DA Definitions

System 7-This lists desk accessories present anywhere on your disks and
alphabetizes them for identifying duplicates.   Holding down the <option> key
while selecting the item bypasses alphabetizing and lists the DAs according
to volume.   You may restrict the search to certain volumes using the
Specify Volume menu.   If you run out   of space, the entire list can be sent to
a printed report or text file in the Reports menu.
System 6-This lists desk accessories which are currently installed
either in the system file or through utilities such as Suitcase.

• DA Name = Name
   ◊ DRVR Size = Name of the file where the DA is located [System 6]
   ◊ File Name = Name of the file where the DA is located
   ◊ File Integrity =   Reports if file is damaged   [Registered +Checking On]
