

# Installation

## Installing Solitaire Till Dawn

Installing is easy. Just copy the file Solitaire Till Dawn onto your hard disk. It can go into any folder you like.

You'll probably want to copy the rest of the Solitaire Till Dawn package as well: this document, the Games Guide, the Sample Games folder, and the Read Me file. But they are optional; only Solitaire Till Dawn itself is required for play.

## Requirements

Solitaire Till Dawn requires System 7.0 or later, and a color-capable Macintosh. A monitor at least 13" in size and displaying at least 256 colors is recommended, although the program will run on any size monitor and at any color setting from 16 colors up to millions of colors.
