```

1.2 Track2File.guide/Introduction

Purpose of Track2File is ripping files written on NDOS disks. Files found can be saved on any device in original or decrunched form.

Track2File is FREeware. Program and documentation must be spread in unchanged form (archive). Any modifications are forbidden.

This program uses following libraries:

- reqtools - by Nico François and Magnus Holmgren
 - xfdmaster - by Georg Hormann
-

1.3 Track2File.guide/Requirements

Track2File requires any Amiga with OS 2.04 (V37) or higher.
Recommended minimum memory size is 2MB.

1.4 Track2File.guide/Installation

Copy Track2File, it's icon and documentation to any directory
and contents of Libs directory to LIBS:

1.5 Track2File.guide/Gadgets

Gadgets:

Disk Read

Load File

Search

Prefs

1.6 Track2File.guide/Recognized headers

This program recognizes following file headers:

ID:	Cruncher:	O	P	D	Example:
CP	???	+	+	+	game Viro Cop AGA
GP	???	+	+	+	game Apidya
JR	???	+	-	+	game Epic
SA	Magnetic Fields	+	+	-	games Lotus III, Crystal Dragon
SC	Magnetic Fields	+	+	-	games Lotus II and III
SF	Magnetic Fields	+	+	+	games Kid Chaos, Lotus II and III
SP	Magnetic Fields	+	+	-	games Kid Chaos, Lotus II and III
SQ	Magnetic Fields	+	+	+	games Kid Chaos, Lotus III
1AM	Amnesty Design	+	+	+	game Reunion ECS
2AM	(S401) fake	+	+	+	game Reunion ECS
LOB	???	+	+	+	games Wings Of Death, Last Ninja Remix
RLE	???	+	+	+	game Second Samurai AGA
=SB=	Stefan Boberg Cr	+	+	+	game Alien Breed 3D II
\$08090A08	StoneCracker2.99	+	+	+	demo 9 Fingers/SpaceBalls
\$18051973	(CrM2) fake	+	+	+	game Fears
!GC!	(PP20) fake	+	+	+	previews Creatures, Guy Spy
ALC0	Alcatraz	+	+	+	game Cedric
ATM5	IAM Packer	+	+	+	demo Behind The Window/Suspect

ATN!	(IMP!) fake	+ + +	game Pinball Illusions
ATOM	???	+ + +	game Jim Power
Ace?	???	+ + +	game Obsession
ArcD	???	+ + +	game Liberation
ArcR	???	+ + +	game Liberation
arcD	???	+ + +	game Liberation
BDPI	(IMP!) fake	+ + +	game Dizzy Kwiksnax

xVdg	Byte Killer fake	+ + +	compiled AMOS programs

O(riiginal length) - recognize decrunched file length

P(acked length) - recognize crunched file length

D(ecruncher) - decruncher for xfdmaster library

+ - true

- - false

1.7 Track2File.guide/Program history

Version 1.0 (07.07.95) - recognizes 19 IDs

- first release

Recognizes headers:

- \$08090A08 - Stone Cracker 2.99 Data

- =SB=

- ATN! - IMP! fake

- Ace?

- ArcD

- arcD

- ArcR

- CrM!

- CrM2

- Crm!

- Crm2

- IMP!

- PaCK - CrM! fake

- PP20

- RNC1

- RNC2

- S404

- XPKF

- xVdg - Byte Killer fake

New libraries for xfd:

- 89A8
- =SB=
- Ace?
- ArcD and arcD
- PaCK
- RNC1
- RNC2
- xVdg

Version 1.01 (05.08.95) - recognizes 24 IDs

Recognizes new headers:

- TPWM - not recognizes size of crunched file
- ICE!
- ATM5
- GP
- Dupa - IMP!

New libraries:

- GP
- Dtpk
- Dupa
- TPWM

Bugs removed:

- Track2File didn't load full disk to memory i.e. first and last block
- in file requester, pressing 'Amiga+L' caused selecting Clear instead of Load. Now you can use 'Amiga+O' shortcut for loading files.
- program should work on all Amigas with MC68000 now, but decrunching files from odd address can crash your system.

