    Sun 9/9/90
  b) Alpha
    Sun Sept 9,1990

Free Memory

The memory display has the following formats which are determined by the memory model you are using.
   a) Real, no EMS
      r   340k (amount of 640K remaining)
   b) Real, EMS
      r   340k/1200k (memory above the EMS line/free EMS)
   c) Standard
      s   1024k/11000k (largest contiguous block/total free)
   e Enhanced
      e   1024k/11000k (largest contiguous block/total free)

Free Disk Space

The free disk space can display the free space on the selected disk. The disk is selected in the Configuration Dialog Box. This display has the following format.

      C   12000K

Save Control

This control puts your selections into effect and also saves them in the digital ini file for future use.

OK Control

This control puts your selections into effect when selected.

Cancel Control

Your selections will be ignored when this control is selected.

Text Group Box

The Text Group box Select either the foreground or background color of the text for change by the RGB Scroll Bars**.**

RGB Scroll Bars

Each Scroll Bar controls each of the red, green, or blue values that make the color selection. The selected value is display next to each scroll bar and the resulting text colors are shown above the Text Group Box.

Save Control

This control puts your selections into effect and also saves them in the digital ini file for future use.

OK Control

This control puts your selections into effect when selected.

Cancel Control

Your selections will be ignored when this control is selected.

Close Control

This control will close the window and exit the digital display. If the window is a <u>Clone</u> only it will be closed. If the window is the top or parent window , it and all its clones will be closed.

Clone Control

The Clone control will start another Digital window that can be configured independent of any other Digital windows. This control is only enabled in the top or parent Digital window

UnClone Control

Unclone removes the cloned window from the clone list and closes the window. This control is only enabled in the clone windows Configuration dialog box.

Help Control

If you are reading this you already know what the Help control does.

Format Controls

Use **Num Date** or **Alpha Date** to select the format of the <u>Date</u> Display. The **12 hr Clock** or **24 hr Clock** will select the <u>Time</u> Display Format.

Display Controls

The Display controls can be selected in any combination and will have the following effects.
      a) If only a single control is selected a single line window will appear with that element in it.
      b) If the date and time are selected they will appear in a single line.
      c) If date and/or time and either memory or disk are selected a two line window appear.
      d) If both memory and disk are selected they will alternate being displayed on a single line.
The selections will not go into effect until the <u>OK</u> or <u>Save</u> control is selected.

Drive Control

Use the Scroll bar to increment or decrement the Drive letter above it. Then select <u>OK</u> or <u>Save</u> as required.

Location Control

The location control is an alternative way of placing the Digital window on the screen. Enter the X and Y location in the edit boxes and the window will appear at that location when the <u>OK</u> or <u>Save</u> Control is selected.
