1.2 InTroDuCTiOn

```
(-) InTRoDuCTiOn (-)
```

mY cOOL dIARY, born almost as a joke, has been accepted well and utilised by the amiga users so that a new version had to be made to replace the older and outdated ones.. The more outdated part was certainly the GUI, that was coded using the old OS2 standards, and now it has been rewritten 100% using MUI..

If you already know or maybe even use, mY cOOL dIARY, go and try out this new 3.00 version, if on the contrary you're new to this program, here it goes a short introduction..

mY cOOL dIARY is a little database made to be fast, easytouse and efficent. There are no many options, just the essential ones to store and handle some records, be them phone numbers, addresses, programs, videotapes or whatever else you like..

Compared to the old ones, this version is very much faster because it has been rewritten from scratch and it has even become more userfriendly (we've worked hard on it).

1.3 UsAGe

(-) UsAGE (-)

No many things to say, because a program like this, claimed to be userfriendly, should have no need to be explained in all his functions.

So here they are the most important things. In the window title there is a sort of status bar that shows the number of records in your diary (database) and two flags: M and C.

M stands for modified and it is turned on every time datas are modified and not saved, while C stands for crypted and it is turned on when you are working with a crypted diary that will be encoded with the password you have defined in the prefs menu.

You can choose to save a diary in the mCD proprietary format (save option), crypted or uncrypted, or in a plain ASCII format (save ascii option) so that you'll be able to print it or view it with a text editor.

You can define with the DEFAULT tootype a default diary that will be automatically loaded when mCD is run.

If you run from CLI you can enter the default diary as the argument.

1.4 dISCLAIMER

!!! dISCLAIMER !!! !!! dISCLAIMER !!! !!! dISCLAIMER !!! !!! dISCLAIMER !!!

We assume no responsability for any loss of data or damage you can receive using this program, if you want to use it, do it at your own risk..

!!! dISCLAIMER !!! !!! dISCLAIMER !!! !!! dISCLAIMER !!! !!! dISCLAIMER !!!

This program is MailWare (just another way to say FREEWARE..) and that means that if you use it you have to send an eMAIL to dIGITAL cHAOS... If you cant or if you dont want to.... we simply will not know we have a new user =)

1.5 mCD v3.0 rEQUIREMENTS

tO uTILISE tHIS pROGRAM yOU nEED:

- Kickstart 3.0 or greater (It could work also with 2.0 but I'm not sure..)
- MUI 3.0 or greater..
- About 300k of FREE RAM.. (better if FAST)
- Asl Library (I think this shouldnt be a big problem..)

V1.4	(Oct. '94)	FIRSt ReLEAsE VeRsION By LrY/DTC
V1.2-1.9	(xx.xx.xx)	InTErNAl Not ReLEAsEd VerSIoNS
V2.0	(04.08.95)	<ul style="list-style-type: none"> o By kRs! =) o Most of the code rewritten and improved.. o Font adaptive GUI (Now you can use McD with any WB font). o Status field, kill confirmation, sort option added. o .prefz file removed (Now there's only the .McD diary file).
V2.0f	(07.08.95)	<ul style="list-style-type: none"> o .McD.McD.McD BuG FiXeD!!!! (sUCh A ShAME ;) o "StaNd By.. " message now is showed also at startup.. o \$VER string added =)

-
- V2.1-2.4 (xx.xx.xx) InTERNAL Not ReLEAsEd VerSIoNS
- V2.5 (22.11.95)
- o New .McD file format.
 - o Data crypting added.
 - o Default diary options added.
 - o Added I/O error handling.. (Disk full or Disk writeprotected)
 - o Added Disk Operations window..
 - o Requesters now use the Intuition function..
 - o If you try to load an extraneous file, MCD warns you and doesnt load it..
 - o Main menu window now is closed when a diary is opened.
 - o Now if you sort, kill or add records, the diary will be considered as modified and if you dont save it before quitting the AreUsuRE? requester will pop up..
 - o Continuing to kill records when a diary was empty crashed the system.. FIXED!
 - o The Add option sometimes added old killed records and not blank ones.. FIXED!
 - o Fixed problems with the overwrite old files requester..
 - o Using UNDO after an unsuccessful search caused a jump to record #000.. FIXED!
 - o Fixed some other problems with UNDO..
 - o Now you can close the about window pressing only LMB..
 - o Removed a major bug that slowed down the entire program if windows were closed and opened many times..
 - o Fields now are 50 characters long..
 - o ReGiStrAtIoN WinDoW ReMoVeD..
 - o Other minor bugs fixed..
 - o AnD HeRE We Go 'gaIn...
- V3.0 (20.08.96)
- o Everything rewritten from scratch..
And that means -->
 - o A lot of speed gained..
 - o A great (Magic) user interface.. =)
 - o A more userfriendly program..
 - o Maybe also some new bugs? We hope nooot..
-
