Hello from YOUR NAME HERE!@#

You can put whatever you want here. This might be some help on how to use POWERLINK or a company phone directory or a list of your products or whatever!

When you order, you supply us with your copy in Windows/Write format ... that's all there is to it. There's
never a charge for changing your message here!@#   Master updates are always included.

So, here was an example used by one customer...

I hope this makes it a bit easier for you to stay in touch with me. This application will allow you to send me alpha pages from your PC.   All you need to do is configure it once by adding your name. (So I know from whom pages are being sent.)

If you've not already done so, you should double-click the EDIT INI icon.

This program will bring up a screen like this:

Just replace the **YerName** field with your name. It does not need to be the full name. Just enough so I know who you are. If you keep the name you use here to under 8 characters, the pages will be sent with the current time. That's sometimes useful if I receive the page and cannot respond right away. Either way though is fine.

The only other item is the **Host Number**. If you are using this from within the 313 or 810 area code, the 800 number is fine. However, outside this area, you will need to use the alternate. (This is regional 800 service)

The out-of-area Host Number : 810 539 3140

You can include dashes and spaces if that helps you read it.

That's all there is to it. When you click the Done button, you changes will be saved. Now if you need to reach me, just double-click the POWERLINK icon and tap in your message.

One last thing!

Alpha paging is not a 100% absolutely-will-get-there technology. There are some circumstances where I may not receive what you send. Some parting thoughts ...

If the page is extremely urgent, <u>send it more than once</u>. (You can easily do this by clicking on the To button and then double-clicking my name a few more times.) Also, it's a good idea to page and then follow-up with an alternate method to contact me. Do not assume an alpha was received by me even when the program says, "Successful" -- this success means it successfully handed your message off to the paging company -- not necessarily to my pager.

If I do not respond, it could be I am out of the area. My pager will reach me throughout most of Michigan -- but I might have left the area or have found one of the few dead spots in the state. Here again, if I don't respond, it's not that I'm ignoring you. Try leaving me voice mail, sending a fax, smoke signals -- anything else.

Normal delivery time to my alpha pager is about 1 minute after the program tells you the message has been sent.
