Description:
BtrvWiz is a Visual Basic 4.0 Add-In that gives the Visual Basic developer the ability to work with Btrieve data files and Btrieve File, Field and Index definitions (DDF files) from within the Visual Basic 4.0 Design Environment.

Features:
* Browse or Search any Btrieve data file (by any Index) defined in File.DDF. BtrvWiz calls the Btrieve API for lightning fast data access.

* Export Btrieve files to ASCII comma delimited text files.

* Generate VB code for "Type/End Type" structures that includes all field names, lengths and data types for any Btrieve file in File.DDF.

* Generate VB Private or Public numeric constant declarations that includes all field names and ordinal numbers for any Btrieve file in File.DDF.

* Generate VB Declare statements for the Btrieve API .

* View all Btrieve File Names that belong to any File.DDF.

* Display Btrieve File Header record information for any Btrieve file in File.DDF.

* Display Field Definitions for any Btrieve file in File.DDF.

* Display Index Information for any Btrieve file in File.DDF.

* Print detailed File, Field and Index information for any Btrieve file in File.DDF.

Installation:
Copy and UNZIP BtrWiz16.ZIP to a temporary directory of your choosing.
Run SETUP.EXE from the temporary directory and install BtrvWiz in a new directory.
Go to the Program Manager and double-click the BtrWiz16 Icon in the new BtrWiz16 Group.
Run Visual Basic 4.0.
Click on Addins|Add-In Manager... menu option.
Click on the box that says: "BtrieveWizard by WinCorp".
Select "Btrieve Wizard..." from the "Addins" menu.
If there are no DDF files in your default application directory, click the "Search.." button to find them.
