

72 Creating Sets

Written by Jud Spenser Published Date March 2, 1988

You cannot add a record to a set until the record has been saved

You cannot add a record to a set until the record has been saved. Therefore the following layout procedure will not work correctly when first adding the record.

```
Case of  
  : (During)  
    If (xOK=1)  
      ADD TO SET("DayInvoice")  
    End if  
End case
```

You should replace it with the following Global Procedure.

```
DEFAULT FILE([File1])  
ADD RECORD  
If (Ok=1)  
  ADD TO SET("DayInvoice")  
End if
```