Version 1.02 (10.09.95) - recognizes 29 IDs

Recognizes new headers:

- Ice!
- IFT? - CrM2 fake
- CRUN - Byte Killer fake
- ViS1 - CrM!
- ViSL - CrM2

All xfd libraries were rewritten by me and some new ones were added:

- Ice!
- IFT?
- CRUN
- LOB
- XPAC

Version 1.03 (25.09.95) - recognizes 31 IDs

Added in preferences option to skip found file (skip file), for speed up memory scan.

Recognizes new headers:

- ATOM
 - Vic2
-

New libraries:

- ATOM
- FUCK
- JR
- HUFF
- Vic2

Version 1.04 (04.10.95) - recognizes 35 IDs

New headers:

- \$18051973 - CrM2 fake
- CP
- LOB
- VOL1

New libraries:

- CP
- SSUR
- VDCO
- VOL1

Version 1.05 (10.11.95) - recognizes 37 IDs

Added Abort gadget in information requester.

New headers:

- RLE
- TITS - PP20 fake

New libraries:

- RLE
- CRND

Version 1.10 (01.12.95) - recognizes 56 IDs

New version recognizes 56 headers and is about 35% faster! to previous versions. New memory scan procedure is used. In preferences you can select what headers you want to search. Settings can be saved on disk. They will be loaded when program runs. To all decrunched and saved files comment will be added with information about cruncher type.

New headers:

- JR
 - SA
 - SC
 - SF
 - SP
 - SQ
 - CRND - Byte Killer fake
 - Dtpk
 - GC!2
 - GC!3
 - HUF#
 - KDUB - Master Cruncher 3.0 fake
 - MASM
 - MASS
 - pack
-

- SFHD
- SPv3
- SSUR
- VDCO

New libraries:

- GraftGold_Cruncher (GC!2 and GC!3)
- KDUB
- MASM
- MASS
- pack
- SPv3

Version 1.11 (19.12.95) - recognizes 58 IDs

In preferences some new gadgets was added: Deep search, Invert, Clear.
With 'Deep search' option turned off program is about 40%
faster! to previous version.

New headers:

- PaK0
- XP10

New libraries:

- PaK0
- MagneticFields (SF and SQ)

Version 1.12 (07.01.96) - recognizes 60 IDs

Comment contains Offset and starting block number of NDOS disk saved in
this file.

New headers:

- ALC0
- FIRE

New libraries:

- ALC0
- ArcR
- MagneticFields (SC and SP)
- XP10

Version 1.13 (21.01.96) - recognizes 63 IDs

New headers:

- BDPI - IMP! fake
- CHFI - IMP! fake
- FLT! - IMP! fake

New libraries:

- FIRE
- HUF#

Version 1.14 (06.02.96) - recognizes 67 IDs

New headers:

- BH72 - S404 fake
-

- BH73 - S404 fake
- GP11
- XPKZ - CrM2 fake

Version 1.15 (16.04.96) - recognizes 72 IDs

Added new version of xfd.library, it allows to detect length of PowerPacked data file. Detection of 100KB file can take few minutes on not expanded Amiga 1200, but is 100% reliable.

Program correctly detects length of files with TPWM headers.

New headers:

- 1AM
- 2AM - S401 fake
- DHp2
- FRED - IMP! fake
- SLAM - S404 fake

New libraries:

- 1AM and 2AM
- DHp2

Version 1.16 (07.05.96) - recognizes 74 IDs

All xfdmaster.library libraries were corrected to work in multitasking.

New headers:

- RNC0
- TSM! - Ice! fake

Version 1.17 (15.07.96) - recognizes 77 IDs

New headers:

- CMP1
- S300
- Taz! - ICE! fake

New libraries:

- TSM!

Version 1.18 (26.08.96) - recognizes 79 IDs

New headers:

- BOND
- LZWH

New libraries:

- JEK!

