Meme Mining for Fun and Profit

By Broward Horne
DefCon 13

3-Part Presentation

- ◆ Tactical MemeMiner Parlor Tricks
- Operational S-curve theory
- Strategic Social Bandwidth

Dot Com Crash Continues?

Recent layoffs in 2005

1BM - 13,000

Sun – another 5%

GM - 25,000

GE - "reorganization"

Alcoa - 6,500

Winn Dixie - 22,000

Lear -7,700

Hypercom

BMC

Krispy Kreme

Cray

DHL

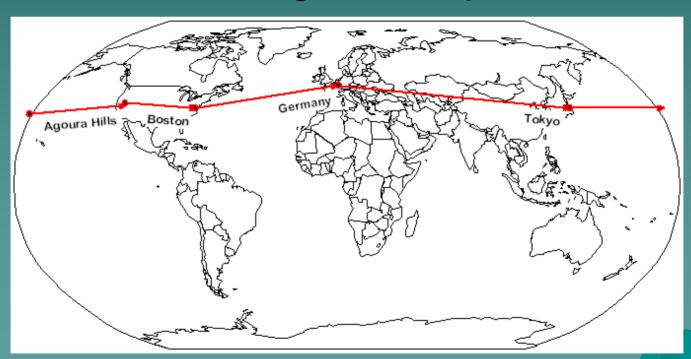

American Express

What To Do?

- Your time and effort are finite.
- The IT market changes constantly.
- What skills should you focus on?
- A mistake can be costly.

