

This is an evaluation copy of GammaCAD PRO. It is fully functional. You can use the program until the *Evaluation* dialog displays 0 uses remaining. At any time during the evaluation period you can purchase the complete, unlimited, retail version of GammaCAD PRO. This version has no usage limits and does not contain the *Evaluation* or *Order* dialogs. It is just like any other retail product. It comes with a 120 page printed manual. With your purchase you are also entitled to technical support.

Plan ahead, order GammaCAD PRO before the evaluation period expires! This will insure the uninterrupted use of the program. To order, simply click on the *Order* button in the *Evaluation* dialog or select *Order* form from the *File* menu in the program and follow the instructions on the *Order* dialog.

Should you decide not to purchase GammaCAD PRO, and we can't imagine why you wouldn't, you can still transfer any drawings you created to another CAD program. When the number of uses remaining hits 0, only the *Open* and *DXF Export* commands will be present on the *File* menu. This allows you to transfer any drawings you have created in GammaCAD to another CAD program which supports DXF import.

Any fee you were charged for this evaluation copy goes to the distributor, not Gamma Software. The fee covers the distributors costs in making this evaluation copy available to you. The fee is not for the purchase of the program. This type of software distribution is often referred to as *shareware*. A brief explanation of shareware follows this paragraph. If you are unfamiliar with this type of distribution, contact the distributor of this evaluation copy (not Gamma Software) for further explanation. Gamma Software requires all distributors of this evaluation copy adequately explain to buyers what they are purchasing.

Shareware is a marketing method that allows you to try top quality software before you pay the author. With Shareware, you cannot be disappointed spending money on a program that's not right for you. The small fee you pay to the distributor covers only the duplication and distribution costs, and permits you to evaluate the program.

If you continue to use the program, you must send the author an additional payment, which may entitle you to technical support, printed manual, bonus programs, and more. Your payment supports the authors, enabling them to continue writing newer and better Shareware programs.
