PROFESSIONAL EXPERIENCE

COMPUTING COMPANY • City, State 1970 to present
(\$12M manufacturer of transaction hardware and software • 3 divisions • 250 employees)

Senior Vice President / Systems Development (1985 to present)
Member / Board of Directors (1980 to 1986)
Vice President / Computer Systems and Services (1974 to 1985)
Manager / Software Development and Computer Operations (1970 to 1974)

Accomplishments:

- Spearheaded the successful development of company's transaction services business from start-up to consistent profitability for 14 years, the primary source of cash flow for company.
- Created all high volume, quick response on-line transaction processing systems and services including: check authorization, credit authorization, electronic mail distribution, time reporting system, and EFT transaction system.
- Designed, developed, implemented, and managed host systems and computer centers. Concurrently managed field service department, with responsibility for total operating budgets and staff of 40.
- Directed R&D department consisting of 8 software engineers, 1 electrical engineer, 1 mechanical engineer, and 3 support staff. Objectives included the completion of the LINK product line (family of intelligent transaction terminals for the POS and credit card environment) and the design of new host software systems.
- Achieved the successful transfer of transaction services to a new division, consolidating both human and technical resources to realize significant cost savings.
