# *OVERVIEW*

**This is the first line of the overview topic in the help demo database.
The previous line did not have any <u>link</u>, while this one does.**

**Press the Enter key to view the link topic help page.**

# This is the 2nd screen

**Welcome to the link help page, since this is a demo help database, we know that you arrived to this page from the <u>overview</u> page, by pressing the link hot-link. In this page we will demonstrate the ability to include 2 different names (or more) that will take us to the same link.**

**Example :**

# *TOPIC*

*Well.. it seems as if you succeeded to reach this point by yourself, this is the 3rd page of the HELPDEMO help database. From this help page you can go to the <u>previous</u> help page, or to the <u>entry</u> help page.*

*Have fun using the help compiler and help engine ..*

*Notice - this line demostrates the use of a ~ in a text page.*
*(Please refer to the HELPDEMO.HDF file for an example .. )*

*There are more pages you can get to from here - One of these links is defined in a <u>.INCLUDE</u> file. Please refer to the helpC documentation for HDF syntax.   Notice how you get a <u>Popup</u> here!.   And try the <u>Sound</u> here!.*

*Click <u>Here</u> to see the time.*

# *INCLUDE*

**This link was defined in a seperate help definition file (HDF), and was included in this data-base using the .INCLUDE command of the HDF syntax.**
