## General Information

All web sites were verified on August 16, 1997. Web sites sometimes close or change their service providers. As a result it is possible for sites we have described to be unavailable when you try to reach them.

If you receive a message indicating that the "page cannot be found" then it is possible that the information, or updated information, is available on the site, but the html page has a different name. Try going to the homepage of the web site and looking for an index. For example, if you link to:  
example.com/apples

and get a message indicating that the page is not found, try example.com and looking for an index.

To find other sites use one of the excellent web search sites including:

- yahoo.com
- webcrawler.com
- lycos.com

almost every site mentioned in this program has links to similar sites.
