

# INTRODUCING THE MOST POWERFUL PAGEMAKER EVER.

( JUST ADD PAGETOOLS 2.0 )

Adobe PageMaker® 6.0. has finally arrived. And while it packs quite a punch, there's an easy way to add even more power. It's called PageTools™ 2.0. A collection of 18 powerful plug-ins that let you work faster, easier and more efficiently in PageMaker 6.0.

#### NOW YOU HAVE 8 MORE REASONS TO BUY PAGETOOLS.

We've added 8 all-new plug-ins and updated the 10 original ones that have made PageTools a worldwide bestseller.

The heart of PageTools, PageBars, is now even better. Instead of a single customizable toolbar, you now have access to an unlimited number of toolbars and you can choose to display toolbars as free-floating palettes or embed them to the sides of the screen.

And that's just the beginning. Olav Martin Kvern—PageMaker expert and author of the bestselling *Real World PageMaker*—has contributed many new components from his most requested features list. His Plug-ins which have been added to this collection include tools which apply character styles and tab settings to selected text instead of the whole paragraph, draw crop marks and registration marks around selected objects or anywhere on the page and display an on-screen PageMaker tip-of-the-day.

In addition, PageTools 2.0 also lets you scale multiple objects simultaneously, view a portion of the page at magnification levels up to 800%, measure objects naturally with floating horizontal and vertical rulers, and add, delete or duplicate guides—even column guides—with unprecedented ease. PageTools can also count the number of characters, words, and paragraphs in a range of selected text, a text block, an entire story or publication.

Bottom line, this collection of plug-ins will make you so much more productive and precise you'll wonder how you ever got along without them.

#### MORE TOOLS, GREAT PRICE, GUARANTEED TO WORK.

Try to put together this collection yourself and you'll wind up paying close to \$1,000. PageTools, on the other hand gives you a wide range of plug-ins that are designed, tested, and guaranteed to work together.

# INTRODUCING PAGETOOLS 2.0 — MORE TOOLS THAN YOU CAN SHAKE A T-SQUARE AT!

## PAGEBARS

PageBars brings the one-click convenience of toolbars to PageMaker, offering instant access to hundreds of PageMaker commands, tools and menus. Toolbars can be displayed as free-floating palettes or embedded at the top, bottom, right and left sides of the screen. All PageTools plug-ins are accessible through toolbar buttons and Hot-Help is available for all buttons.

- Access to multiple toolbars.
- The option to display toolbars as floating resizable palettes or embed toolbars on the top, bottom, right and left sides of the screen.
- Directly access difficult to remember characters such as <sup>™</sup> <sup>®</sup> <sup>©</sup> —, or hidden kerning commands.
- Move, group and customize space between toolbar buttons.
- Hot Help available for PageBar buttons.

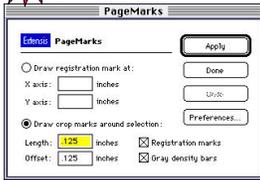

## PageGlossary

PageGlossary automatically enters commonly used bits of text and graphics into your document—both with or without formatting.

- Quicker than cutting and pasting from a scrapbook.
- Will maintain all of PageMaker's intricate style attributes.
- Supports user defined hot-keys.
- Import and Export option allows transfer of glossary entries.

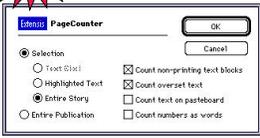

## PageMarks

PageMarks automatically draws crop and registration marks around selected objects or at any specified location on your page.

- Gives you the ability to draw crop marks and registration marks at user-specified locations.
- You can set the coordinates at which you want to position a single registration mark.
- If you want to draw crop marks, you can control the length of the crop marks, their offset from the selection, and whether the plug-in adds four registration marks around the selection.
- The option to include gray density bars.

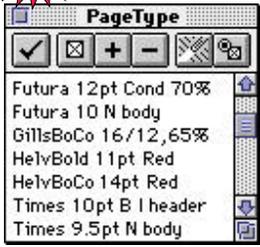

## PageCounter

PageCounter quickly counts the number of characters, words, placed lines and paragraphs in selected text, a text block, an entire story, or the entire publication.

- Options to count numbers as words and non-printing text blocks.

## PageType

PageType quickly applies character styles to selected text, without affecting the entire paragraph. Ideal for applying commonly-used type styles to text without having to use the Type Specifications dialog.

- Makes it easy to apply even the most complex character formatting with a single keystroke or mouse click.
- User can define any combination of font, size, style, color, width, kerning, tracking, position, case, leading, or type options to define and apply from one selection to another.
- Import and Export Format options allow transfer of formats.

## PageTips

PageTips displays a "tip-of-the-day" each time you launch PageMaker. Written by Adobe Magazine columnist and Real World PageMaker author Olav Martin Kvern, PageTips contains hundreds of timesaving PageMaker tips for both experts and novices alike.

- View several tips at a time or search for tips by topic.
- Option to display at startup, shutdown, neither, or both.

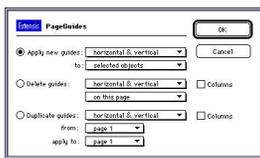

## PageCaps

PageCaps changes the case of selected text to ALL CAPS, Title Caps, Sentence caps, lowercase, or RaNdOmCaPs™.

- Includes an exception list for words you want capitalized a certain way (such as PageMaker).
- Access commonly used functions from PageBars.

