

## About the ColorSwitch Pro Installer

This installer creates a folder called "ColorSwitch Pro 1.2.0 f" on your hard drive -- which contains documentation, release notes, and other important files for ColorSwitch Pro -- and places the latest version of ColorSwitch Pro™ in your Control Panels folder.

### Installing the Software

- If you are using any anti-virus utility other than Disinfectant™, please turn it off before proceeding. Anti-virus utilities such as Virex™ or SAM™ tend to interfere with installers.
- If you have renamed any of your ColorSwitch Pro modules, you should remove them before installing. This installer will not recognize them during the installation process.
- Use the Drive button to select the disk where you would like to have the software installed.
- Click the Install button to begin the installation. The installer will place all files in a folder named "ColorSwitch Pro 1.2.0 f" on the selected disk.
