### **Flash Card Math Program**

Help your primary grade school child with math. Times tables 1 - 12 and random problems in addition, subtraction, multiplication and division.

### **GPA Plus**

GPA+ operates on top of a database that stores all of your information. At the very top level are Semesters, followed by Classes and finally, Assignments. You enter them in the same order. Semesters are little more than a start date, an end date and a name. Classes, on the other hand, store more information. They keep track of what semester they are during, when they start, when they end, information about the teacher, notes, grade structures, and more. Assignments keep track of when they are due, how many points they are worth, how many points you earned on them, where any associated document is located, etc.

### **Kalkulator**

If you are not a heavy scientific and engineering math user, do not feel intimidated by the more advanced capabilities of the program. The features you do not use will not get into your way; just forget about them and use only those you need. After one hour with Kalkulator you will feel at home.
