How to install PC Type 1 fonts with Adobe Type Manager:
NOTE: Never Install a TrueType and Type 1 font that have the same name.

From Windows 3.x

Installing Type 1 Fonts (You must use Adobe Type Manager)

In Program Manager, open the Main group and find the ATM icon; double-*click* it.

The ATM Control Panel opens.

Select the Add button; the "Add ATM Fonts" window opens.

In the "Directories" window, select (double-*click*) on your CD-ROM drive letter.

When the CD-ROM opens, you'll see several named folders.

Open the FONTS folder.

You'll see a list of numbered sub-folders; find the number of the font you want to install and double-*click* on it.

Each numbered folder contains two sub-folders. Each sub-folder name repeats the font number followed by True or Typ1 to indicate the font type.

Open the Typ1 folder. You'll see the font's name appear in the "Available Fonts" window.

Select the font name (*click* it once) and *click* "Add" to add the font to your system.

NOTE: Never install a TrueType and Type 1 font with the same name.

From Windows 95

Installing Type 1 Fonts (You must use Adobe Type Manager)

From the Windows task bar, select Programs/Main/ATM Control Panel.

Select the Add button; the "Add ATM Fonts" window opens

In the "Directories" window, select (double-*click*)on your CD-ROM drive letter.

When the CD-ROM opens, you'll see several named folders.

Open the FONTS folder.

You'll see a list of numbered sub-folders; find the number of the font you want to install and double-*click* on it.

Each numbered folder contains two sub-folders. Each sub-folder name repeats the font number followed by True or Typ1 to indicate the font type.

Open the Typ1 folder. You will see the font's name appear in the "Available Fonts" window.

Select the font name (*click* on it once) and *click* "Add" to add the font to your system.

NOTE: Never install a TrueType and Type 1 font with the same name.
