalises Web use by:

* Noticing patterns in Web browsing and suggesting shortcuts.
* Automatically checking favourite Web pages for changes.
* Testing the speed of links between pages.
* Remembering a complete Web history, making it easy to return to a site.
* Searching through previously viewed information to find an information source.
* Letting users look back in "Web time" to see how they have visited pages in the past.
* Providing connectivity to both Proxy and Socks servers.

When the WBI agent is connected to a Web browser, it captures information about each page a users accesses. Over time, the agent learns usage patterns well enough to predict user patterns. The result, called "Quantum Link," advises the user about the associated page. This feature can be applied in teaching applications, information access, network management and even electronic mail.

WBI also tracks all Web use. To find information on the Fly Fishing page, users can search for all instances when that page was accessed and recreate the links for those instances.

WBI can also generate automated hot lists by analysing most frequently accessed or most recently accessed pages.

System Requirements

WBI Requirements Platform Windows 95, Windows NT or OS/2 Computer 486/66 DX2 Browser Any HTML 2.0 browser RAM 16MBDisk Space 5-10MB

Installation Procedures for Windows 95:

1.Download WBI.
2.Quit Netscape Navigator.
3.Run WBI20B3W.EXE and follow instructions.

Installation Procedures for OS/2:

1.Download WBI to a temporary directory.
2.Run WBI20B3O.EXE to self extract files.
3.Run INSTALL.EXE follow instructions.

Domino Intranet Starter Pack

Solutions for A Growing Business

Domino Intranet Starter Pack is a packaged solution that enables small and medium-sized businesses to take advantage of the Internet quickly and cost-effectively. It provides everything your business needs to leverage the Web. Increase communications both inside and outside your company, tap new markets, jack up efficiency and cement relationships with customers and suppliers.

At the heart of Domino Intranet Starter Pack are twelve ready-to-customize Web applications and the acclaimed Lotus Domino Web Server. These business solutions will help you track projects, contacts, orders, and documents; keep customers informed; and resolve problems without picking up the phone. Create an intranet to share information, project status and on-line discussions with the entire organisation. Attract and engage customers by creating a visually appealing company Web site. And establish enhanced, seamless communication throughout the organisation using Internet e-mail and calendaring.

Features

12 Ready-to-Customize Business Applications.

Choose from the following applications. All can be tailored to fit your company. Add other applications as your business needs grow.

Document Library.
 Make sure everyone in your organisation has 24-hour access to new and existing business information, including policies and procedures, sales presentations, proposals, contracts, company logos and more. Users can post documents to a central library anytime for others to share.

Employee Directory.
   Create a central online resource for up-to-date employee listings.

Company Forms.
 Don't waste valuable time hunting down expense or travel forms. Create one-stop
shopping for all administrative "paperwork".

Discussion.
Give individuals and groups an easy and accessible way to share opinions and solve problems on various topics: projects, industry issues, product development, and more.

Project Management.
Make sure crucial details don't fall through the cracks. Manage projects and tasks more efficiently by formally tracking input from multiple sources.

Customer Tracking.
 Improve customer service by collecting and tracking information on sales, order
status, and account activity.

Start growing your business on the Web now.

Internet E-mail. Essential communication for businesses that want to stay competitive. Domino Intranet Starter Pack features e-mail based on Internet standards SMTP and POP3, connecting your company to the world.

The Server That Won't Quit. The award-winning Lotus Domino server gives your business a solid foundation for your Web presence - and enables you to upgrade to more sophisticated applications and features as your needs grow. Lotus Domino has already helped companies significantly enhance efficiency, improve relationships, and lower costs.

A Choice of Clients. Domino Intranet Starter Pack supports popular Web browsers, POP3 mail and Lotus Notes clients. 5 client licenses are included. Choose Microsoft Internet Explorer, or opt for Lotus Notes clients that enable users to be productive anywhere. An extensive range of features in Notes clients help users harness the vast pool of information available on the Web. And manage day-to-day operations more efficiently with calendar and scheduling features.

Pull it all together. Fast.

Domino Intranet Starter Pack enables your company to rollout a comprehensive business solution to your entire workforce in a matter of days.

It's Rapid. Your Value Added Reseller can install and configure Domino Intranet Starter Pack services quickly. Once the applications are configured, anyone with a Web browser can create, edit and maintain their own Web site and intranet content.

It's Easy-to-Use. Even if it's your first time online, you can access and manipulate the information in the Domino Intranet Starter Pack applications. Just point and click and fill in the blanks. For example, users with authorisation can update Directory listings on the fly. No HTML knowledge is required.

It's Cost-Effective. Domino Intranet Starter Pack delivers custom applications without expensive programming. And your VAR can perform many routine administrative tasks online.

System Requirements

CPU Intel 80486 or Pentium processor.
OS Microsoft Windows NT 4.0 (Intel).
RAM Minimum 64 MB or more recommended.
Hard Drive Minimum 1 gigabyte, 4 gigabytes or more recommended.

Domino Intranet Starter Pack is available in the following languages:
Currently available - International English.
Available in June '98 - French, German, Italian and Spanish.
Available in July '98 - Dutch, Danish, Norwegian, Swedish and Finnish.
