Agatha Christie, is known throughout the world as the Queen of Crime. Her books have sold over a billion copies in the English language with another billion in 44 foreign languages. She is the most widely published author of all time and in any language, outsold by only the Bible and Shakespeare.

She began writing at the end of the First World War, when she created Hercule Poirot, the little Belgian detective with the

egg-shaped head and the passion for order -- the most popular sleuth in fiction since Sherlock Holmes.
