

# Version History

Version 0.01 - July 1990

◇ Original written for Psion Organiser II, total size ... 1337 bytes!!!

Version 0.1 - November 1992

◇ Mac version. Barely worked, no features whatsoever.

Version 1.0 - Jan 7th 1993

◇ Vast improvement, but movement only by day.

Version 2.0 - Jan 25th 1993

◇ Added Print.../Save.../Interpretation capability.

Version 2.1 - Jan 28th 1993

◇ Movement between days faster [by week]

Version 2.1.6 - Jan 29th 1993

◇ Uses proper DITLs & DLOGs, not QuickBASIC windows!

Version 3.0 - Feb 20th 1993

◇ Added Print/Save/Interpretation capability.

Version 4.0 - Feb 14th 1993

◇ Can now compare charts.

Version 4.0.1 - Feb 15th 1993

◇ Fixed 11 minor bugs.

Version 4.1 - Feb 17th 1993

◇ Fixed another couple of minor bugs; able to save schedules with interpretations for each day.

Version 4.2 - Feb 19th 1993

◇ Improved 'Help'; now able to print and save schedules with interpretation for each day, over a choice of 6 different periods of time.

Version 4.3 - March 18th 1993

◇ Reorganised and vastly improved 'Help'; 'Delete' and 'Search' options added. Redesigned dialogs.

Version 4.3.5 - March 28th 1993

◇ Fixed bug with 'About dialogs; extra 'Help' page; 'Edit chart...' option added, reorganised menus; 'Last charts' menu added.

Version 4.3.9 - April 11th 1993

◇ Merged 'Edit chart...' and 'New chart...' dialogs; enlarged and enhanced some dialogs; fixed bugs with date strings.

Version 4.4 - April 22nd 1993

◇ Dumped 'More info...' option and added to 'Help'; added colour icons to dialog boxes; minor bug fix; gave 'Biorhythm Chart' window a title bar - is now movable.

Version 5.0c - December 15th 1993 - April 1995

◇ Total rewrite in THINK C 6/7 instead of QuickBASIC. It's probably fair to say that the change from versions 4.5 to 5.0c was greater than from 0.1 to 4.5!

Version 5.01c – April 1995 - May 1995

◇ A whole lot of bug fixes and improvements; long dates handled; 'Look for phases...'; 'Favourite Charts' has its own menu, with up to 64 charts; Macintosh Info; and much more.

Version 5.02c – May 1995

◇ More bug fixes and improvements, in particular Biorhythms Calendars, spinning cursors, and the ability to use any texture file that you have rather than the default one.

Version 5.03c – June 1995

◇ Huge number of fixes and improvements, in particular the reorganised Windows menu, great improvements to chart comparisons, printing, and searching made more efficient. A vital upgrade.

Version 5.04c – July 1995

◇ A few minor bugs fixed. The program should be much more resistant to crashes now. Improvements to custom controls and menus. Search and Fave Menu Editor zoomable. Compare Charts – big improvements.

Version 5.1c – August 1995

◇ Several bugs/crashes fixed. Improved Windows menus, colour toolbar, better controls, improved chart drawing, miscellaneous improvements.

Version 5.2c – October 1995

◇ Entire structure rewritten means a much better program. Bug fixes and new features too: new Scheme Editor, more Preferences, Colour bar, better toolbar, improved printing.

Version 5.3c – December 1995

◇ Improved printing, multiple comparisons greatly improved, chart tools window, menu reorganisation and bug fixes.

Version 5.4c – March 1996

◇ Greatly improved printing, Drag and Drop support, Handy Hints, bug fixes, transferred to CodeWarrior.
