

NautilusCD

The Monthly CD-ROM for Multimedia

NautilusCD is the first monthly multimedia CD-ROM, an electronic magazine that delivers multimedia power directly to your personal computer.

NautilusCD helps multimedia computer users make the most effective use of their systems by exploring such areas as personal computing, desktop publishing and personal finance with step-by-step multimedia tutorials, then delivering applicable tools -- like software, clip art and sound files -- that can be put to immediate use.

Entertaining and informative, it's an essential resource for the entire spectrum of multimedia computer owners, from the novice to the power user. Exploring an issue of NautilusCD is a little like reading a print magazine, with the added excitement of high-quality sound, animation and video. A magazine-like interface with a table of contents, regular departments, and a monthly feature story helps subscribers find the information that's most useful to them.

Although some subscribers report enjoying spending hours with NautilusCD, advanced navigational features enable even new users to browse entire sections or move quickly to specific pages. The monthly feature story provides a detailed, in-depth look at a single topic that affects subscribers.

Regular monthly departments include:

ComputerWare: Resources for Your Multimedia Computer

Home & Office: Personal Productivity Resources and Information

Desktop Media: Techniques for Using Technology Effectively

Entertainment: Music, Games, Video...Just for Fun

Multimedia Guide: The Latest Information on Multimedia Products

KidZone: Multimedia Fun for Your Family

NautilusCD is published monthly by Metatec Corporation and is available for Macintosh and Windows computers.
