Contents:

- 00- Quick Start!
- 01- Area Code Summary: Providers With Many Local Dialins (1-800, PDN)
- 02- Area Code Summary: US/Canada Metro and Regional Dialins
- 03- Area Code Summary: International Dialins
- 04- Alphabetical List of Providers
- 05- What \*Is\* The Internet?
- 06- What The PDIAL Is
- 07- How People Can Get The PDIAL (This List)
- 08- Appendix A: Other Valuable Resources
- 09- Appendix B: Finding Public Data Network (PDN) Access Numbers
- 10- Providers: Get Listed in PDIAL!

Subject headers below are formatted so this list may be read as a digest by USENET newsreaders that support digests. Example commands: rn, "control-G" skips to next section; nn, "G%" presents as a digest.

Or, just skip to desired section by searching for the desired section number string (e.g. "-01-") from the list above.

-----  
From: PDIAL -00-  
Subject: Quick Start!

THE INTERNET is a global cooperative information network which can give you instant access to millions of people and terabytes of data. Providers listed in the PDIAL provide inexpensive public access to the Internet using your regular modem and computer.

[Special note: the PDIAL currently lists only providers directly connected to the Internet. Much of the Internet can still be explored through systems with only Internet email and USENET netnews connections, but you need to check other BBS lists to find them.]

GET A GUIDE: I highly recommend obtaining one of the many good starter or guide books to the Internet. Think of them as travel guides to a new and different country, and you wouldn't be far off. See section -08- below for more details.

CHOOSING A PROVIDER: Phone charges can dominate the cost of your access to the Internet. Check first for providers with metro or regional dialins

that are a local call for you (no per-minute phone charges). If there aren't any, move on to comparing prices for PDN, 800, and direct-dial long distance charges. Make sure to compare all your options. Calling long distance out-of-state or across the country is often cheaper than calling 30 miles away.

If you're not in North America and have no local provider, you may still be able to use one of the providers listed as having PDN access. Contact the individual providers with PDN access (see listings below) to find out.

**INFORMATION CHANGES:** The information listed in the PDIAL changes and expands rapidly. If this edition is more than 2 months old, consider obtaining a new one. You can use the Info Deli email server, which will provide you with updates and other information. Choose from the commands below and just email them to <info-deli-server@netcom.com>.

"Send PDIAL" -- receive the current PDIAL  
"Subscribe PDIAL" -- receive new editions of the PDIAL automatically  
"Subscribe Info-Deli-News" -- news of Info Deli changes and additions

See section -07- below for more details and other ways to obtain the PDIAL.

**CHECK IT OUT:** Remember, the PDIAL is only a summary listing of the resources and environment delivered by each of the various providers. Contact the providers that interest you by email or voice phone and make sure you find out if they have what you need.

Then GO FOR IT! Happy 'netting!

-----

From: PDIAL -01-  
Subject: Area Code Summary: Providers With Many Local Dialins (1-800, PDN)

800 class cns crl csd dial-n-cerf-usa hookup.net IGC jvnc OARnet  
PDN delphi holonet hookup.net IGC michnet millennium novalink portal  
PDN psi-world-dial psilink tmn well world

"PDN" means the provider is accessible through a public data network (check the listings below for which network); note that many PDNs listed offer access outside North America as well as within North America. Check with the provider or the PDN for more details.

"800" means the provider is accessible via a "toll-free" US phone number. The phone company will not charge for the call, but the service provider will add a surcharge to cover the cost of the 800 service. This may be more expensive than other long-distance options.

From: PDIAL -04-  
Subject: Alphabetical List of Providers

Fees are for personal dialup accounts with outgoing Internet access; most sites have other classes of service with other rate structures as well. Most support email and netnews along with the listed services.

"Long distance: provided by user" means you need to use direct dial long distance or other long distance services to connect to the provider.

From: PDIAL -05-  
Subject: What \*Is\* The Internet?

The Internet is a global cooperative network of university, corporate, government, and private computers, all communicating with each other by means of something called TCP/IP (Transmission Control Protocol/Internet Protocol). Computers directly on the Internet can exchange data quickly and easily with any other computer on the Internet to download files, send email, provide remote logins, etc.

Users can download files from publicly accessible archive sites ("anonymous FTP"); login into remote computers (telnet or rlogin); chat in real-time with other users around the world (Internet Relay Chat); or use the newest information retrieval tools to find a staggering variety of information (Wide Area Information Servers, Gopher, World Wide Web).

Computers directly on the Internet also exchange email directly and very quickly; email is usually delivered in seconds between Internet sites.

Sometimes the Internet is confused with other related networks or types of networking.

First, there are other ways to be "connected to the Internet" without being directly connected as a TCP/IP node. Some computers connect via UUCP or other means at regular intervals to an Internet site to exchange email and USENET newsgroups, for instance. Such a site can provide email (though not as quickly as a directly connected systems) and USENET access, but not Internet downloads, remote logins, etc.

"email" (or "Internet email", "netmail") can be exchanged with a wide variety of systems connected directly and indirectly to the Internet. The email may travel solely over the Internet, or it may traverse other networks and systems.

"USENET" is the collection of computers all over the world that exchange USENET news -- thousands of "newsgroups" (like forums, or echos) on a wide range of topics. The newsgroup articles are distributed all over the world to USENET sites that wish to carry them (sometimes over the Internet, sometimes not), where people read and respond to them.