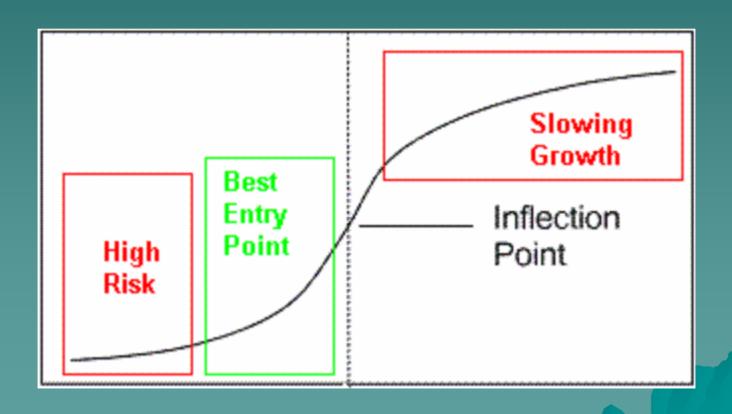

Me

- Why should you listen to me?
- Hacked some systems prior to 1991

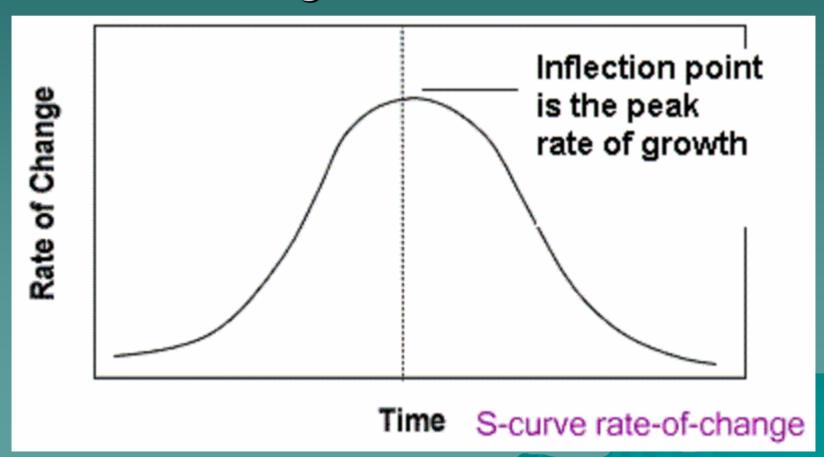

S-Curve

Fundamental business function

S-Curve

Rate of change in normal curve

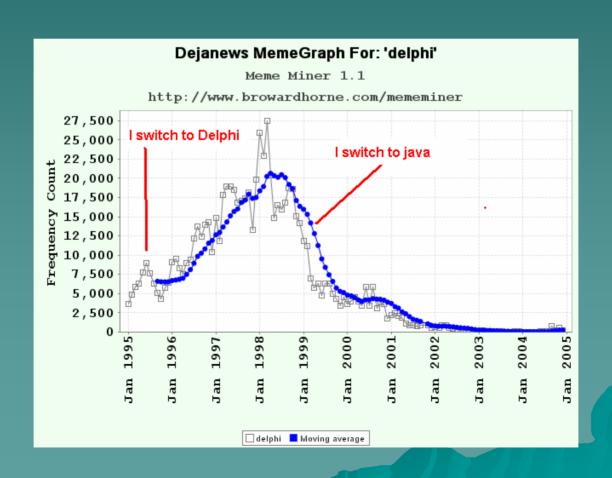

Meme Mining Theory

- Frequency count is proxy for S-curve
- Monitor technical trends
- Ride the S-curve

Example

Delphi Programming Language

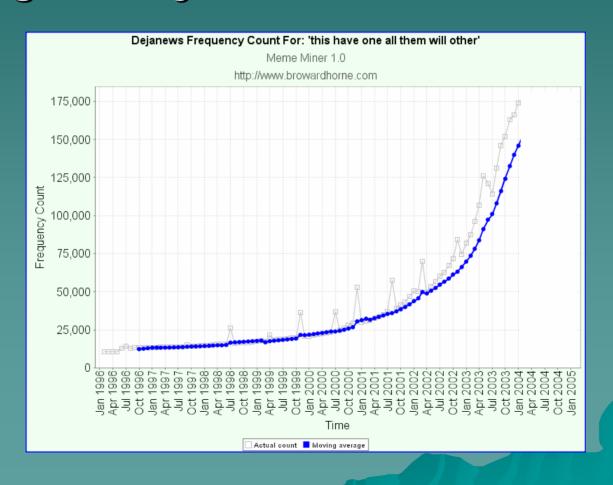

Meme Miner

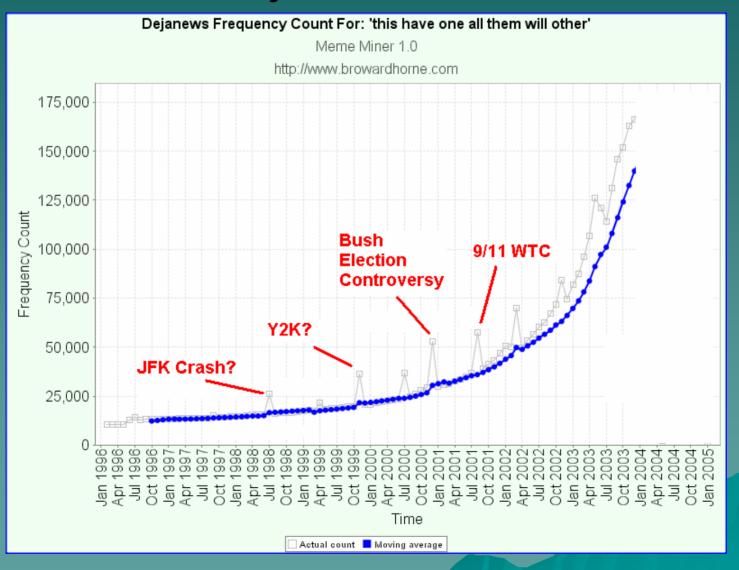

- Simple java program
- Executes sequential queries
- Builds chart with query results

