

BtrvWiz

BtrvWiz is a Visual Basic 4.0 Add-In that provides the developer with an attractive, easy to use interface to Btrieve data files and Btrieve DDF (Data Dictionary) files.

With BtrvWiz you can:

- Browse any Btrieve data file defined in File.DDF. BtrvWiz uses the Btrieve API for lightning fast data access. All browsing is 'virtual', allowing for data files of any size to be quickly browsed.
- Export Btrieve files to ASCII comma delimited text files.
- Generate VB code for "Type/End Type" structures that includes all field names, lengths and data types for any Btrieve file in File.DDF.
- Generate VB code Private or Public numeric constant declarations that includes all field names and ordinal numbers for any Btrieve file in File.DDF.
- Generate VB Declare statements for the Btrieve API .
- View all Btrieve File names that belong to any File.DDF.
- Display Btrieve file Header Record information for any Btrieve file in File.DDF.
- Display Field Definitions for any Btrieve file in File.DDF.
- Display Indexing Information for any Btrieve file in File.DDF
- Print detailed File, Field and Index information for any Btrieve file in File.DDF.

BtrvWiz Main Screen

Path to DDF Files

Click the 'Search...' button to select another File.DDF

Btrieve File

The list box on the left of the main screen lists all of the Btrieve files defined in the selected File.DDF

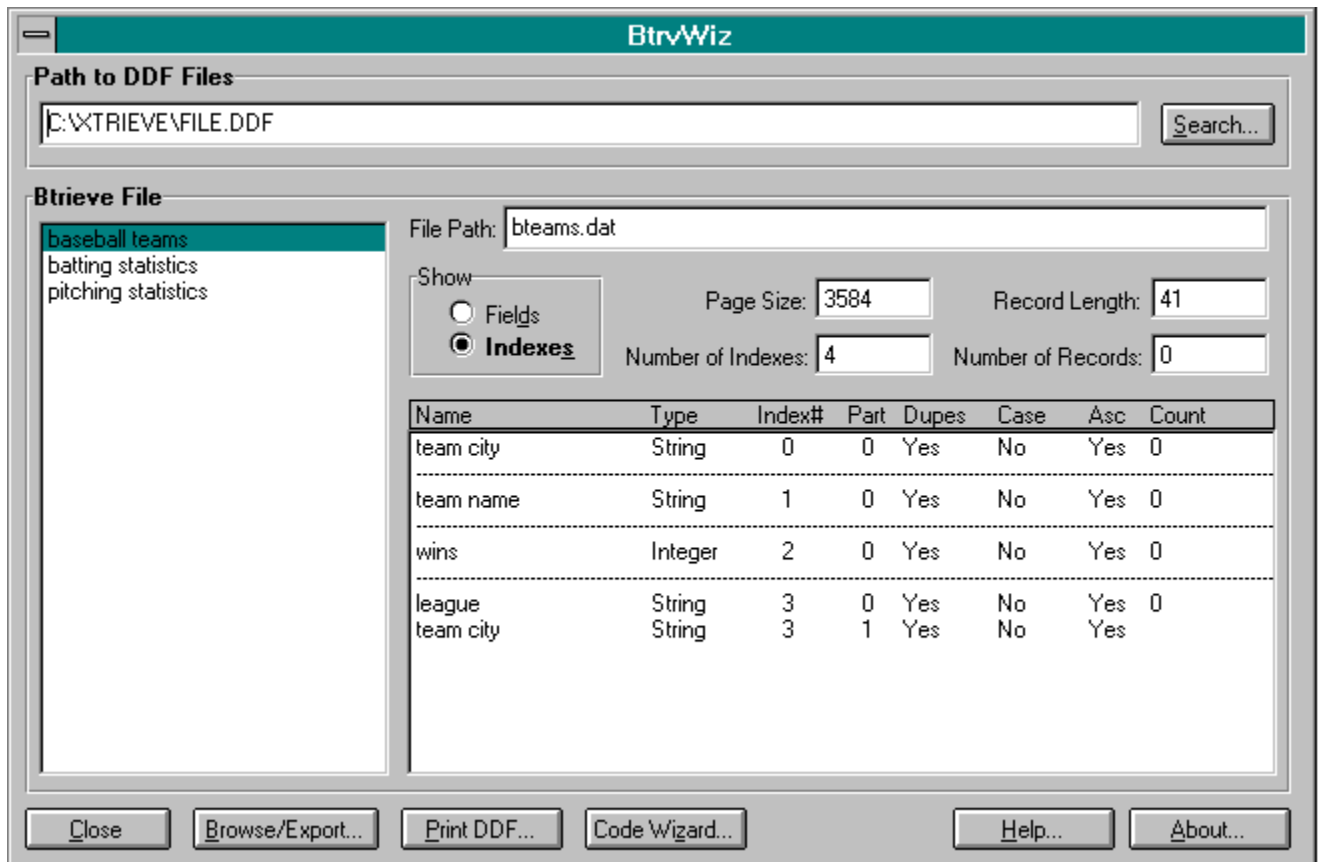

File Path

Physical (DOS) file path and name for the selected Btrieve file.

Show

Click 'Fields' to list the Fields and Field Attributes for the selected Btrieve file.

Click 'Indexes' to display Index Names and Attributes for the selected Btrieve file.

Close

Close BtrvWiz

Browse/Export...

[Browse/Export the selected Btrieve File](#)

Print DDF...

Print detailed File, Field and Index Information for the selected Btrieve file.

Code Wizard...

[Generate VB source code for the selected Btrieve File](#)

Help...

Display this Help file.

About...

Display the BtrvWiz 'About' dialog.

Page Size

Page size of the selected Btrieve file.

of Indexes

Number of indexes defined for the selected Btrieve file.

Record Length

Record length of the selected Btrieve file.

of Records

Number of records in the selected Btrieve file.

Close

Close the Browse/Export dialog.

Export

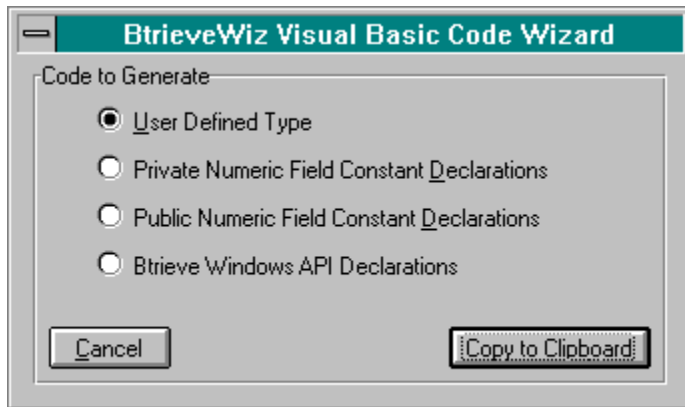

Export records in the selected Btrieve file to ASCII comma delimited format.

BOF - PgDn - PgUp - EOF

Browse controls: Beginning of File - Page Down - Page Up - End of File
