

UMAX - User-Editor for Maximus 3.0
What's new?

1.23a: New Author Address

1.23: USER-ADD function implemented

1.22: Internal Revision

1.21: UMAX will ask the path and filename for the user files and access database, if they will not be found in the path given in max.prm (possible in networks)

1.20: UMAX now reads the max.prm file to find the correct path for the user files and the access-database (access.ctl).

The Registration-Reminder-Window will now be displayed for only 5 seconds.

Some minor bugfixes.

1.11: Only the possibility to register it via CompuServe's Shareware-Registration-Database

1.10: English helpfile

1.00: First released version
