Web Site

Visit our web site. As of this writing, 3/17/96, we are located at http://www.bluefin.net/~bobmanc/.
We will be moving within the next couple of months to http://www.ultranet.com/~bobmanc/.

You can download the latest version of GopherGolf and other GopherGolf courses created by registered users. If you have created a course you would like to share email it to us at bobmanc@bluefin.net.

Check out our other games and scenarios too.

Notes about sending courses:

- If uploading from AOL the file should be stuffed.
- If uploading from anywhere else the file should be stuffed and then binhexed.
- Make sure the course is really a course and not a saved game. The saved game files have an icon with a little sheet of paper in the middle. The courses don't.
- Make a note as to which monitor size the course was created for.
- Give your course, or group of courses, a unique name so other people can recognize it.
