MDI (Multi Document Interface) je způsob, jakým se mohou v počítači otevřít a používat více dokumentů najednou. Tento způsob je typický pro aplikace jako Microsoft Word, Excel nebo Photoshop. V prostředí MDI jsou dokumenty otevřeny jako jednotlivé okna, která jsou umístěna nad sebou nebo vedle sebe. Každé okno má svou vlastní menu lištu a nástrojovou lištu, což umožňuje pracovat s více dokumenty současně. Vzhledem k tomu, že každý dokument má svou vlastní menu lištu, je možné, že některé funkce budou dostupné pouze v jednom z otevřených dokumentů. To může být nepohodlné, protože by bylo třeba přepínat mezi dokumenty, aby se dostal k potřebným funkcím. Proto je v mnoha aplikacích předvoleno prostředí s jedinou menu lištou, kde jsou všechny funkce dostupné z jednoho místa. Toto prostředí je často označováno jako Single Document Interface (SDI).