DejaNews Frequency Count

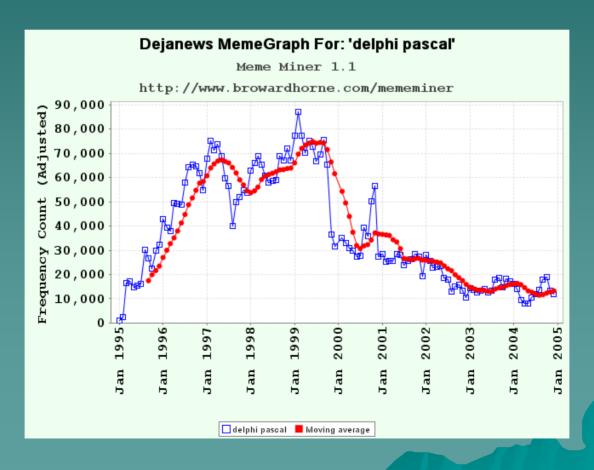

Rough Proxy for Internet Growth

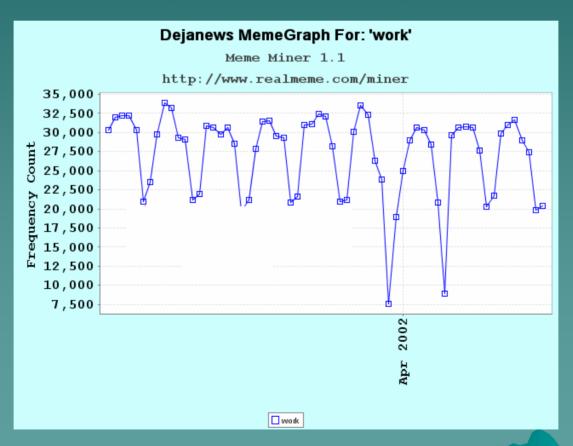

Major Events

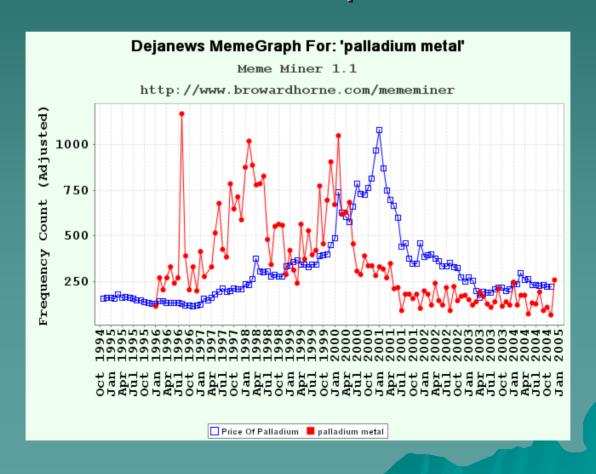

Delphi

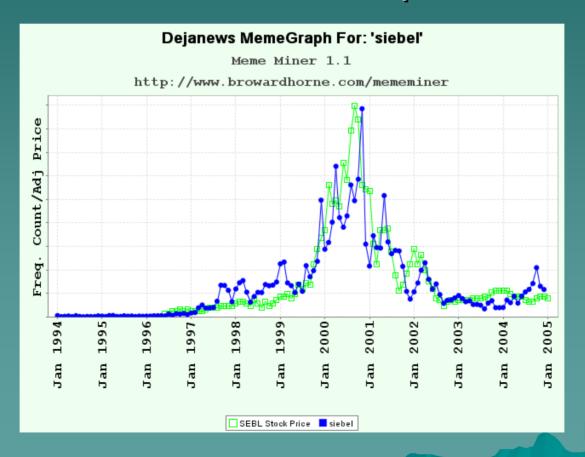

Work – can you identify the pattern?