The "NSFNET" is one of the backbones of the Internet in the US. It is funded by the NSF, which restricts traffic over the NSFNET to "open research and education in and among US research and instructional institutions, plus research arms of for-profit firms when engaged in open scholarly communication and research." Your Internet provider can give you more details about acceptable use, and alternatives should you need to use the Internet in other ways.

-----  
From: PDIAL -06-  
Subject: What The PDIAL Is

This is the PDIAL, the Public Dialup Internet Access List.

It is a list of Internet service providers offering public access dialins and outgoing Internet access (ftp, telnet, etc.). Most of them provide email and USENET news and other services as well.

If one of these systems is not accessible to you and you need email or USENET access, but *don't* need ftp or telnet, you have many more public access systems from which to choose. Public access systems without ftp or telnet are *not* listed in this list, however. See the nixpub (alt.bbs, comp.misc) list and other BBS lists.

Some of these providers offer time-shared access to a shell or BBS program on a computer connected directly to the Internet, through which you can FTP or telnet to other systems on the Internet. Usually other services are provided as well. Generally, you need only a modem and terminal or terminal emulator to access these systems. Check for "shell", "bbs", or "menu" on the "services" line.

Other providers connect you directly to the Internet via SLIP or PPP when you dial in. For these you need a computer system capable of running the software to interface with the Internet, e.g., a Unix machine, PC, or Mac. Check for "SLIP", or "PPP" on the services line.

While I have included all sites for which I have complete information, this list is surely incomplete. If you have any additions or corrections please send them to me at one of the addresses listed in section -10-.

From: PDIAL -07-  
Subject: How People Can Get The PDIAL (This List)

EMAIL:

From the Information Deli archive server (most up-to-date):

To receive the current edition of the PDIAL, send email containing the phrase "Send PDIAL" to "info-deli-server@netcom.com".

To be put on a list of people who receive future editions as they are published, send email containing the phrase "Subscribe PDIAL" to "info-deli-server@netcom.com".

To receive both the most recent and future editions, send both messages.

From time to time, I'll also be sending out news and happenings that relate to the PDIAL or The Information Deli. To receive the Info Deli News automatically, send email containing the phrase "Subscribe Info-Deli-News" to "info-deli-server@netcom.com".

From the news.answers FAQ archive:

Send email with the message "send usenet/news.answers/pdial" to "mail-server@rtfm.mit.edu". For help, send the message "help" to "mail-server@rtfm.mit.edu".

#### USENET:

The PDIAL list is posted semi-regularly to alt.internet.access.wanted, alt.bbs.lists, alt.online-service, ba.internet, and news.answers.

#### FTP ARCHIVE SITES (PDIAL and other useful information):

Information Deli FTP site:

ftp.netcom.com:/pub/info-deli/public-access/pdial [192.100.81.100]

As part of a collection of public access lists:

VFL.Paramax.COM:/pub/pubnet/pdial [128.126.220.104]  
(used to be GVL.Unisys.COM)

From the Merit Network Information Center Internet information archive:

nic.merit.edu:/internet/providers/pdial [35.1.1.48]

As part of an Internet access compilation file:

liberty.uc.wlu.edu:/pub/liblaw/internet.access [137.113.10.35]

As part of the news.answers FAQ archive:

rtfm.mit.edu:/pub/usenet/news.answers/pdial [18.70.0.209]

From: PDIAL -09-

Subject: Appendix B: Finding Public Data Network (PDN) Access Numbers

Here's how to get local access numbers or information for the various PDNs. Generally, you can contact the site you're calling for help, too.

**IMPORTANT NOTE:** Unless noted otherwise, set your modem to 7E1 (7 data bits, even parity, 1 stop bit) when dialing to look up access numbers by modem as instructed below.

BT Tymnet

-----

For information and local access numbers, call 800-937-2862 (voice) or 215-666-1770 (voice).

To look up access numbers by modem, dial a local access number, hit <cr> and 'a', and enter "information" at the "please log in:" prompt.

Compuserve Packet Network

-----

You do NOT have to be a CompuServe member to use the CPN to dial other services.

For information and local access numbers, call 800-848-8199 (voice).

To look up access numbers by modem, dial a local access number, hit <cr> and enter "PHONES" at the "Host Name:" prompt.

PSINet

-----

For information, call 800-82PSI82 (voice) or 703-620-6651 (voice), or send email to "all-info@psi.com". For a list of local access numbers send email to "numbers-info@psi.com".

From: PDIAL -10-  
Subject: Providers: Get Listed in PDIAL!

NEW SUBMISSION/CORRECTION PROCEDURES:

The PDIAL will be undergoing expansion in both breadth (how many and what kinds of public access providers) and depth (how much information is carried for each provider). To collect the data, I will be emailing a questionnaire to providers already on the PDIAL, and to any providers who wish to be added. Corrections can also be submitted via update questionnaires.

To be listed in the PDIAL, retrieve the PDIAL questionnaire by sending email to <info-deli-server@netcom.com> containing the command "Send PDIAL-Q". The questionnaire will not be available until 15 Dec 1993, but requests received before then will be queued and honored when it is available.
