To view this Readme file in Windows WordPad, maximize the WordPad window. To print this Readme file, open it in WordPad or another word processor, and then click Print on the File menu.

Installation

System Requirements
To use Music Label 2002, you need:
- 486/66 processor or higher (Pentium processor recommended)
- Windows 95, 98, ME, NT4, 2000 or XP
- 16 MB of memory (32 MB recommended)
- 10 MB of available hard-disk space required
- Microsoft Mouse or compatible pointing device.

Special Notes and Known Problems for Installation
- At the end of an install or uninstall, you may be presented with a dialog prompting you to either restart Windows or exit setup. ALWAYS choose to restart Windows. Doing otherwise can result in an incomplete installation and make it difficult to re-install correctly.
- Music Label 2002 does not support Microsoft Windows NT 3.51.
- Music Label 2002 will automatically upgrade any Music Label 2001 database when it is restored. Any older database must be upgraded to Music Label 2001 format before it can be upgraded to Music Label 2002.

Uninstalling
Using the Add/Remove Programs icon in the Control Panel should uninstall Music Label 2002. Uninstalling by any other means (for example, by deleting directories or files) may cause system instabilities or problems for future installation of this product.

If you use "Add/Remove Programs" to remove Music Label 2002, you will have to restart Windows.