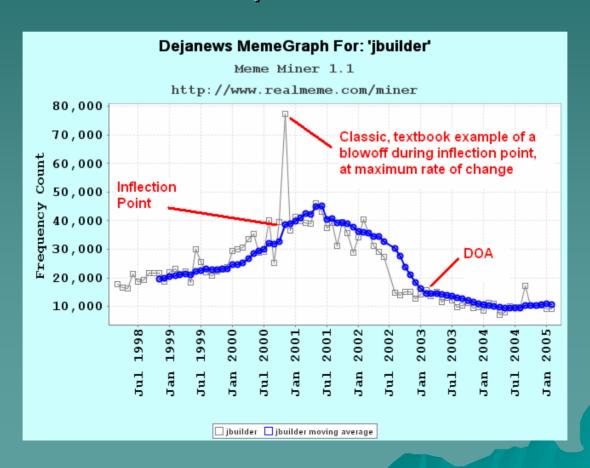

Palladium – rumors precede rise

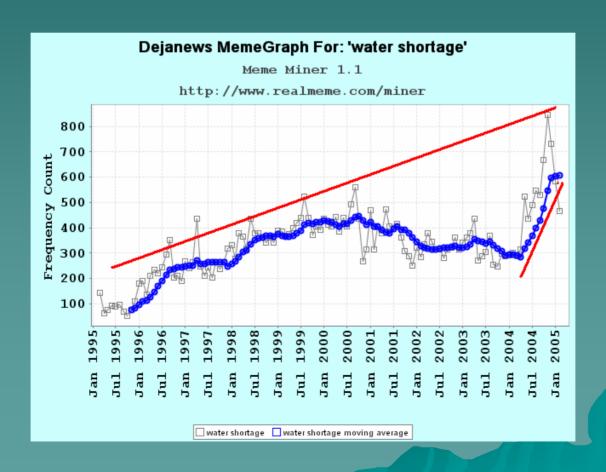

Concurrent with stock prices

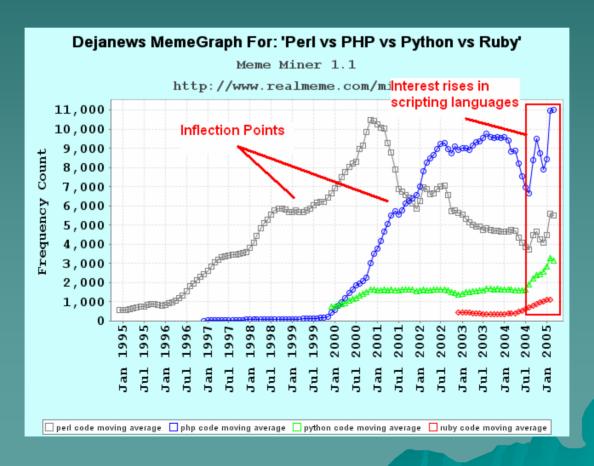

Classic S-curve points of interest

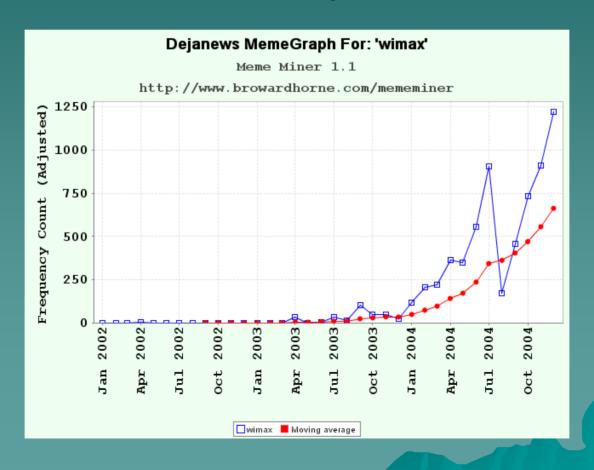

Water shortage

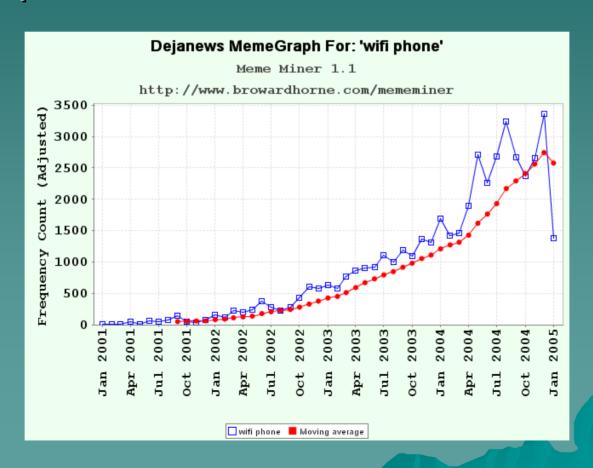

Trends in Scripting Languages

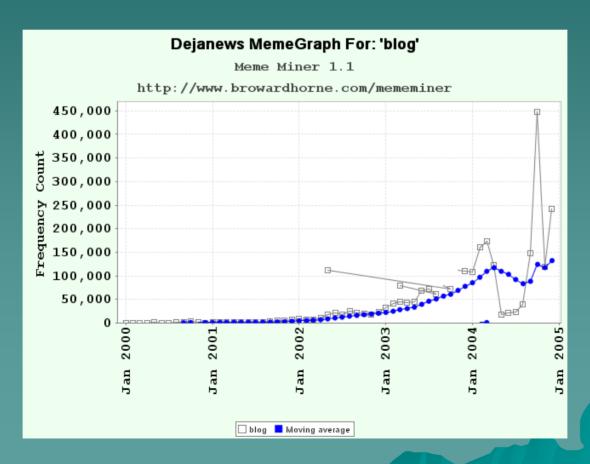

WIMAX about to explode?

Wi-fi phone is hot

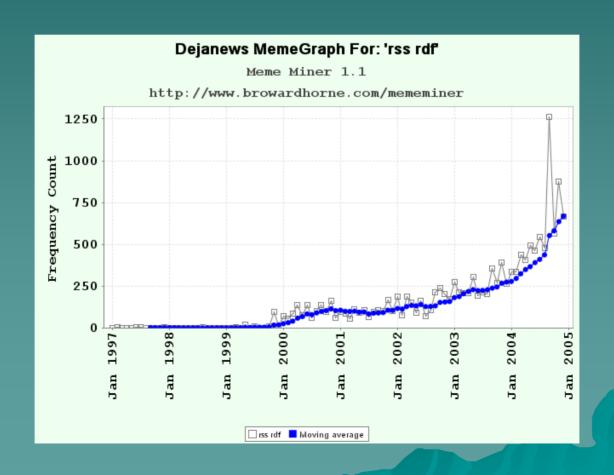

◆ Blogs (27% don't know what it is)

- Inflection tends to be at 50% point