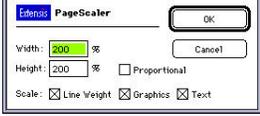

## PageGuides

PageGuides enables you to add, delete, or duplicate guides—even column guides—with unprecedented ease. PageGuides quickly and accurately applies guides to the edges or centers of selected objects without having to measure or drag anything! With PageGuides, adding, deleting, and duplicating guides has never been faster or easier!

- Now supports PageMaker 6.0 Polygons and multiple master pages.
- Apply horizontal and/or vertical guides to the centers or edges of objects.
- Apply guides to selected objects, all objects on a page or all objects in a publication.
- Delete horizontal and/or vertical guides from a page or a publication.
- Duplicate horizontal and/or vertical guides from one page and apply to any page.
- Directly access several PageGuides commands through toolbar buttons.

## PageScaler

With PageScaler you can resize a group of objects while maintaining the aspect ratio of the original layout. You can also shrink or expand a page, chart, publication, or instantly resize an advertisement to fit a new publication.

- Resize a selected group of objects in a single step.
- Scale text, line widths, and graphics.
- Option to scale proportionally, or width and height separately.
- Resize objects from 10% to 3,000%.

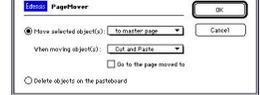

## PageZoom

PageZoom offers a "floating magnifying glass" that allows you to select a portion of the page at magnification levels up to 800%. The PageZoom window is always available so you can view both fine detail and the overall page simultaneously, without toggling between view sizes and waiting for PageMaker to redraw.

- Magnification levels of 100%, 200%, 400%, or 800%.
- The resizable floating PageZoom window can be moved to an unobtrusive location.

## PageMover

PageMover moves selected objects to any page in the publication—even master pages—so you can work without interruption. Additionally, PageMover can move objects to the pasteboard and clear the pasteboard with one click.

- Now supports PageMaker 6.0 multiple master pages.
- Move objects to the top, bottom, right, or left side of the pasteboard.
- Cut or copy selected objects to another page, all pages or all master pages.
- Clear your pasteboard to remove unwanted objects that could needlessly increase the publication's file size.

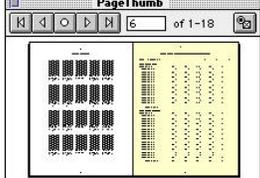

## PageRulers

With PageRulers, you can measure objects naturally without having to continually move the PageMaker ruler's zero position. Now you can have the convenience of horizontal and vertical rulers that float over your publication for additional measurement flexibility.

- Display up to 40 horizontal & vertical rulers.
- Constrained ruler movement and resizable rulers offer precise ruler control.
- Snap to selected objects.

## PageThumb

PageThumb is the ultimate publication navigator that displays thumbnail previews of any page or spread without interrupting work on the current page. PageThumb also offers adjustable preview resolution and several options for moving quickly and directly to any page in the publication.

- Preview any page in your publication.
- Move to the previewed page by clicking on the displayed page in the PageThumb window.
- Quickly preview the first, last, previous, next or simply type in the page you want to preview.
- View navigational information regarding the page you are previewing and the number of pages in the publication.

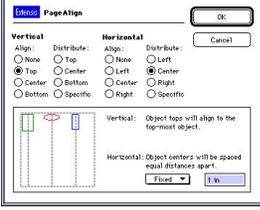

## PageTabs

PageTabs allows you to quickly record and apply tab settings to selected paragraphs, without affecting your paragraph style. Ideal for working with tables and figures.

- Placement button allows the user to select and apply frequently used tab formats such as "Place a tab at the current cursor position."
- Import and Export Format options allow transfer of formats.

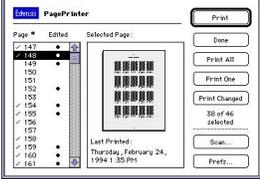

## PageAlign

PageAlign offers professional alignment and distribution capabilities for objects such as text, rectangles, ovals, polygons and graphics. PageAlign's powerful alignment and distribution options make creating uniform object arrangements quick and easy.

- Fixed or even object distribution.
- Custom distribution of objects.
- An illustrated preview of the selected object arrangement in the PageAlign dialog box.
- Several PageAlign commands such as "Repeat last alignment" available as toolbar buttons for one-click access.

## PagePrinter

PagePrinter takes the guesswork out of printing by offering an easy-to-use print dialog box that previews pages before printing, finds pages that have been edited, and offers unlimited page selection. With PagePrinter's easy-to-use dialog box, printing has never been so easy or precise.

- Preview each page before printing.
- Scan the publication for edited pages and print only edited pages.
- Display the time and date an individual page was last printed.

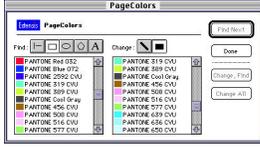

## PagePreview

PagePreview makes it easy to locate the publication you want, without wasting valuable time opening and closing publications.

- Preview the first five pages of a publication.
- Save previews automatically when you open and save a publication.

## PageColors

The PageColors plug-in works similarly to the find and change feature in the Story Editor, but finds and changes the color of objects such as lines, ovals, polygons, rectangles and text throughout your publication.

If you work with colored objects, PageColors is a convenient plug-in that makes color changes quick and easy.

- The option to change each color occurrence either one at a time or all at once.
- Now supports PageMaker 6.0 Polygons.
- Searches for multiple colors or object types.
- Change lines, fills or both.
