1.4 DVC tells me strange version strings...

Libraries check

If the "Libraries check" find a library on your system thats more
actually than in LibGuide, so send me please the relevant information
with the actual size...

Did you get version informations from DVC like this?

```
68040.library        65535.2
hisoftbasic.library   1988.4
kd_freq.library       1991.1991
```

If you get version informations higher than V100.0, please control the
version of the library with c:version.

```
1.Shell:> version xxxx.library full
```

If the result is e.g.: 2.-1 or 3.-1 then read
the words from Roger Hàgensen:

>DVC has some problems with version checking by several libraries.
>I've attached some examples. I hope you can change this little. I know,
>that it is a big problem with the different version strings. :-(

What version strings? dissidents who made all the 3 libs
has broken all rules.
but DVC, Version and VersionWB all failed (not a surprise really)
It would be impossible to handle those (unless I made a 4KB parser :-(
Since all the 3 libs are from 1991 and seem to be coded badly,
even the binary version numbers are wrong.
The problem can only be solved if you contact the authors.

BTW: Did you find in LibGuide libraries with a size of "0"?
I would be greatful if you can tell the size of this
actually libraries to
me
.

1.5 Some words to the authors of the Libraries

In the last time I found some libraries, with the same ↩
name

```
but different authors and different functions.
But here is a problem for all users of these libraries.

Kai Hofmann (Author of
         »date.library«
        ) has an inspiration
to register the names of the libraries.

In his opinion we need a Library Naming Guideline or
a central Register Place, to solve this problem.

    !!!
         Register the name of your library.
          !!!
```

```
 There have been numerous Workbench versions from V1.1 to V3.1 and each one
 has had some updated libraries with the upgrade.
 Workbench 1.2 and 1.3 were upgraded many times by Commodore.
 Workbench upgrades from V2.0 thru V3.1 have many Libraries added, deleted
 or moved into Kickstart ROM.
 Generally it is GURU time or very unstable operation to use OS Libs for
```

```
 any other version of the OS than they were intended for !!!

 There seems little reason in listing Libs that are in Kickstart ROM since
 the user cannot update those Libs without upgrading the Kickstart ROM and
 Workbench OS...

Vxx.x were normally associated with the OS identified as follows:
-------------------------------------------------------------------------------
V31.x = OS 1.1 = A1000
V33.x = OS 1.2 = A500, A2000, avail for A1000
V34.x = OS 1.3 = A500, A2000, A2500, A3000 (KickROM's), avail for A1000
V36.x = OS 2.0 = A3000, avail for A500, A2000, A2500
V37.x = OS 2.0 = A3000, avail for A500, A2000, A2500
V38.x = OS 2.1 = A500+, avail for A500, A2000, A2500, A3000
V39.x = OS 3.0 = A1200, A4000
V40.x = OS 3.1 = A1200, A4000, avail for A500, A500+, A2000, A2500, A3000

I don't have specific knowledge of Amiga models not listed eg. A1500
