MultiPro 386SX
Lotus 1-2-3 Multimedia Workstation
from
Technology Integrated Products, Inc.

Main Features

*   Fully **MPC** compatible and **MPC** Licensed
*   **Lotus 1-2-3 for Windows with Multimedia SmartHelp** installed
*   80386SX-25MHz CPU
*   Media Vision Pro Audio Spectrum 16 sound card
*   Pair of Superb Quality **MLi** Multimedia Speakers
*   Fast internal CD-ROM
*   Built-in Super VGA
*   Complete and ready to run Multimedia system
*   One year on-site service

Multimedia Workstation

The new MultiPro 386SX is the first Multimedia PC designed specifically for the business environment. The MultiPro 386SX is a complete and ready to run desktop computer with full sound, graphics, and CD-ROM capabilities. We built the MultiPro 386SX to take full advantage of the new Lotus 1-2-3 for Windows with Multimedia Smart Help spreadsheet software to create a workstation that is easy to use, powerful, and yet economical. However, the MultiPro 386SX will run all standard software including all Multimedia PC software. The MultiPro 386SX is not a game machine. It comes with a long list of features from the 25 MHz CPU to the wide frequency response speakers. This is a system that's designed to be useful for years to come.

Lotus 1-2-3 for Windows with multimedia Smart Help

The world's most popular spreadsheet is now the world's easiest spreadsheet to use. Lotus 1-2-3 is now on CD-ROM and can show you using sound and animation exactly how to create spreadsheets. You no longer have to read boring manuals or use the trial and error method to create spreadsheets and graphs. With this new Lotus 1-2-3, you can watch an on screen animated movie that shows you step by step how to create spreadsheets, graphs, print, save files, and many other functions. And, while you're watching a movie, you can toggle back to your spreadsheet to perform those functions as you go along. You can create complex reports in a matter of minutes so you can use your time better. Lotus 1-2-3 for Windows with Multimedia Smart Help is the biggest productivity enhancement since the release of the first Lotus 1-2-3.

Complete and Ready to Run

The MultiPro is a complete turn-key system. The system is already pre-configured for optimum performance and has MS-DOS, MS-Windows, and Lotus 1-2-3 installed on the

hard disk. The MultiPro box includes the computer, the speakers, a keyboard, a mouse, power cords, system manuals, MS-DOS software package, headphones, and a microphone. All that's needed is to take everything out of the box, plug in the speakers, mouse, keyboard, and power, connect the VGA monitor, and turn it on. You can start work immediately. The MultiPro 386SX has been engineered with the non-technical user in mind. You don't have to be a computer expert to become an expert in Lotus 1-2-3. If you're concerned about reliability our free one year on site service should ease your mind. And since the MultiPro 386SX is assembled in the USA you'll be supported by an American company.

Compatibility

The MultiPro 386SX runs all standard PC software plus runs all software written for the Multimedia PC standards. The MultiPro 386SX meets and exceeds the rigid standards set by the Multimedia PC Marketing Council so compatibility is ensured. Many computer companies say their computers are "MPC compliant" but this means nothing unless you see the MPC logo on the computer itself. The MultiPro 386SX has the MPC logo on the front of the computer so you can easily determine which system in your office is MPC compatible. When comparing systems you can find out if a system or software is Multimedia PC certified or not by calling the Multimedia PC Marketing Council at 202-331-0494.

Best Value

The MultiPro 386SX is the best value for your money for any computer. Not only do you get a high quality USA system but you get the most advanced spreadsheet workstation at an affordable price available. If you would like to compare technical specifications please review the specifications listed on this datasheet. You will find that the MultiPro 386SX is the most cost effective computer you can buy today.
