Felix Computer Aided Technologies GmbH

Version 3.1b December 3, 1997
Copyright (c) 1995-97 Felix Computer Aided Technologies GmbH.
Portions copyright (c) 1996-97 FCAD Canada Software, Inc.

Welcome!

Thank you for purchasing the FelixCAD™ package, "The first real AutoCAD® alternative".

Product Installation

To install the product, run the **SETUP** program on the CD ROM.

The FelixCAD Setup program allows you to choose one of the following installation types:

- INSTALL FULLY LICENSED VERSION
     Select this option, if you have purchased a fully licensed software version
     (including a valid CD-Key).

- INSTALL EVALUATION VERSION
     Choose this option, if you wish to evaluate the program for a 30-day
     period with full functionality.

- CONVERT EVALUATION TO FULL VERSION
     If you obtained a CD-Key after purchasing a fully licensed version,
     this option allows you to convert an already installed evaluation copy
     to a regular fully licensed version of the software.

The installer will create a directory on your hard disk called **FELIX31** and a Program Folder called **FelixCAD 3.1** if not specified otherwise during the setup.

Introduction under Windows 95 and NT 4.0!

The FelixCAD CD allows you to run a self-running presentation and introduction program. You can start the introduction program by running **INTRO.EXE** in the root of the CD ROM.

Manuals On-Line

The User Manual and the Programmer's and Customization Guide are installed onto your machine into the \\Felix31\MANUALS directory.

Make sure you install the Adobe® Acrobat® reader to view these books. It is better if you install the Adobe reader before you install the FelixCAD program, because the installation program will setup the correct links to the manuals in your program group.

The Adobe Acrobat Reader setup program is found in the \ACROBAT directory of the FelixCAD CD ROM. See there acroread.txt for more information.

The FelixCAD Developers Toolkit (FDT) documentation files are located in the \FDT_32\DOC directory of the FelixCAD CD ROM.

Mail the registration form today!

Once you have registered, we have the ability to notify you of any coming changes or upgrades, and you are entitled to news and benefits available only to registered clients.

The Product Registration Form is found in REGISTER.WRI in the root directory of the FelixCAD CD ROM.

Visit our Internet Site at http://www.fcad.com for support information, bonus files, upgrades, distributors, and new third party applications and products!

Bonus Tools and Lisp Commands!

Visit our Web Site at **http://www.fcad.com** for more bonus files and documentation!

The supporting Lisp programs on the FelixCAD CD ROM are unprotected (with exception of the main Tutor routine). This makes for excellent examples of how to load and display dialog boxes and set system variables.

FCAD Offices and Distributors

Please visit our Web site **http://www.fcad.com/company.htm** for your local distributor.
