

## **EASILY FREE MEMORY:**

Avoid opening the main window to select the amount to free... Use our shortcut keys, they are faster and more effective!!!

**CTRL + 1:** Frees **10%** of your entire RAM  
**CTRL + 2:** Frees **20%** of your entire RAM  
**CTRL + 3:** Frees **30%** of your entire RAM  
**CTRL + 4:** Frees **40%** of your entire RAM  
**CTRL + 5:** Frees **50%** of your entire RAM  
**CTRL + 6:** Frees **60%** of your entire RAM  
**CTRL + 7:** Frees **70%** of your entire RAM

Also, a button is located in the main window "Free Now", which frees memory for you. You can use this feature by simply hitting CTRL + ALT + F without opening any window.

## **KILL APPLICATIONS**

Ever needed to close a crashed window or program? By just pressing **CTRL + ALT + F4** you'll be killing the application immediately releasing its unused memory.

## **OPEN RAM MEDIC WINDOWS**

Every RAM Medic feature is just a keyboard hit away:

**CTRL + F9:** Open the Main Window  
**CTRL + F10:** Open the Operation Window  
**CTRL + F11:** Open the Process Manger

## **RESTART THE EXPLORER WITHOUT RESTARTING YOUR PC**

Have you ever had problems with Windows? Maybe you wanted to open a folder, or clicked on the Start button but nothing happened. RAM Medic allows you to kill the Explorer and load it again so you can keep your work. This task is ran when you hit CTRL + ALT + F5.
