Help Demo

by Julian Smart

Contents

Introduction
Chapter 2

Introduction

This is a demo document for the wxWindows 'help' sample.

You should process this file with Tex2RTF, for example:

```
tex2rtf -winhelp -twice doc.tex doc.hlp
```

and then run:

```
hc doc
```

where hc is the help compiler.

Note that you can also generate HTML and Word RTF with Tex2RTF.

About

Chapter 2

Another chapter in this enticing little manual.

Classes

This would say something about classes, but doesn't yet.

Functions

This would say something about functions, but doesn't yet.

About

About this HelpDemo: this file is really not much of a demo, but it's a start.