- Inflection point is maximum hysteria

What can we predict about "blogging"?

RSS Feeds

Miner Deficiencies

- Requires knowledge of trend to test
- Subject to manipulation
- Not statistically rigorous
- Dependent on good keywords
- Works poorly for non-technical trends

Potential Improvements

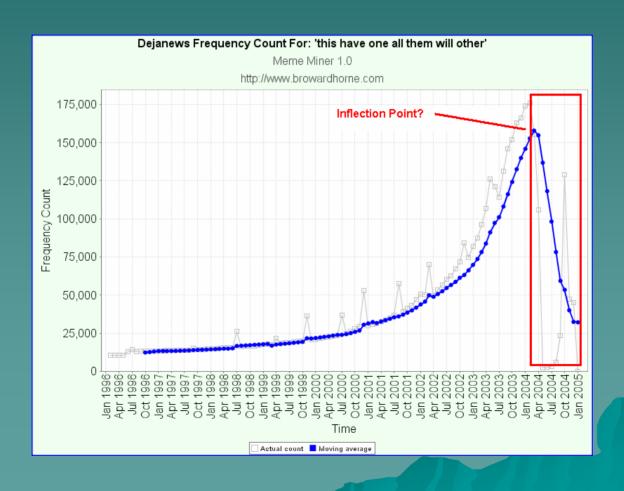

- Use RSS feeds to catch trend earlier
- Skewing factor for search engines
- Extract more abstract relationships

Internet S-Curve

- Has Internet Growth peaked?
- What happens if growth peaks?

