The Windows 95 *Freddy Krueger* Theme
(Freeware, Freely Distributable)
Instructions

- Stick Freddy wallpaper.bmp into your Windows directory.

- Stick the icons and cursors in your Program Files\Plus!\Themes Folder.   If you don't have Plus! then just make a folder called "Freddy" somewhere.

- Stick all the Sound Files in your Program Files\Plus!\Themes (or "Freddy") folder.

- Download the Startup/Shutdown Screen set*, and follow the directions inlcuded with that.

- Go into Control Panel, select the Themes program.   If you don't have one, use the Mouse applet instead to select the cursors you want. As for the icons, you can either edit the registry (instructions for that are included in the "icon single" ZIPs*) or download a program like Microangelo 2.1 (un-paid plug), available at ftp://ftp.impactsoft.com/pub/impactsoft/ma21.zip ,to do it for you.

- Go to the Control Panel Display aplpet, and select "Freddy wallpaper.bmp" as your wallpaper.

Everything *Freddy* and *Nightmare on Elm Street* is copyrited by Wes Craven and New Line Cinema.   I'm making no money; this is just for kicks.
