*.SCF Files do not play
Ali M. Mayassi, Annadale, VA, USA

In the Oct. 28, 1992, Volume 2-11: when I play all files with *.SCF (HYDESHW.SCF, POSSHW.SCF, WAITSHW.SCF), I get the following message: NAUTILUS ERROR Can't be opened or played from NAUTILUS shell. File type "Score" is undefined. playFile: undefined type: SCORE.

Any suggestions?

Can't Meet Customer SVCs
Charles Perrin, Abilene, TX, USA

I get error messages displaying "Meet Customer Services." It is "Play File: undefined type: SCORE."

N:
We heard from hundreds of you on this one! Unfortunately, these files can not be played through the shell on Vol. 2-11. However, with the upgraded Startup on this issue, Vol. 2-12, you can access the .SCF files from Vol. 2-11. We have also included the MediaBlitz! Score Player for your use in the Multimedia section.

We apologize for any inconvenience this may have caused and hope you will now take a look at the MediaBlitz! files from last disc.