DejaNews Anomaly

Market saturation?

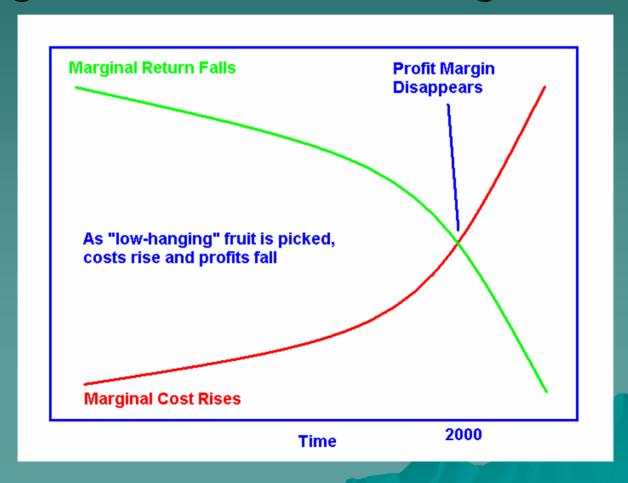

Social Bandwidth

- People have finite bandwidth
- People have finite storage
- Shared context impacts bandwidth

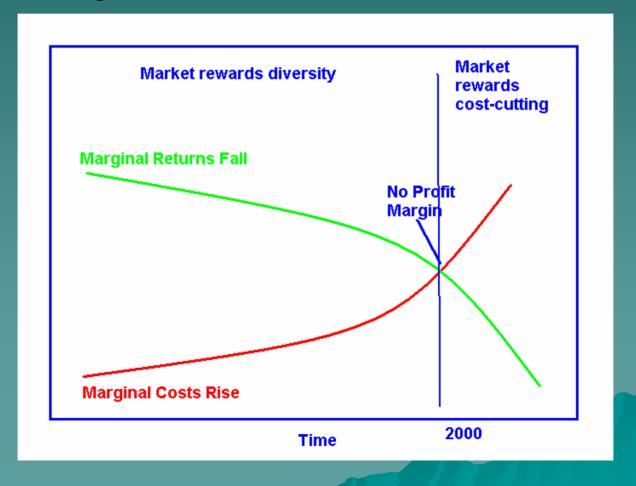

Cost of Information

Marginal Cost versus Marginal Return

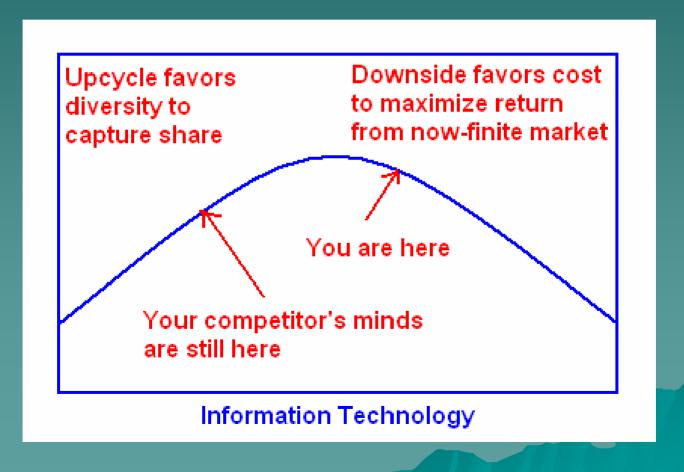

Cost Versus Price

Diversity versus Cost

IT Trend Change

Marginal cost exceeds return

Other Signs

Comdex shows no recovery
