

Snow White ReadMe File

Here are some tips to make sure that your *UAV Interactive Storybook* will work properly:

- 1) Make sure that **QuickTime 2.01** is installed (simply double click the QuickTime icon in the UAV Interactive Group while the Pocahontas CD is in your drive).
- 2) You must have at least a **2MB PERMANENT SWAP FILE** (but as large as possible is recommended). You can check this by double clicking the Control Panel Icon, then the Enhanced Icon, then the Virtual Memory Button. Consult your Windows manuals for more information.
- 3) Make sure the following line (or something like it) is in your CONFIG.SYS file:

DEVICE=C:\WINDOWS\EMM386 RAM NOEMS

- 4) Make sure the following line (or something like it) is in your AUTOEXEC.BAT file:

C:\DOS\SMARTDRV
