FirstClass® Client 3.5
␡for Mac™ OS

Release Notes
October 18, 1996
SoftArc Inc.

Welcome to the FirstClass Client for Mac OS, version 3.5. FirstClass integrates e-mail with group conferencing, access to existing corporate databases, forms processing, real-time discussions, and online communications functions. Its graphical user interface makes FirstClass easy to use.

This ReadMe file describes the requirements for the software and provides instructions for installing the FirstClass Client.

Requirements

To install the FirstClass Client for Mac OS, you need a computer with:

• Macintosh System 6.0.4 (or later)

• at least 8 megabytes (MB) of free disk space, if you install all components

• at least 2 MB of RAM for 68K computers

• at least 3 MB of RAM for Power PC's

Add additional memory to improve performance.

Installing the FirstClass Client

To install the FirstClass Client for Mac OS, complete the following steps.

1. Double-click FirstClass Client Install. The splash screen appears.

2. Click Continue until the FirstClass Client Install dialog appears.

3. Select the installation location. If you do not want to install the application in the default location, click Switch Disk and choose the appropriate location.

4. Optional. Click New Folder to create a new folder for the FirstClass Client. If you do not create a new folder, the installation application will create one for you called FirstClass Client.

5. To install all components, click Install. The installation application installs the FirstClass Client.

6. To install only selected components, select Custom Install, and select the components you

want to install. (For information about a component, click the information button beside the component.) Then click Install. The installation application installs the FirstClass Client.

7. Click Quit.
