## 1.3 Introduction to MassDL

Introduction

MassDL is a AWeb AREXX plugin meant to save locally the links and/or images you select of an HTML document.

Features:

- Easy to use (GUI)
- Remember last settings.
- Also command line.
- Default settings.

## 1.4 Requirements to MassDL

Requirements

MassDL requires:

- AmigaOS - only tested on v3.5
  - AWeb - only tested on v3.3
  - bguirexx.library and bgui.library for the GUI (1st one provided)
  - rexxdossupport.library (not included: © reasons)
- on Aminet: util/rexx/rexxdossupport.lha
- rexxsupport.library (provided)

## 1.5 Installation of MassDL

### Installation

Copy the Libs you need from "Libs/" to "Libs:".

Copy the script (MassDL.awebrx) file to wherever you want and config AWeb to run it. Examples:

Command: "RUN AWebPath:Plugins/MassDL.awebrx REQ"

Command: "RUN AWebPath:Plugins/MassDL.awebrx LINK"

Command: "RUN AWebPath:Plugins/MassDL.awebrx IMAGE LINK REQ"

## 1.6 Configuring default operations of MassDL

### Configuration

To set default settings in MassDL you need to edit the script file.

First of all and before you run the script you should set the default dir for saving the Leched files (1st Config line).

You can set a default pattern for image and/or link lechs (2nd & 3rd Config line). You can set if by default you want the GUI to appear or not (1 or 0) (4th Config line). You can also set that by default the Link Lech and/or Image Lech is set (set to 1) (5th & 6th Config line).

## 1.7 Usage of MassDL

### Usage

Command Line: MassDL.awebrx [LINK] [IMAGE] [REQ]

All are optional and the order or letter case are not important. You may use one or all of them.

LINK to set Link DL (Download).

IMAGE to set Image DL.

REQ if you want the GUI to appear.

GUI:

At the left we have options for the Link DLs. Select the box to enable and use "->" to copy the pattern you choosed to the pattern for the images.

At the right you can discover yourself. :)

On the Bottom-Right there is a check button with an "r" that will enable the options you made to be remembered next time you run the script. When the options are remembered it is by default already selected.

This is useful if you repeat the same operation more than once. No need to set the same options, just press the box so that next time the options start the same.

To abort the operation just dont select any of the check buttons.

---

## 1.8 MassDL Thanks

Thanks

Thanks must go to:

- Jilles Tjoelker for the rexxbgui.library reducing my work on this one.

## 1.9 MassDL History

History

Version 1.0 (10.02.00) - initial release.

## 1.10 To do in MassDL

To do

- Reduce library use.
- Extend support for other browsers.
- Add other options in main GUI.

Send your suggestions to [me](#)

## 1.11 About the Author

About the Author

MassDL package was written by Jose Andias.

If you have something to say to me (questions, critics, suggestions, wishes, bug reports or whatever) please contact me by EMAIL:

[jose\\_andias@softhome.net](mailto:jose_andias@softhome.net)

I'm from Portugal.