Version 1.19 (27.09.96) - recognizes 81 IDs

New headers:

- LeCr
- LZSS

New libraries:

- LeCr
- Vice

Version 1.20 (19.11.96) - recognizes 92 IDs

New headers:

- !GC! - PP20 fake
- CHFC - PP20 fake
- EDAM - IMP! fake
- LSD! - Master Cruncher 3.0 fake
- LZDA
- MD12 - PP20 fake
- MICK - Ice! fake
- MTP1
- MTPS
- PARA
- S401

New libraries:

- CMP1
- FUNGUS
- Gary Symons
- LSD!
- LZDA
- LZWH
- MTP1 and MTPS
- PARA
- TXIC

1.8 Track2File.guide/From author

Track2File is written in assembly language using Devpac v3.14. It was tested on Amiga 1200 + Blizzard IV 50 MHz + 8 MB Fast Ram + 2.5 GB Caviar HDD.

If you have any ideas or you have found any bugs, write to me on address:

Mr.Larmer of Wanted Team
Czeslaw Maron
ul.sw.Anny 45/17
42-700 Lubliniec
POLAND

tel. +48 34 530 421

1.9 Track2File.guide/Greetings

Special greetings from me go to:

- Tomasz Francuzik for beta testing and spreading version 1.01 on Intel Outside II Party in Warsaw
- Jacek Kierat

- Zbigniew Ćata
- Adam Rudnik beta testing, new ID's and decrunchers
- Tomasz Dusza suggestions
- Olivier Delemotte bug reports and new ideas
- Thom and Amst of Union english manual
- Martin Jeppesen new ID's, decrunchers and suggestions
- Martin Densky new ideas

1.10 Track2File.guide/Disk Read

Disk Read

Reads disk to memory.

1.11 Track2File.guide/Load File

Load File

Opens file requester. After selecting file name, loads it to memory.

1.12 Track2File.guide/Search

Search

Scans allocated memory. If file header is found requester with information about this file opens. Then you can select:

Save file

Decrunch & save

Abort

Continue

1.13 Track2File.guide/Prefs

Prefs

Opens window with program preferences:

Drive to read

Inc file name

Decrunch before save

Skip file

Deep search

Save image

Enable/Disable IDs

Invert

Clear

Save

Use

Cancel

1.14 Track2File.guide/Save file

Save file

Opens file requester and saves file with given file name.

1.15 Track2File.guide/Decrunch & save

Decrunch & save

Decrunches file and opens file requester, then saves decrunched data.

1.16 Track2File.guide/Abort

Abort

Aborts memory scan.

1.17 Track2File.guide/Continue

Continue

Resumes memory scanning.

1.18 Track2File.guide/Drive to read

Disk read in drive

Changes drive to read from.

1.19 Track2File.guide/Inc file name

Inc file name

If this gadget is activated, then after selecting 'Search' and memory scanning program will open file requester instead of information window. After entering file name, program will write found data and resume memory scanning. Program will append an three digit extension to file name, eg. if you enter file name Data, program will save files with names: Data.001, Data.002, etc...

1.20 Track2File.guide/Decrunch before save

Decrunch before save

The same as 'Inc file name', but files will be decrunched before save.

1.21 Track2File.guide/Skip file

Skip file

After finding file program while resume searching from end of this file. If this option is disabled program while search whole this file.

1.22 Track2File.guide/Deep search

Deep search

With this option turned off program scans memory by word (2 bytes), with turned on byte by byte.

1.23 Track2File.guide/Save image

Save image

Opens file requester. After selecting file name writes loaded data from disk to file.

1.24 Track2File.guide/Enable-Disable IDs

Enable/Disable IDs

You can select what headers program should search.

1.25 Track2File.guide/Invert

Invert

Inverts selection of headers in 'Enable/Disable IDs' gadget.

1.26 Track2File.guide/Clear

Clear

Clears selection of headers in 'Enable/Disable IDs' gadget.

1.27 Track2File.guide/Save

Save

Saves settings in "s:Track2File.prefs".

1.28 Track2File.guide/Use

Use

Remembers settings.

1.29 Track2File.guide/Cancel

Cancel

Returns previous settings.
