Fonts You Can Install

Displays the list of fonts you can install. To install, select the fonts and choose Install from the Fonts menu. To search for more fonts, choose Find Fonts from the File menu.

Fonts Installed In Windows

Displays the list of fonts currently installed in Windows. The fonts are displayed in your software application font menus. To un-install fonts so that they are available to install again later, select the fonts and choose Un-Install from the Fonts menu.

Find Fonts

Click to open the Find Fonts dialog box to search for fonts on specified drives.

Download To Mass Storage

If available, select to download fonts to the printer's hard disk or storage memory.

Unload From Mass Storage

If available, select to remove fonts from the printer's hard disk or storage memory.

Print

Choose to print font samples that are selected from the main screen in either list.

Print Setup

Choose to change default printer and print options.

Exit

Choose to close FontSmart.

Install

Choose to install fonts selected from the Fonts You Can Install list. Installed fonts appear in the Fonts Installed In Windows list.

Un-Install

Choose to un-install fonts selected from the Fonts Installed In Windows list. Un-installed fonts appear in the Fonts You Can Install list. To un-install fonts, select the fonts from the Fonts Installed In Windows list and choose Un-Install from the Fonts menu.

Delete

Choose to delete fonts selected from the Fonts Installed In Windows list or the Fonts You Can Install list. Deleted fonts do not appear in either list and are not available to install again.

Magnify

Choose to display larger samples of the selected fonts in the Magnify window.

Info

Choose to display detailed information about the selected fonts.

Printer Fonts

Choose to display the fonts that are present in your printer and the equivalent screen fonts that will be used in Windows.

Sort By Name

Choose to sort lists by font name.

Sort By Appearance

Choose to sort fonts lists by appearance, with similar-looking fonts grouped together.

Show Directories

Choose to show drive names and directory paths for fonts in the Fonts You Can Install list. Deselect to show only the font names.

Show Drives

Choose to show or hide fonts on selected drives in the Show Drives dialog box.

Create Font Samples

Choose to create small font samples for all fonts.

Sample Size

Choose to select the point size for font samples displayed in the main window.
