Garaj Dhor
Apartments 201, 202, 203, 204 & 205
710 Park Avenue West
New York City, NY

<u>PERSONAL:</u>
Birthdate: 12/12/1949   Married, 12 Children   5'1"   104 lbs.
Birthplace: Calcutta, India   Student Visa

<u>EDUCATION:</u>

	INDIAN INSTITUTE OF TECHNOLOGY, Bombay, India	
1977	Ph.D. Animal Psychiatry	Class standing: 2nd out of 10 million
	Dissertation: An Algebraic Model of Natural Bat Mating Processes	

1975	HARVARD UNIVERSITY, Cambridge, Massachusetts	
	M.B.A.	Class standing: 699 out of 700

1973	ABACUS INSTITUTE FOR COUNTING, Poonatang, Bangladesh	
	B.S. Music Appreciation	Class standing: 1st out of 30 million

<u>MISC.:</u>   Mensa Member
Voted "Most Polite Graduating Senior" by fellow classmates
4 page list of additional college degrees available upon request
Fluent in 25 languages and have traveled extensively worldwide
No work references available but can provide extensive list of professor
Author of the best seller: <u>Obtaining US Student Aid,</u> Bombay Press, 1977

<u>EXPERIENCE:</u>
1981 to   INTERNATIONAL BUSINESS MACHINES (IBM), Armonk, New York
present   <u>Member Technical Staff,</u> Corporate Planning Department
Designed the user interface for the popular IBM PC. Also conducted scientific research requiring synthesis and utilization of hitherto thought problematical heuristic, deterministic and stochastic processes and techniques (i.e., Monte Carlo, LaPlace, Exponential Smoothing, Topographical Analysis, Coin Toss, Fourier, Random Walk, Make-a-Wish, multivariable regression, et al). to attempt to determine the optimum degree of complication attainable in the PC/DOS operating system. Served as official liaison with Microsoft Corporation and was instrumental in establishing much of their design methodology which has since been extended to MS/DOS, Word, and the entire Microsoft product line.

1977 to   GENERAL MOTORS CORPORATION, Detroit, Michigan
1981   <u>Member Technical Staff,</u> Corporate Planning Department
Authored GM's strategy for competing with the Japanese automobile industry. Developed a set of labor relations policies and procedures based on the Indian caste system that were implemented in response to the Japanese quality circles. Used sophisticated computer algorithms to establish a weighted priority cost containment system that resulted in tripling the styling department budget, quadrupling the television advertising budget while curtailing excessive expenditures for product engineering and quality

control. Previously assigned to the Mergers and Acquisitions Department where I was responsible for evaluating and rejecting a proposal to acquire a small German automobile manufacturer whose products were judged too expensive for the U.S. market (Bavarian Motor Works-BMW).

OBJECTIVE:
Prefer pure research as opposed to development environment–work best in theoretical environment without the pressure of deadlines, schedules, budgets, reporting, interruptions, or office hours. A dual ladder system is preferred with equal or superior status, perks, pay, and authority to the traditional corporate officer (CEO). Massive stock options and bonuses required. No overtime will be considered. Will not relocate. Employer must be willing to pay tuition and related expenses for pursuit of additional advanced degrees. Must have secretary and good parking place plus large attractive private office. Celebrates all Hindu, Moslem, Jewish, Catholic and Protestant holidays.

COST SAVINGS:
I can bring 30-50,000 highly educated friends and relatives to your company's payroll within the first few weeks after I am hired. You will save millions in employment agency and search fees. All that is required is assistance obtaining student visas. Most of them have more degrees than a thermometer and can speak at least 20 languages fluently. They are all Mensa members. All are extremely polite. Prefer an employer with an employee referral bonus program.
