Product: Tips & Tricks for Windows 95
Version: 4.7
Document: Readthis.wri

1. Information about printing or publishing of "Tips & Tricks"

All printing or publishing for commercial proposes **MUST** be authorized by   Hanar Software. If you wish to for example have this program/file on your next   cover disk or print it in the next release of your magazine, you **MUST** contact me   first.

(I will most likely agree to what you have in mind. I will just ask you for a copy of   the cover-disk, or a copy of your magazine).

2. What's new!

Tips & Tricks has been a very popular utility. I receive about 10 e-mail letters every   day with feedback and Tips, therefore I can now proudly present Tips & Tricks   version 4.7 with more then **150** Tips & Tricks for Windows 95.

For all of you that have sent me e-mail... Keep on doing so.. I love e-mail. It's you   guys that have encouraged me to keep on updating Tips & Tricks.

Some news in this release:
* Information about the Subst.exe program.
* Numlock fix
* Change the icon on Harddrive
* Viewing Win95 animated cursors
* LOGO.SYS scrolling bar
* Increase modem speed
* Increase performance in DOS
* Close the Start Button
* Useful programs on the Win95 CD-ROM
* Automatically clear the document file

3. Installation

How to install Tips & Tricks on your computer..
1) Extract ttricks.zip to any directory.
2) Open explorer and press the right mouse button on the files T&Tricks.inf.

Tips & Tricks will then install itself in your harddrive.
You can delete the files from your directory where you unzipped "Tips & Tricks",
(the files are installed into another directory, check section below for more   information).

Tips & Tricks uses the Win95 Install/Uninstall options.
This means that when you uninstall Tips & Tricks ALL files and changes in the   registry will be removed.

Tips & Tricks

File Name	Location	Purpose
T&Tricks.hlp	\Windows\help	Main File
File_Id.Diz	*NOWERE*	For BBs to import
ReadThis.wri	\Windows\help	This file :)

4. Uninstallation

Just highlight Tips & Tricks in the Add/Remove Section (Control Panel) and press   remove. All files will be gone...

That's it... I hope you enjoy this utility.
